Kimberly,

Given that there is no physical means to deliver your water to your property at this time I see no reason to object to your application. As discussed, the regional water master suggested that you could be responsible for a base fee in the assessment of the District but would not be held to additional assessment as the water is not being delivered.

Good afternoon Steve --

As we discussed, the water bank lease application for the water rights referenced above require "Written consent from irrigation district or water delivery company." I assume that is you ☺ As the Wallace Creek Water Master, would you please reply back with your consent to move forward with this application.

Also, thanks for passing my information along to Chuck. Although he's interested in restoring the ditch up from me, he's not in a position to do anything with it right now. He also mentioned that I would have difficulty getting the ditch restored through the property on the other side of him, unless we went through the slide area, as the property owner would not be receptive to running the ditch along the easement that was created post slide. You may or may not be aware, so I'm just passing along the info. Of course, both are a moot point until ditch is restored at the old Yanoff property (not sure who owns it now).

I really appreciate all your insight, guidance and information as I become educated.

I hope you have a lovely evening and don't work too hard the rest of the week.

Thanks kindly,

Kimberly
