Conditions of Approval

1. This right does not grant any right-of-way or easement across the land of another.
2. Water shall not be diverted under this right when flows in the Priest River are below minimum flow amounts as defined by Right 97-7380. The right holder shall be responsible for monitoring the daily flow of the Priest River using real-time data and shall cease diverting water when flows in the Priest River are below established minimum flow amounts. Unless otherwise specified by the Director of the Department of Water Resources, data from the U.S. Geological Survey Priest River gauging station, No. 12395000, may be used for purposes of determining the daily flow amounts.
3. A fish screen of 1/4 inch or smaller mesh shall be installed and maintained at the point of diversion.
4. This right when combined with all other rights shall provide no more than 0.04 cfs nor more than 1.5 afa at the field headgate for irrigation of the place of use.

This license is issued pursuant to the provisions of Idaho Code § 42-219. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 29 day of November, 2022.

RE: License No. 97-7547

ISSUANCE OF LICENSE

Dear Water Right Holders:

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 287-4925.

Sincerely,

for Phill Hummer

1. Other water rights with the same place of use: YES Overlap

Water Right No.	Source	Purpose of Use	Basis
none			

Comments: Water Right 97-7380, establishes the minimal stream flow for the Priest River, therefore the USGS guidelines of water appropriation within this area apply and are noted in the conditions on the permit and license for 97-7547.

It appears as though the place of use of **water right 97-7354** is the entire NENW qtr, qtr, which overlaps the permit POU, however, the place of use described on the water right documentation is 289 Kenny Ln, Priest River, ID, which is a 4.9acre lot on the opposite bank of Priest River. Based on the licensing documentation I do not believe that there is any overlap between water right 97-7354 and 97-7545.

2. Other water rights with the same point of diversion: NO Overlap

Water Right No.	Source	Purpose of Use	Basis
NONE			

Comments: The MSF water right only overlaps the permit place of use.

D. FLOW MEASUREMENTS

1. Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
NONE						

2. Measurements: No measurement is required for an in-house exam, but a theoretical calculation was used to determine if the diversion rate is reasonable.**E. FLOW CALCULATIONS** Additional Computation Sheets Attached

Measured Method:

A theoretical analysis shows that a diversion rate of 0.04 cfs is possible with a 1 Hp pump. The owner didn't provide the model or make of pump that they had, so I will recommend a diversion rate of 0.04 cfs, which is what was requested on their application for permit.

$$Q = (0.5 \text{ Hp})(8.8)(0.70)/10 \text{ ft lift} + (30 \text{ psi} \times 2.31) = 0.04 \text{ cfs}$$

Permit allowed = 0.04 cfs

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 0.5 \times 3 = 1.5$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.04 \times 214 \times 1.9835 = 16.98$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 1.5$$

DEC 12 2022

2. Volume Calculations for Other Uses:

According to ADAPA rule 035.01.J.viii, irrigation using natural stream flow diverted from a stream or spring is exempt from the volume reporting requirement.

G. PURPOSE OF USE

Irrigation ☒ Y ☐ N # Stock NA Domestic # of Homes NA

Change in Purpose of Use? ☐ Y ☒ N

Method of Determination: Taxlot data and conversations with owner.

H. NARRATIVE/REMARKS/COMMENTS

This permit for 0.5 acre from diverted stream flow qualifies for an in-house exam. We received confirmation from the owner in the statement of completion that the fish screen is installed, so it appears as though everything is in order. The outline for the MSF restrictions is noted in the conditions. The only information the owner provided regarding the pump was that it is 1hp, but a theoretical calculation was able to support the 0.04cfs flow requested. Therefore, I am recommending licensing for a diversion rate of 0.04 cfs, provided that the period(s) of usage strictly follow the minimal stream flow guidelines.

This recommendation is contingent upon conditions 004, 227, X15, and X31 in place of condition R58, as the area of use is less than 1 acre. Volume recommendation for the license is not necessary, per ADAPA rule 035.01.J.viii, as the source is from stream flow. Condition A26 has been removed, as an extension was filed and proof was submitted within the extended time allotment.

Have conditions of permit approval been met? ☒ Yes ☐ No
