Part 1A.3 – Proposal Description

Land is being dried up to provide water for the continued expansion of an existing dairy. An earlier enlargement of the dairy operation was recorded through water right Transfer 80026 (approved in 2016) in which 45.5 acres of irrigation for water right 61-2186 were retired to allow more water for the commercial and stockwater uses associated with the dairy. No expansion or forfeiture has occurred since the previous transfer, but additional acres of irrigation have been retired over time as the dairy operation has expanded. The current transfer application proposes to update the water right records to reflect the current dairy and farming operation, with an additional retirement of two small irrigation pivots to provide more water for commercial and stockwater use. No further reduction in irrigation or expansion of the dairy operation is anticipated beyond the conversion of the two pivots.

Under the current transfer proposal, the nature and season of use for portions of water rights 61-2186 and 61-2220 will change from seasonal irrigation to year-round commercial and stockwater uses. The places of use for water rights 61-2186, 61-2220, 61-7222, 61-7060, and 61-12270 will also change, with the PPU for all irrigation uses being reduced from 920 acres to 667 acres. This PPU reduction is to account for the elimination of all irrigation in the NE ¼ of Section 7, T5S R6E, as well as some irrigation in the following: the NW ¼ of Section 7, T5S R6E, the SW ¼ of Section 6, T5S R6E, and the NE ¼ of Section 12, T5S R5E. The expansion of the dairy will also require the stockwater and commercial places of use to include a portion of the NW ¼ of Section 7, T5S R6E and small portions of the SW ¼ of Section 6, T5S R6E, and the NE ¼ of Section 12, T5S R5E. The points of diversion will not change for any of the rights, and the only changes to water rights 61-7222, 61-7060, and 61-12270 are in their places of use.

As stated above, all conversions from irrigation to commercial and stockwater uses have already occurred, apart from two small pivots to be retired from irrigation. The two pivots, one in the SWNW of Section 7 and the SENE of Section 12 and the other in the SWSW of Section 6, the NWNW of Section 7, and the NENE of Section 12, will no longer be irrigated but will be used for land application of dairy waste.

Stockwater use is for 21,500 cattle; commercial use is for a 11,000-head dairy operation.

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

The current diversion works will not change. The wells and measuring devices are already in place and functioning. Any additional measuring devices lockable controlling works will be installed upon Department request.

- b. Who owns the property at the point(s) of diversion? Applicant

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☒ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Rabo Agrifinance LLC, Mortgage holder

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete [Attachment WSB](#).

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

A portion of the irrigated acreage has been dried up to allow for the dairy expansion. Two small pivots will also be retired from irrigation.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

Water rights 61-2186, -2220, -7060, -7222, and -12270 share the same seven wells and diversion system. Rights 61-2186, -2220, and -7060 all currently authorize irrigation on non-overlapping acres within the same PPU. Rights 61-2186, -7222, and -12270 all authorize commercial and stockwater uses for the same dairy.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|--------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☐ | ☒ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe:

This transfer represents a continuation of the expansion of the dairy operation and corresponding reduction of irrigated acres first represented by Transfer 80026, approved in 2016. No expansion or forfeiture has occurred since, but rather a transition over time from irrigation to commercial and stockwater uses.

NOTE: Alfalfa and Bruneau weather station were selected for the Water Balance calculations. The property falls within both the Mountain Home and Bruneau weather station GIS areas, but more property is within the Bruneau station. Recent farming practice on the property has included double-cropping of corn and triticale. ET Idaho does not provide consumptive use (precipitation deficit) estimates for double-cropping so an alternate, reasonable crop (alfalfa) was used. Annual, rather than growing season, precipitation deficit was used to simulate double cropping conditions.

SUBJECT: Applications for Transfer

Dear Scott,

Enclosed on behalf of Sunview Dairy LLC are three Applications for Transfer. The first proposes to change a portion of water right nos. 61-2186 and 61-2220 from irrigation to commercial and stockwater uses. The second and third transfer applications each propose to move a portion of one water right, 61-7276 and 61-11963 respectively, to the same, separate location. I calculate the filing fee as follows:

- Transfer 1 - \$580 for modifying 1.41 cfs (portion of two water rights) + \$250 for changing the nature of use from irrigation to stockwater and commercial,
- Transfer 2 - \$500 to change the place of use for the irrigation use (0.44 cfs),
- Transfer 3 - \$200 to change the place of use for the irrigation use (0.16 cfs).

I have requested a notarized statement from the mortgage holder and will submit that to you when it comes in.

Please let me know if there are any questions.

Sincerely,
HDR|SPF
