   Minimum Payment Acceptable: Current Rental Rate

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.

It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

Good Afternoon Hal,

Thank you for taking the time to speak with me on the phone earlier regarding the points of diversion for the lease applications. As I mentioned on your call the legal description has an error on the quarter- quarter for the well locations. It looks like this error was missed on the past lease applications (see the lease application, attachment 2- description).

To avoid any additional paperwork, I just need to make sure everyone is aware that there is not any well on record associated with the water rights on the lease applications in the SWNW or SWNE quarter-quarter of section 14. It appears the directions are reversed. As you can see in the attached GIS images of the water rights places of use (outlined in bright blue) there are wells (the blue points) located in the NWSW and the NESW of section 14 (see attached image).

If you approve the use of the points of diversion in the NWSW and the NESW [redacted] ection 14 (the blue points on the images attached), then I can move forward processing the application and draft the contracts. If there are different wells that you would like to use instead, we would need attachment 2 re-submitted for any of the water rights purposed for lease.

As I mentioned on my call, if we have the correct well sites on the attached image, I will note the lease files and the points of diversion in NWSW and NESW section 14 can be named on any future lease applications. Please let me know how you would like to proceed.

Thank you for your time and consideration in this matter.

MEMORANDUM FOR APPLICATION # 25[redacted]

To: Water Rights 61-12348, 12349, 12350, 12351, 12352, 12353
From: Bob Howe
Date: 01/12/2023
Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

---

PURPOSE/NARRATIVE: On January 6th, 2023, IDWR received the completed water supply bank lease application with fee payment from J&M Solid Rock for the stacked partial water rights 61-12348 through 61-12353, for 1yr (2023). On January 12th, 2023, after reviewing the application for partial lease and appurtenant water rights documents, I found that the legal description for the points of diversion (PODs) on the purposed lease had the quarter-quarter information reversed. I emailed the lessors and Hal Anderson (named representative) to advise them of the error. On January 13th, 2023, the named representative responded via email agreeing that the points of diversion had somehow been transposed on the legal description in the lease application. After further review of the rental application, and both partial lease applications I found the purposed leases were for the total volume, diversion rate, and acres of the additive water rights. The water rights appurtenant to the purposed lease have conditions stating combined limits of 0.94cfs, 249af, and 62.3 acres. I emailed the applicant and asked that he submit the full water rights for lease, so we can accommodate the rental request received with the leases. On January 14th, 2023, the applicant responded via email to confirm that the lease applications should both be for the full water rights.

AUTHORITY TO FILE: The application for the partial lease of water rights 61-12348 through 61-12353 was signed by Duane Amyx, named member of J&M Solid Rock LLC (confirmed on the ISOS 2022 annual report). According to IDWR records all the water rights submitted in the purposed partial lease are owned by J&M Solid Rock LLC. The current tax lot data names the applicants as owners of parcel RP01S04E144840, which is the location of the place of use (POU) and points of diversion (POD) for the water rights purposed for lease. There are no concerns regarding the authority to file the application for lease.

WATER RIGHT VALIDITY: Google Earth and GIS imagery were used to confirm that the applicants have idled the pivot within the place of use for the purposed lease. The water rights on the purposed lease have been partially leased into the water bank since 2021. There are no concerns with validity of the water rights and portions offered to the bank.

ENLARGEMENT OF USE: Water rights 61-12280 through 61-12258 were split in 2020 into water rights 61-12348 through 61-126353. The current water rights purposed for partial lease are stacked and cannot exceed the combined flow and volume limits stated on the appurtenant water rights. Rights 61-12348, 61-12349, 61-12350, 61-12351, 61-12352 and 61-12353 when combined shall not exceed a total diversion rate of 0.94cfs, a total annual maximum diversion volume of 249af, a total annual maximum consumptive use volume of 184 af, and the irrigation of 62.3 acres in a single irrigation season. There are no concerns regarding enlargement if the full water rights are offered to the bank.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The locations of the purposed lease PODs are within Water district #161, the Mountain Home GWMA and CGMA-Cinder Cone Butte, in which all ground water rights are administered. On January XXth, 2013, Water District Watermaster, Ed Van Etten, was sent a comment request email with an attached copy of the purposed lease contract, map , and lease application. Mackenzie,
I have updated the Lease and Rental Applications given your direction. I have updated the spreadsheets and maps as you suggested and also made copies of the first page of the Lease Applications for each water right. You are correct that the Lease/Rental is for the 2023 growing season. The Preston Rental is for the easternmost pivot. Once I get the signed Hudson signature page, I will deliver the updated Applications to IDWR.

Subject: Information Needed - Water Supply Bank Package

Follow Up Flag: Follow up
Due By: Wednesday, January 18, 2023 8:00 AM
Flag Status: Completed

Good afternoon, Hal,

There are clarifications that need to be made on the Water Supply Bank lease/rental package you submitted for Paul & Sheila Hudson, J&M Solid Rock, and Michael Preston. Please see below and respond with the requested information within 14 days.

Lease Application #2544 for Paul Sheila Hudson:

- The rights to be leased have a combined limit of 0.59 cfs, 156 af, and 39.0 acres. The requested amounts for lease/rental were 166.0 af and 41.5 acres. The requested amounts cannot be higher than the combined limit.
- Regarding the above point, it looks like the full amounts of each water right are intended to be leased so that the full combined limit can be rented. Please confirm whether the full amounts of all rights should be leased.
- The map provided identifies approximately 85 acres. Please submit a map identifying at most 39.0 acres to be idled.
- Sheila Hudson and Paul Hudson are both owners of the water right. Sheila will need to sign the applications, or an attachment 1A listing Paul as the designated lessor will need to be submitted. Please provide this documentation within 30 days.
- As stated on the front page of the application, an application is needed for each water right. Please submit applications for each water right. The contents can be the same, but we at least need a copy of the front page for each water right. These can be sent via email and would not require new signatures.

Lease Application #2543 for J&M Solid Rock:

- See point above: one application is needed for each water right.
- I believe this lease is also supposed to be the full water rights so the full combined limit can be rented. Please confirm this.

Rental Application #2542 for Michael Preston

- The requested length was marked as one year, however the leases are for 2023-2024 which is two calendar years. Is the rental supposed to be 2023-2024 as well?
- A map is needed identifying which 101.3 acres will be irrigated under the rental instead of a larger POU.
- If the rental POU is not the easternmost pivot identified in the provided map, permission is needed for irrigation of land owned by 1st Street Property LLC for portions in 01S 04E SEC 23 NESW, NWSW, SENW, SWNW, NENW & NWNW.

Please let me know if you have any questions or clarifications.

Thank you,
