Department of Water Resources

Water Right License

Water Right No. 81-12033

Priority: April 25, 2022

Maximum Diversion Rate: 0.05 CFS
Maximum Diversion Volume: 1.3 AF

It is hereby certified that:

EAGLES PERCH TRUST 3950 ARBOR TRACE DR UNIT T LYNN HAVEN FL 32444-6722

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated August 18, 2021, and has submitted Proof of Beneficial Use on June 06, 2023. An examination confirms water is diverted from:

Source : GROUND WATER
Source : SPRING **Tributary:** SINKS

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
STOCKWATER	01/01 to 12/31	0.01 CFS	0.1 AF
DOMESTIC	01/01 to 12/31	0.04 CFS	1.2 AF

Location of Point(s) of Diversion
GROUND WATER NW¼ SE¼, Sec. 35, Twp 32N, Rge 05E, B.M. IDAHO County
SPRING SE¼ NE¼ SW¼, Sec. 35, Twp 32N, Rge 05E, B.M. IDAHO County

Place of Use: STOCKWATER

Twp	Rng	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
32N	05E	35									X					X			

Place of Use: DOMESTIC

			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
32N	05E	35									X					X			

Conditions of Approval

1. The following rights are diverted through point(s) of diversion described above: 81-12033 & 81-12041.
2. Domestic use is for 1 home.
3. The irrigation occurring under this domestic use shall not exceed 1/2 acre.
4. Upon specific notification by the Department, the right holder shall install a lockable device of a type acceptable to the Department in a manner that will provide suitable control of the diversion.
5. This right does not grant any right-of-way or easement across the land of another.

Water Right License

Water Right No. 81-12033

6. The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein. Enforcement of those portions of the agreement not specifically addressed in other conditions shall be the responsibility of the protestant and the water right holder.

This license is issued pursuant to the provisions of Idaho Code § 42-219. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 20th day of June, 2023.

RE: License No. 81-12033

ISSUANCE OF LICENSE

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 287-4925.

Sincerely,

Jean Hersley

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

SCANNED
JUN 22 2023

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

> Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:
>
> (a) The petition for reconsideration is disposed of; or
> (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
IN-OFFICE REVIEW/BENEFICIAL USE FIELD REPORT

A. GENERAL INFORMATION

Exam Date: 06/15/2023

1. Does this qualify for an in-office field exam (IDAPA 37.03.02.035.01.r)? _X_Y ____N
   a. ____ Irrigation of 5 acres or less
   b. ____ Storage of up to 14.6 AF for stockwater purposes only
   c. _X_ Any use other than irrigation or storage, if the combined diversion rate is 0.24 cfs or less
   d. ____ Other < >

2. Current Owner: **Eagles Perch Trust- Jason Finch-Trustee**
   Owner of Record Correct? _____N
   Address of Record Correct? _____N
   If No Explain:

3. Beneficial Use Fees have been paid: _X_Y ____N Receipt No: C110699 / C116913

4. **Source:** **Tributary:**
   Groundwater **N/A**
   Spring **Sinks**
   Method of Determination:
   Change in Source: ____Y _X_N

B. OVERLAP REVIEW

1. Other water rights with the same place of use: ____ No Overlap

Water Right No.	Source	Purpose of Use	Basis
81-12041	Spring	Stock water / Domestic	License
81-10026	Unnamed stream	Stock water	Decree

Comments: Right 81-12041 appears to have a partially overlapping place of use (POU). However, review of the right file finds it is appurtenant to the neighboring parcel. Right 81-10026 was decreed in 1981 and appears to have a POU shape covering the entire NESW, overlapping the permit POU. However, there is no parcel in the NESW listing the right holder as current owner and the point of diversion is at a stream in a different parcel west of the permit POU. It appears unlikely that the stockwater right is an actual overlap of the permit POU.

2. Other water rights with the same point of diversion: ____ NO Overlap

Water Right No.	Source	Purpose of Use	Basis
81-12041	Spring	Stock water/ Domestic	License

Comments: Right 81-12041 shares the same spring source as one of the permit points of diversion (POD). However, any issue was addressed between the permit holder and the right holder after a protest was issued and then withdrawn by the owner of right 91-12041.

C. DIVERSION AND DELIVERY SYSTEM

1. Location of Point(s) of Diversion:

Source	Govt. Lot	¼	¼	¼	Sec.	Twp.	Rge.		County
Spring-sinks		SE	NE	SW	35	32N	05E	B.M.	IDAHO
Groundwater			NW	SE	35	32N	05E	B.M.	IDAHO

Method of Determination: GIS and Tax lot data.

Change in POD? ___Y _X_N Amendment Required? ____Y _X_N

2. Place of Use: **DOMESTIC**

TWP	RGE	Sec	NE				NW				SW				SE				Total
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE

		Lot #																	

SCANNED
JUN 22 2023

Method of Determination:

Change in POU? ____Y __X_N Amendment Required? ____Y _X_N

_X_ Delivery System Diagram Attached (required). Indicate all major components and distances between components.

