RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
10. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.

11. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. 12. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 143.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

MEMORANDUM FOR WSB RENTAL AGREEMENT # 899

To: Water Right No(s). 43-13271, 43-13273, 43-13275, and 43-13279

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 3020 was sent in by Evard LLC and received by the Department on August 15th, 2024. This application is part of a lease/rental application package with lease contract 1935. The renter, lessor and water right (WR) owner are the same according to Department records. Therefore, the renter is only required to pay the administrative rental fee. The applicant proposes to rent 82 acres or the entirety of lease contract 1935 from the water supply bank (WSB) from 2025-2029. The proposed points of diversion (POD) is within the Snake River Basin Moratorium Area, Raft River Critical Groundwater Management Area, Raft River Groundwater District, and Trust Water Area. Raft River Groundwater District was notified of this application on January 10th, 2025. This is the first time these water rights have been rented from the WSB.

AUTHORITY TO FILE:

Reed Gibby signed the application. Mr Gibby has the authority to file this agreement because he is a manager with Square Glass Holdings LLC which is a member of Evard LLC according to the Idaho Secretary of States Office Database. Evard LLC is the current owners of the leased WR along with 43-10144 and 43-10145 according to Department records. WR's 43-10144 and 43-10145 authorize diversion from the proposed POD's.

INJURY TO OTHER WATER RIGHTS:

The lease and rental PODs are from 2.7 to 3.9 miles apart. The PODs authorized under the lease are within the Raft River Critical Groundwater Management Area (CGWMA). The proposed rental PODs are also within the Raft River CGWMA. Since the lease and rental PODs are relatively close together and within the Raft River CGWMA its unlikely this rental would cause injury to other groundwater users. There are no other injury concerns.

ENLARGEMENT OF USE:

There are no other irrigation WR's overlapping the rental place of use or diverting from the proposed POD's. Water rights 43-10144 and 43-10145 overlap the proposed POD's but they both authorize domestic and stockwater use. Therefore, there is no reason to limit this rental and overlapping WR's when combined. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The proposed PODs are within Administrative Basin 43 and Water District 143. The Watermaster and Southern Regional Manager was contacted for comment on January 10th, 2025. No response was received, its is assumed there are no concerns with the applicant's proposal.

Hello Corey and Brian ,

I have completed my review of a Water Supply Bank Lease/Rental Application Package with the points of diversion within Administrative Basin 43 and Water District 143 . The applicant for both the lease and rental application is Evard LLC. The applicant proposes to lease portions of water rights 43-13271, 43-13273, 43-13275, and 13279 or 82 acres when combined into the water supply bank from 2025-2029. The applicant proposes to rent the entire lease contract to irrigate 82 acres at a different place of use and diverting from different points of diversion. Attached is a copy of a draft rental agreement, lease/rental review memo and maps of the place of use. If you have any comments on the applicant's proposal or my review, please let me know within 7 days. If you have any questions or concerns, please let me know.

Best,

Skyler
