DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 765

RECEIVED
SEP 25 2023
Department of Water Resources

This is to certify that:

TETON ISLAND FEEDER CANAL CO
386 N 2400 E
ST ANTHONY, ID 83445

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)	Rate Per Acre (CFS/AC)	Volume Per Acre (AF/AC)
22-288	5/15/1883	TETON RIVER	0.04	18.7	129	0.00	0.15
22-571	6/1/1888	TETON RIVER	0.05	19.5	129	0.00	0.15
22-589B	6/1/1884	TETON RIVER	0.35	146.7	129	0.003	1.14
22-12694	3/1/1883	TETON RIVER	0.16	69.9	129	0.001	0.54
22-12695	5/22/1884	TETON RIVER	1.05	446.2	129	0.008	3.46
22-12696	6/1/1885	TETON RIVER	3.33	451.6	129	0.026	3.50
22-12697	4/1/1898	TETON RIVER	3.19	451.6	129	0.025	3.50
Combined Limit Totals			**8.17**	**451.6**	**129**	**0.018**	**3.50**
Combined Rental Totals			**8.17**	**451.6**	**129**	**0.018**	**3.50**

Term of Rental: This rental agreement shall take effect when all parties have signed it and shall continue in effect until December 31, 2025. Use of rental water shall be authorized as of either the date this rental agreement takes effect or the first day of the rental season of use, in 2023, whichever occurs last.

Annual Rental Fee:

2023 - 2025: $1,038.68 annually

The full fee for the rental of the above-described right(s) is $1,038.68 per year for years 2023 - 2025. The rental fee includes an administrative fee of $1,038.68 per year for years 2023 - 2025. Note that the renter is obligated to pay only the administrative fees associated with the water right(s): 22-288, 22-571, 22-589 B, 22-12694, 22-12695, 22-12696, 22-12697.

An annual payment shall be received by the Department on or before December 31 each year preceding the use of the rented water rights. The agreement will be void if payment is not received by the due date in a given year. Rental fees are non-refundable. To voluntarily terminate the agreement early, notify the Department in writing prior to the rental fee due date.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)
GROUND WATER RECHARGE	8.17	400
Combined Total	8.17	400

**** The authorized water usage reflects a reduction from the water right elements rented, to account for a historic, calculated diversion volume of 3.1 af/ac.***

Detailed water right conditions are attached.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 765

The undersigned renter agrees to use the water rented under this agreement in accordance with the Water Supply Bank rules and in compliance with the limitations and conditions of use described in this agreement:

Rodney Dalling — Signature of Renter
9-22-23 — Date
Rodney Dalling — Printed Name
President — Title

*Title required if signing on behalf of a company or organization or with power of attorney

Having determined that this agreement satisfied the provisions of Idaho Code § 42-1763 and IDAPA 37.02.03.030 (Water Supply Bank Rule 30), for the rental and use of water under the terms and condition herein provided, and none other, I hereby execute this Rental Agreement on behalf of the Idaho Water Resource Board.

By _____ Date 9/25/23

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.

