Subject: Re: Applications for Permit Nos. 63-35632, 65-24324

Hi Lynne,

We do not have any comments on WR application No. 63-35632.

In response to WR application No. 65-24324, the application describes a "pump tank" located in the creek. Shafer Creek contains native redband trout. We request the following conditions on the permit if it is approved:

1. The pump intake in Shafer Creek should be fitted with a screen with mesh no larger than 0.25 inches, whether that be on the end of the pipe or whether that be attached directly to the pump tank, to avoid fish passage into the irrigation system.
2. The pump tank should be large enough to reduce approach velocity to 0.5 fps or lower so that fish do not get impinged on the screen.

Thanks for the opportunity to review and comment. Please let me know if you have any questions.

Thanks.

Brandon Flack
