State of Idaho
Department of Water Resources
Water Right License
Water Right No. 65-24010

3. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

This license is issued pursuant to the provisions of Idaho Code § 42-219. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 9th day of June, 2023.

RE: License No. 65-24010

ISSUANCE OF LICENSE

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 605-4624.

Sincerely,

Scott Storms
Water Rights Supervisor

CERTIFICATE OF SERVICE

I hereby certify that on June 12, 2023, I served a true and correct copy of Water Right License No. 65-24010 by U.S. Mail, postage prepaid, to the following:

MARIA WORAS (Current Owner)
392 MOON DR
MCCALL ID 83638-5612

CHRISTOPHER WORAS (Current Owner)
392 MOON DR
MCCALL ID 83638-5612

Scott Storms
Water Rights Supervisor

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A	N/A	N/A	N/A	N/A	N/A	N/A

2. Measurements: Per IDAPA Beneficial Use Exam Rule 35.01.r. no direct measurement is required.

E. FLOW CALCULATIONSN/A Additional Computation Sheets Attached

Measured Method: Per IDAPA Beneficial Use Exam Rule 35.01.r. no direct measurement is required.

Standard Irrigation rate for small acreages <5 acres = 0.03 cfs/ac x 0.5ac = 0.02 cfs

Standard single-home domestic use = 0.04 cfs

Standard stockwater rate for 26 – 50 head of stock = 0.02 cfs

Permitted Total Rate = 0.12 cfs

License Recommendation = 0.08 cfs

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 0.5 \text{ acres} \times 3.0 \text{ AFA} = 1.5 \text{ AF}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.02 \text{ cfs} \times 200 \text{ days} \times 1.9835 = 7.9 \text{ AF}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = \underline{1.5 \text{ AF}}$$

2. Volume Calculations for Other Uses:

Domestic - Quantity is 0.6 AFA per household when irrigation is not included per Application Processing Memo 22

Stockwater - Annual Use of Water for Stockwater Purposes using Processing Memo 3

$$26 - 50 \text{ head of stock} = \underline{0.7 \text{ AFA}}$$

G. NARRATIVE/REMARKS/COMMENTS

A field exam was conducted on 05/16/23 by Senior Water Right Agent Laura McSherry and was accompanied by the applicant, Mr. Christopher Woras. The permit was approved on February 25, 2021, and proof of beneficial use was submitted on August 27, 2021.

The point of diversion (POD) location was confirmed at a groundwater well in the NENW of Sec 31, T18N, R03E and is accurately described by the permit. The well is installed with a 1.0 hp Franklin pump which diverts water entirely underground using 1.0" PVC pipe to the domestic home and yard hydrant. No amendment required to correct the legal description of the POD.

The permit authorizes 0.02 cfs for stockwater use, 0.08 cfs for irrigation use, and 0.04 cfs for domestic use within the NENW of Sec 31, T18N, R03E. ArcMap tools and aerial imagery, supported by photos taken during the field exam, were used to verify the area of irrigation, domestic, and stockwater use with ~ 30 head of mixed stock (chickens and goats). No amendment required to correct the legal description of the POUs.

Pump information was provided by the applicant. The overall rate/quantity recommendation is within the parameters of IDAPA Beneficial Use Exam Rule 35.01.r., therefore the recommended licensed flow rate for irrigation use is 0.02 cfs and the maximum diversion volume for irrigation use is 1.5 AF, the recommended licensed flow rate for domestic use is 0.04 cfs and the maximum diversion volume for domestic use is 0.6 AF, and the recommended licensed flow rate for stockwater use is 0.02 cfs and the maximum diversion volume for stockwater use is 0.7 AF.

Condition 103 replaced condition 121 per department standards. Condition 132 was replaced condition X01 to distinguish irrigation separate from domestic use. Condition 046 was removed as construction of the well is complete and condition X02 was removed per condition use description. Condition R66 was carried forward to the license.

Have conditions of permit approval been met? ☒ Yes ☐ No

H. RECOMMENDATIONS**1. Recommended Amounts**

<u>Beneficial Use</u>	<u>Period of Use</u>	<u>Rate of Diversion</u>	<u>Annual Volume</u>
STOCKWATER	01/01 to 12/31	0.02 CFS	0.7 AF
