Dear Mary,

As we discussed on the phone, I am sending you an Amended Notice of Claim that can be used to make changes to water right claim 97-4031. I made only the changes we discussed over the phone, and the shapes for your point of diversion and place of use have also been updated to reflect the information you gave me on the phone.

If you have any additional information that supports domestic (in home) use for your priority date of 1936, please include that with the return of your amended claim. You may add it later if you do not have it yet, but I do recommend including any of the evidence we discussed since the claimed priority date conflicts with Bonner County's year built date on record (1963). If you do not include it before we begin recommendations to the court, you may be contacted by our office with a request for additional evidence at a later date. Without information supporting the conflicting priority date, it is possible that our department won't be able to recommend 1936 as the year of priority on your claim. If you wish to add a short statement or explanation that does not need a separate attachment, you may write that in on #12 after "Priority Date Explanation".

Please sign and return the amended claim to us at your earliest convenience. No additional fees are required.

Lastly, I have also attached a copy of the Application for Permit along with the instructions for completing it. This can be used to obtain a permit/license for your use of lake water. If you would like assistance with the permit process, we do have Tammy Alleman available to help you with that. You can reach her by calling the office at the number below.
