4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. *****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

MEMORANDUM FOR AGREEMENT # 680

To: Water Right No. 63-7755B

From: Skyler Cheever – Water Resource Agent

Date: 11/10/2022

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

The application was sent in by Darling Ingredients Inc. and received on October 31st, 2022. The application did not explicitly designate a leased water right but proposed a rental for the irrigation of 23 acres for 2023 from an existing well. A condition will be added to this agreement limit this 63-35339 and this rental to the irrigation of 78 acres. Two contracts, No's. 882 and 889 were used to fulfill the proposed rental agreement. This is the first time this entity has rented from the water supply bank.

AUTHORITY TO FILE:

The individual who signed the application was Tom Johnson. Mr. Johnson has the authority to file this rental agreement because he was confirmed to be the Regional Vice President through an email conversation with the current Chief Vice President, Patrick McNutt.

INJURY TO OTHER WATER RIGHTS:

The water rights being rented are within the same basin and within the same general area, there are no concerns with the amount of available ground water in that part of Basin 63. There would be no injury to other water rights.

ENLARGEMENT OF USE:

There would not be an enlargement of use at the rental place of use because the proposal follows the historic irrigation standards set in both the leased water right and irrigation rights, 63-12333 and 63-7980, held by the applicant.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The rental point of diversion is located within Basin 63. The Western Regional Manager was contacted on November 10th, 2022. It is assumed that there is no concern if there has been no response.

Hello,

We received Application to Rent Water from the Water Supply Bank (#2479) from Lori Graves on behalf of Darling Ingredients Inc. last week. In my initial processing I was unable to find evidence that Tom L. Johnson has authority to sign for the company. Do you have any documentation showing that Mr. Johnson is the Regional Vice President and/or that he is authorized to sign on behalf of Darling Ingredients Inc? We typically verify the signees through the Secretary of State Business Search or the company's official website, but I could not see that he was listed on either.

Thank you,

Mackenzie Kienholz