Indicate weir size/pipe as applicable:

_X_ Aerial Photo Attached (required for irrigation of 10+ acres).

_X_ Photo of Diversion and System Attached

3. Diversion Id No.*	Motor Make	HP	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
D0069986	Unknown	Unkonwn	Unknown	Unknown	Unknown

**Code to correspond with No. on map and aerial photo*

D. FLOW MEASUREMENTS

1. Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
NONE						

2. Measurement Comments: The permit holder did not provide pump details in the Proof of beneficial use. The Field Examiners Handbook and Administrative Memo #22 were used to determine a reasonable rate.

E. FLOW CALCULATIONS ___Additional Computation Sheets Attached

Comments: The permit and application based the stock water allocation on 15 head of mixed stock. When I discussed the stock water with the permit holder on June 15th, 2023, she explained that she keeps less than 20 chickens, The permit holder also stated she may keep a cow or two in the future. Field Examiners Handbook allows a rate of up to 0.01cfs (rounded as per Admin Memo #6) for up to 100 head of chickens. Administrative Memo 22 allows a rate of up to 0.04cfs for domestic use in 1 home, I am recommending a maximum diversion rate of 0.05cfs at licensing.

Permit allowed = 0.06cfs
Recommendation = **0.05cfs**

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.}$ = (Acres Irrigated) x (Irrigation Requirement) = 0.5acres x 3.0 AF= 1.5 AF

$V_{D.R.}$ = [Diversion Rate (cfs)] x (Days in Irrigation season) x 1.9835 = 0.05cfs x 214 days x 1.9835=

V = Smaller of $V_{I.R.}$ and $V_{D.R.}$ = 1.5 AF

2. Volume Calculations for Other Uses: Domestic use for gardening and small orchard.

Comments: Administrative Memo 22 allows an annual volume of up to 1.2 AF for domestic use in 1 home with up to ½ acre of irrigation. According to the IDWR Stockwater Volume Table in the guidance of the Field Examiner's Handbook, up to 100 chickens only require about 8.5 gallons per day. As the permit holder stated they have less than 100 chickens the minimal increase of 0.1 AF is a reasonable volume for the watering needs. I am recommending a maximum annual volume of 1.3 AF at licensing.

G. PURPOSE OF USE

Irrigation _X_Y ____N # Stock_< 20 chickens_____ Domestic # of Homes __1___

Other: < >

Change in Purpose of Use? ____Y _X_N

Method of Determination:

If Yes: From Use _____To Use _____Amount _____CFS _____AFA_____

SCANNED
JUN 22 2023

H. NARRATIVE/REMARKS/COMMENTS:

The permit for domestic and stock water use was initially protested as the neighbor Robert Ward also uses the spring for domestic and stockwater. An agreement was reached between the parties, the protest was withdrawn, and the system was installed to divert water for both parties.

The spring is gravity fed from a concrete spring box through 1 ½" PVC into two 1000-gallon tanks (see system diagram, Figure 1). The water diverted for the neighbor is gravity fed from the Ward's tank exiting the permit holder's property to the north of the tanks. The water diverted to the permit holder's tank is controlled by a float-switching system and pumped through a 1 ¼" poly line to the three 2500-gallon storage tanks located in the southeastern corner of the permit holder's parcel. Water is also diverted to the storage tanks from a well just to the east of the tanks. The spring and groundwater co-mingle in the storage tanks. Water is gravity fed through 1 ¼" poly line to the home and garden areas downhill of the tanks, to the northwest and west respectively. I corresponded with the permit holder to draft the final system diagram. The owner provided photographs of the system via email (see photos in figures 2-4). The garden and water for the chickens is delivered via hoses, sprinklers, and hand watering as needed.

In a June 15th, 2023, phone call with the permit holder regarding the system and stockwater use, the permit holder stated that she keeps a chicken coop of laying hens but has no other livestock of her own. The permit holder further confirmed that the areas south of the house have a greenhouse, garden and small orchard, she stated the reason she listed 2 homes on the proof of beneficial use was because of the protest and that her neighbor shares the spring. However, the neighbor has their own permit for domestic and stockwater (81-12041). GIS images and measurements of these areas found 1 domestic home, the chicken coop, and less than ½ acre of irrigation evident.

The permit is for the allocation of 2 sources, spring-sinks and groundwater. However, both sources are diverted into the same system, which co-mingles the source waters in three 2500-gallon storage tanks for domestic and stockwater use. As Administrative Memo #58 and Water Appropriation Rule 035.03.b.ii. state, "Only one source shall be listed on an application unless the application is for a single system which will have more than one source." As per the diagram and preceding description given by the permit holder, the system developed has two sources that are physically interconnected and therefore meets this criterion. I am recommending the license be issued with a rate of 0.05cfs and an annual volume of 1.3 AF, as per the IDWR Field Examiners Handbook stockwater guidance and Administrative Memos #22 and 6.

