INSTRUCTIONS FOR FILING A REQUEST FOR EXTENSION OF TIME TO SUBMIT PROOF OF BENEFICIAL USE

Every permit to appropriate water is issued with a completion deadline called a proof of beneficial use due date. The permit holder may file a request for extension of time to submit this proof according to Sections 42-204 and 42-218, Idaho Code. See www.idwr.idaho.gov for more information about these statutes. If the development of the water use authorized by your permit is not complete and you need more time to finish the development prior to submitting proof of beneficial use, you may apply for more time as follows:

- Read the following instructions carefully.
- Complete the Request for Extension of Time form.
- Submit the non-refundable filing fee of $50.00 with the Request for Extension of Time form.

The Request for Extension of Time form must state the extent of development that has occurred, the costs incurred, and the reason(s) the work has not been completed. The department may extend the proof due date of a permit when a permit holder is prevented from proceeding with his work for one of the following reasons:

Good cause: You must provide the reason for delay, along with evidence that you have proceeded with due diligence. Evidence of due diligence may include well drilled, pump installed, some acres now irrigated, fish propagation ponds constructed, sprinkler system purchased, etc. Lack of financial resources, the state of the economy or personal illness usually cannot be considered adequate reasons to approve a Request for Extension of Time.

After a permit holder has had five years to develop a permit, usually only one extension of time can be granted for good cause, for up to five more years. If your permitted diversion rate is 2.0 cfs or more or the permitted number of irrigated acres is 100 acres or more, a total of 10 years may be granted for good cause after the initial five year development period allowed.

Government agency action or litigation that qualifies for an extension: You may also receive an extension of time for a lack of required consent or final approval by a government agency (right-of-way, easement, or land classification such as Desert Land Entry or Carey Act) or for litigation related to ownership of the water if it has prevented development of the permit.

When basing your extension on delays caused by a government agency or by litigation, you must provide documentation to establish the time-period that development was delayed. The department can only extend the development period of a permit for the actual time a government agency or litigation delayed your development based on the evidence of delay submitted with the request for extension of time. If no documentation is provided, the department will review the request based on good cause.

Additional basis for granting an extension: The water project is of a large scale -- storage of more than 10,000 acre-feet, or diversion of more than 25,000 acre-feet in one irrigation season for an irrigation project of at least 5,000 acres; or when the water right permit is held by the United States of America. A written explanation for these requests must be submitted.

NOTE: In no case should a Proof of Beneficial Use form and a Request for Extension of Time form both be submitted. If your water development project is complete, the proof of beneficial use form should be completed and filed. If the project has not been initiated and does not fit into any of the exceptions listed above, then neither form should be filed with the department. The permit will lapse and shall become of no further force nor effect.

7. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
8. The waste water diverted under this right is subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place of use or manner of wasting it, or to recapture it.
9. This right does not grant any right-of-way or easement across the land of another.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 12th day of July, 2013.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 63-33741 with the following:

Conditions of Approval

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
3. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
5. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
6. The waste water diverted under this right is subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place of use or manner of wasting it, or to recapture it.
7. This right does not grant any right-of-way or easement across the land of another.

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.

Signed this _____ day of _____, 20____.

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 63-33741

Dear Permit Holder(s):

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov .

If you have any questions concerning the field examination, please contact the Western Region Office of the Department located in Boise at (208) 334-2190.

Sincerely,

Amanda Veibell
Technical Records Specialist

NOTICE: STATEMENT OF COMPLETION DUE

RE: Permit No. 63-33741

IMPORTANT: A response from you is required to maintain the active status of the referenced water right permit. If no response is received from you, the permit will lapse and your authorization to develop and/or use this water right will be cancelled.

Dear Permit Holder(s):

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before **July 01, 2023**. Please complete and return the enclosed Statement of Completion for Submitting Proof of Beneficial Use (proof) if you have completed the water project authorized by your permit. The proof statement must be accompanied by either the appropriate license examination fee or a field examination report prepared by a certified water right examiner.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been delayed by a government agency or by litigation that brings title to the water in question, an extension of time may be granted if appropriate documentation is provided at the time of filing. An extension request must be accompanied by a $50.00 filing fee and signed by the appropriate authorized permit holder(s) or authorized representative with a power of attorney.

Either an acceptable proof or an acceptable extension request must be received by this department on or before the above proof due date. If neither is received, the department will send you a lapse notice and the permit will no longer be of any force or effect.

Sincerely,

Water Rights Section
