Sandra, the beneficial use claim filed with the department listed two points of diversion. After further investigation by the ranch manager it appears there is only one point of diversion located in the SENW quarter and that the diversion is from a spring that is tributary to Hornby Creek. Ryan Fobes prepared the photo below showing the location of the point of diversion.

Hope this email finds you well and enjoying your work.

Regards, Clive

Hello, we received the Amended Notice of Claim for 96-4431. Thank you. We do not know the point of diversion locations from either Hornby Creek, or the spring tributary to Hornby Creek. Using the attached map, can you please identify the locations of both points of diversion? We also accept GPS coordinates if you have them.
