RE: License No. 96-11375

ISSUANCE OF LICENSE

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 287-4925.

Sincerely,

Jean Hershey

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

4.

Well or Diversion ID No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
N/A	N/A	N/A	N/A	N/A	N/A

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A	N/A	N/A	N/A	N/A	N/A	N/A

E. FLOW CALCULATIONS

 Additional Computation Sheets Attached

Measured Method:

N/A – Standard flow rate for small acreage irrigation. Given that a 2,500 gal storage tank is used, flow is likely less than standard rate.

F. VOLUME CALCULATIONS

1. Volume Calculations for irrigation: N/A (Not needed for irrigation from spring)

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 0.9 \text{ acres} \times 3 \text{ acre-ft/acre} = 2.7 \text{ acre-ft}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.03 \times 214 \times 1.9835 = 12.7 \text{ acre-ft}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 2.7 \text{ acre-ft}$$

2. Volume Calculations for Other Uses: N/A

G. NARRATIVE/REMARKS/COMMENTS

Water right 96-11375 qualifies for an In-House Beneficial Use Examination due to the acreage of irrigation being less than 5 acres. Proof of beneficial use was submitted and received by IDWR on June 14, 2023 without photographs or diagrams showing beneficial use or conveyance systems, so additional information was requested.

Attached photographs and emails from the water right file show where irrigation occurs and for what use. Irrigation helps produce a horse pasture, fruit trees, and blackberry plants. Areas irrigated amount to 1.4 acres, but 0.5 acres are already accounted for with domestic water right 96-9864. Subtracting the irrigation allowed with the domestic right, I am recommending that the license should be limited to 0.9 acres of irrigation.

The applicant only highlighted one holding tank in the email and wrote "Gravity fed from spring to 2,500 gal tank (holding) then gravity fed from there." on the proof submittal. An email correspondence on July 11 stated that they are only using one spring, but there is an additional overflow tank. They are not storing enough water to require adding a storage component to the license. The license should reduce the points of diversion to one since the permit holder is only using one spring for irrigation.

I am recommending that the diversion rate be reduced to the standard rate for 0.9 acres of irrigation, which is 0.3 cfs.

SCANNED
JUL 24 2023

Condition R66 should be changed to X31 since the number of acres is less than 1.0. Condition 004 should also be transferred to the license since there are two homes on the property and the property could be split into two parcels in the future.

Have conditions of permit approval been met? ☒ Yes ☐ No

H. RECOMMENDATIONS

1. Recommended Amounts

<u>Beneficial Use</u>	<u>Period of Use</u>	<u>Rate of Diversion</u>	<u>Annual Volume</u>
IRRIGATION	04/01 to 10/31	0.03 CFS	N/A

Totals: 0.03 CFS

2. Recommended Amendments

☒ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None

☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☒ None

Hey Emily,

SCANNED

JUL 24 2023

Calculating surface area of the areas you circled, being fairly generous, it looks like you are irrigating 1.4 acres, total. The domestic water right you own allows the irrigation of 0.5 acres, so I can license you for 0.9 acres for your irrigation water right. Your irrigation rate will be reduced to the standard rate of 0.03 cfs/acre. If you wish to irrigate more in the future, you can always apply for another water right requesting more acreage.

Feel free to contact me with any questions you have.

Thanks,

Blake

The top picture shows the entire picture and the other 2 are just breakdowns of the whole. A lot of it looks like dirt or bark, but is in fact holding the majority of our young fruit trees and blackberry plants. The red indicated all the areas that we irrigate and the blue/green square is where the holding tank is located. The yellow scribble is where the original well was located. It is not in use and has not been for the past 8 years. It was very low producing and eventually dried up. I hope this helps. I believe this last aerial map was taken in the spring of 2021, but I'm not totally sure. Please let me know if you would like more pictures. Our fruit trees have grown a lot and the blackberry plants don't look like much from space, but they are large and take up a lot

of space. The far left and largest of the open areas, is our horse pasture, which we seeded this spring with barley and oats.

Anyway, I hope this all helps.

Have a great weekend.

Hello,

I left a voicemail regarding your irrigation water right proof of beneficial use statement. A requirement for processing your license is a map of place of use and photographs showing beneficial use. Attached is an image of where I believe irrigation is occurring, but the two areas combined are less than $\frac{1}{4}$ acre. Your domestic water right includes $\frac{1}{2}$ acre of irrigation for each house.

I will be needing your input as to where irrigation is occurring and I would appreciate a diagram of where the holding tank is located. Additionally, I see that a well on the property was drilled in 2007 to 475 ft (see well construction log here: [IDWR Laser Fiche -- Document Search \(idaho.gov\)](#)). Is this well in use?

Feel free to email me or give me a call. Thanks.

NOTICE: STATEMENT OF COMPLETION DUE

RE: Permit No. 96-11375

IMPORTANT: A response from you is required to maintain the active status of the referenced water right permit. If no response is received from you, the permit will lapse and your authorization to develop and/or use this water right will be cancelled.

Dear Permit Holder(s):

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before **July 01, 2023**. Please complete and return the enclosed Statement of Completion for Submitting Proof of Beneficial Use (proof) if you have completed the water project authorized by your permit. The proof statement must be accompanied by either the appropriate license examination fee or a field examination report prepared by a certified water right examiner.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been delayed by a government agency or by litigation that brings title to the water in question, an extension of time may be granted if appropriate documentation is provided at the time of filing. An extension request must be accompanied by a \$50.00 filing fee and signed by the appropriate authorized permit holder(s) or authorized representative with a power of attorney.

Either an acceptable proof or an acceptable extension request must be received by this department on or before the above proof due date. If neither is received, the department will send you a lapse notice and the permit will no longer be of any force or effect.

Sincerely,

Water Rights Section