I am recommending the license be issued with conditions F06, 020, X01, 187, 199, and 004.

Have conditions of permit approval been met? _X_ Yes ____ No

I. RECOMMENDATIONS

1. Recommended Amounts:

BENEFICIAL USE	PERIOD OF USE	DIVERSION RATE	ANNUAL VOLUME
Domestic	01/01 to 12/31	0.04cfs	1.2 AF
Stockwater	01/01 to 12/31	0.01cfs	0.1 AF
	Totals:	**0.05cfs**	**1.3 AF**

2. Recommended Amendments:

___Change P.D. as reflected above ___Add P.D. as reflected above ___None

___Change P.U. as reflected above ___Add P.U. as reflected above ___None

Subject: System Diagram for Permit #81-12033

Hi Karen,

Here is the system diagram I came up with based on your photos. The only item I am unclear on is if there is a pump in the 1000gal tank with a sensor, or just a sensor to activate the pump for the well, which is used for both the spring and well. It is also attached for you to make any corrections, or you can submit your own diagram instead. If the diagram is correct please let me know and email the attachment to file@idwr.idaho.gov and make the email subject "System Diagram for Permit 81-12033". If you would like to make your own diagram it can be emailed in the same manner. Thank you for your time and attention to this matter. Nice work on the photos too!

<Bob.Howe@idwr.idaho.gov> wrote:

Dear Jason & Karen Finch,

The Department received the Proof of Beneficial Use you submitted for permit #81-12033. I am currently reviewing the permit eligibility for an in-office examination for licensing. In-office examination expedites the licensing process by using information and documentation submitted by the permit holder(s) and GIS images to process the examination without the need for a field examination to be scheduled and conducted at a later time. The permit issued provided a scope for the development of future uses. The purpose of the examination is to record the details for the uses that have been developed.

After reviewing your Proof of Beneficial Use, there are a few items that need further information or clarification.

First, I have attached 2 aerial images of the permitted place of use, one Google Earth image and one ArcGIS image. The GIS image also outlines the place of use area in yellow (as submitted on the permit) and the permit points of diversion representing the spring and well as light blue points (as submitted on the permit). Please label to identify and diagram the system for domestic and stock water uses on the image(s) and return it to me (via email). Please label the image identifying the spring, storage tank(s), the well, which building is the home (there is only 1 provisioned on the permit), and any stock water tanks. Also please draw in any the location of buried lines.

Second, please attach the diagram(s) to an email detailing the size (Hp and/or output, make and model if possible) of the pump, pipe diameter and material (for example: 1" PVC).

On the Proof of Beneficial Use, section 3 you stated that there are 2 domestic households developed. Please note that only 1 domestic household was permitted, so we will only be able to license 1 home under this permit. If you wish to establish another domestic right, you will need to file another application for permit for the second domestic use.

#1- my tank on left (east)
Robert Wards tank on right (west)
They are about maybe 10 ft apart
You can see the spring box in the back (south)

#2- this is the Y where the pipe from the spring divides - the pipe then goes to his holding tank and to my holding tank.

Dear Jason & Karen Finch,

The Department received the Proof of Beneficial Use you submitted for permit #81-12033. I am currently reviewing the permit eligibility for an in-office examination for licensing. In-office examination expedites the licensing process by using information and documentation submitted by the permit holder(s) and GIS images to process the examination without the need for a field examination to be scheduled and conducted at a later time. The permit issued provided a scope for the development of future uses. The purpose of the examination is to record the details for the uses that have been developed.

Picture #1- looking north towards Robert Wards house...spring box in the foreground.

#2- Looking north towards Wards house. His holding tank is on left and mine in on the right about 10 ft from his....that would be north east of his.

#3- Looking south from both tanks at the spring box.

I'll send 2 more pictures in another email. They wouldn't all attach.
The grass is very tall so it was hard to get clear pictures.

Karen Finch

NOTICE: STATEMENT OF COMPLETION DUE

RE: Permit No. 81-12033

IMPORTANT: A response from you is required to maintain the active status of the referenced water right permit. If no response is received from you, the permit will lapse and your authorization to develop and/or use this water right will be cancelled.

Dear Permit Holder(s):

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before **July 01, 2023**. Please complete and return the enclosed Statement of Completion for Submitting Proof of Beneficial Use (proof) if you have completed the water project authorized by your permit. The proof statement must be accompanied by either the appropriate license examination fee or a field examination report prepared by a certified water right examiner.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been delayed by a government agency or by litigation that brings title to the water in question, an extension of time may be granted if appropriate documentation is provided at the time of filing. An extension request must be accompanied by a $50.00 filing fee and signed by the appropriate authorized permit holder(s) or authorized representative with a power of attorney.

Either an acceptable proof or an acceptable extension request must be received by this department on or before the above proof due date. If neither is received, the department will send you a lapse notice and the permit will no longer be of any force or effect.

Sincerely,

Water Rights Section
