The Idaho Department of Water Resources (Department) considers this form a statement that the permit holder(s) applied water to beneficial use and completed development of a water right to the extent described below. **This form must be accompanied by an examination fee, when necessary, or by a completed Beneficial Use Field Report prepared by a certified water right examiner (CWRE).** Please refer to the instructions and fee schedule for this form. If ownership of the permit has changed, complete a Notice of Change in Water Right Ownership form. If you wish to relinquish your permit because you have not established the authorized water use and are not applying for an extension, please notify the Department in writing.

RE: License No. 97-8694

ISSUANCE OF LICENSE

Dear Water Right Holder:

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 287-4925.

Sincerely,

Phill Hummer
Water Rights Supervisor

97-7127	Groundwater	Domestic	License

Comments: There are two water rights with overlapping places of use. However, water right 97-7265 has a different source and has a beneficial use for irrigation not domestic use. 97-7265 therefore would not overlap this permit. The other right 97-7127 would not overlap this right because backfiles, not GIS imagery, indicated the actual place of use does not overlap this permit.

NONE						

2. Measurements: Since pump horsepower was not provided by the owner a diversion rate (theoretical) calculation is not possible.

E. FLOW CALCULATIONS

____ Additional Computation Sheets Attached

Measured Method:

Without a diversion rate calculation, the diversion rate is determined from the standards set in Administrative Processing Memo #22. For two homes the diversion rate is set at 0.06 cfs. The rate on the permit is 0.06 cfs. I will be recommending 0.06 cfs.

F. VOLUME CALCULATIONS

2. Volume Calculations for Other Uses:

According to Administrative Processing Memo #22 the water volume is determined by adding in house use at 0.6 af and external ½ acre irrigation at 0.6 for 1.2 per home. However, according to GIS, Google Imagery and Tax Parcel Data the two homes lie on one of the two lots. This indicates there should only be lawn irrigation in one lot or just one ½ acre of yard irrigation. The total volume would be 0.6 af + 0.6 af + 0.6 af = 1.8 af. I will recommend 1.8 af.

H. NARRATIVE/REMARKS/COMMENTS

According to GIS and Tax Parcel Data the lot containing two homes was constructed in 1975. The owner confirmed on their Application for Permit they are adding a new well accommodating a previous well on an older right that was not producing enough water. The owner did not provide pump horsepower; thus, a diversion rate calculation was not possible. The standards set in Administrative Processing Memo #22 were used instead. According to GIS, Google Imagery and Tax Parcel Data the two homes lie on one of the two lots. This indicates lawn irrigation should be on one lot or just one 1/2 acre of yard irrigation. According to department standards and what is written on the permit I will recommend a 0.04 cfs diversion rate and 1.8 af volume. All the conditions have been met. It is likely that the owners are using their water for the beneficial use listed on their permit.

Conditions X04, X59, 187, and X60 should remain on the license. Condition 187 should be changed from 1/2 acre per lot to 1/2 acre of yard irrigation. All other conditions should be removed as standard with licensing.