WATER SUPPLY BANK RENTAL AGREEMENT No. 765

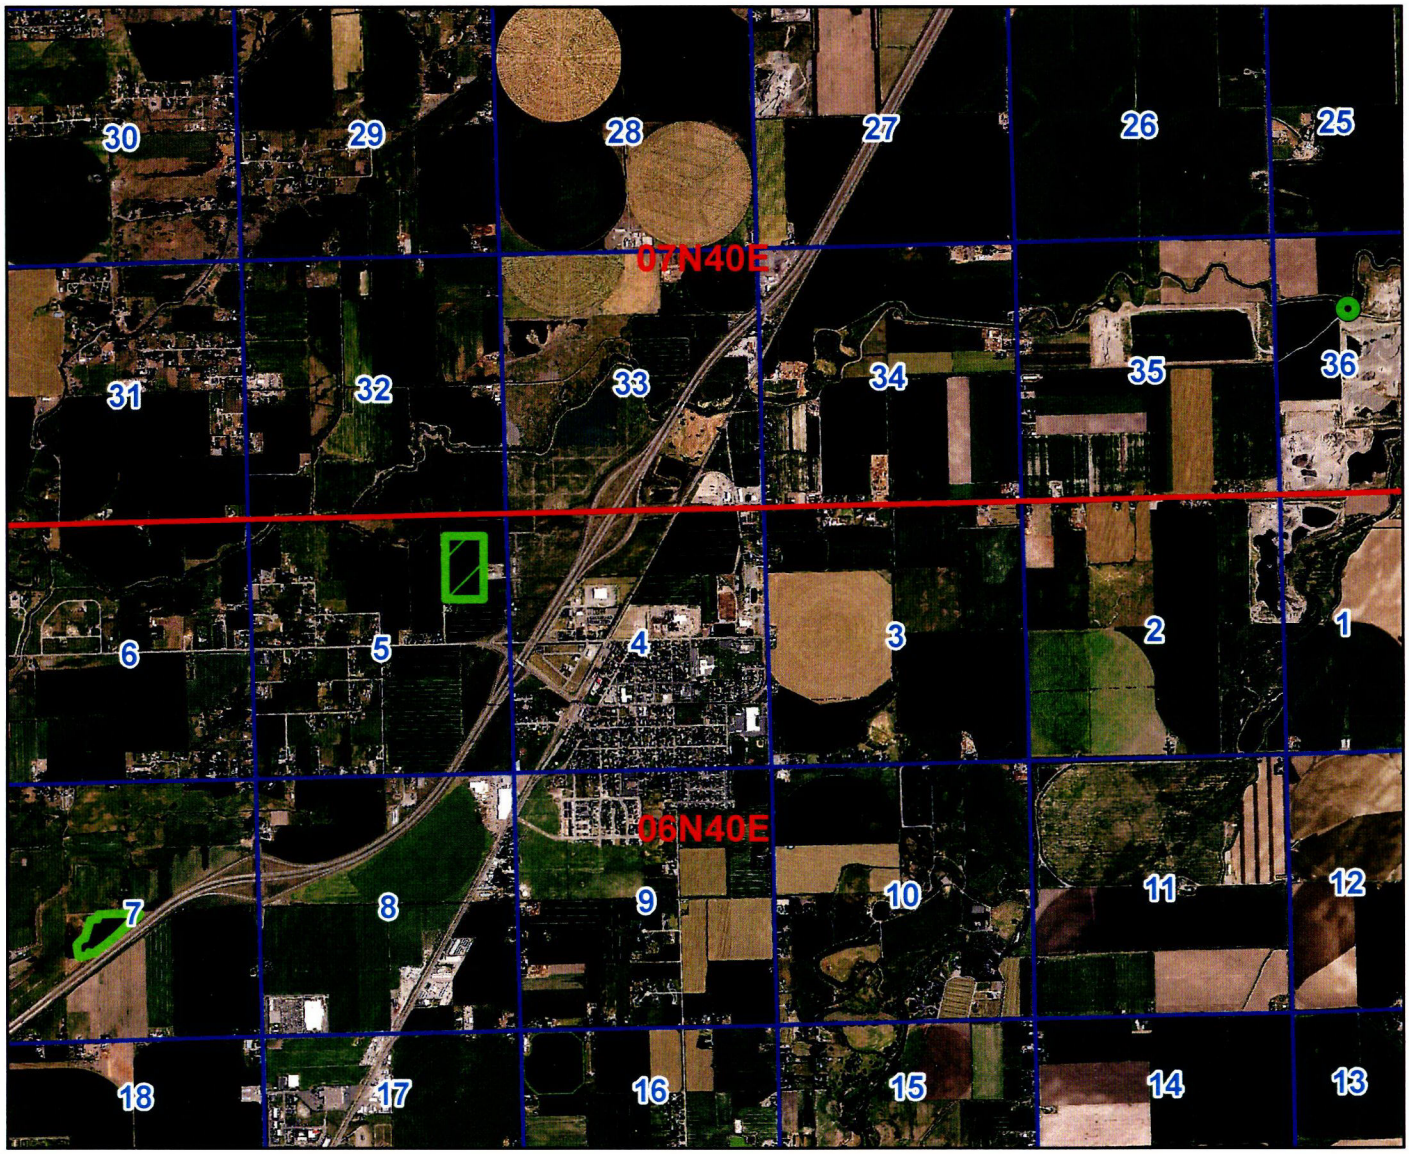

9. The right holder shall notify the watermaster when diversion of water under this rental is required for beneficial use. They shall also notify the watermaster when diversion of water for this beneficial use is no longer required.
10. Water is delivered through Teton Island Feeder Canal.
11. Prior to the diversion and use of water under this approval, the renter shall comply with applicable water quality monitoring and/or permitting requirements administered by the Department of Environmental Quality or the Department of Agriculture.
12. The renter shall record the daily quantity of water diverted for ground water recharge at the rental location places of use and shall report the diversion data for the prior calendar year to the Department by February 1 each year, Reporting shall occur in a manner specified by the Department, consistent with Section 42-701 Idaho Code. To facilitate this reporting requirement, the renter shall install and maintain a totalizing measuring device approved by the Department at each point of diversion and at point where water is delivered from the conveyance system into a designated recharge site.
13. Renter is authorized to deliver water to the rental places of use for ground water recharge only when water is not being delivered to the rental places of use for other, non-recharge related activities. It is anticipated that water for recharge will be delivered to the rental places of use only after active irrigation-related deliveries of water to the rental places of use are concluded, in spring or early summer.
14. Renter will account for and discount from recharge deliveries, water delivered to the rental places of use for irrigation related activities, which is anticipated to occur one day per week, each week, between mid-May and mid-August, annually.
15. This rental is not an authorization for the described recharge effort to be used as mitigation or credit for any other purposes. The sufficiency of the recharge effort authorized under this rental for mitigation or credit for some other purpose may be determined by the Department upon proper submission of a mitigation plan pursuant to the Department's Rules of Conjunctive Management of Surface and Ground Water Resources, a mitigation plan to offset depletions in association with a water right application, a Management Program pursuant to Idaho Code Section 42-14168, or any other proposal to utilize credit for the recharge effort.
16. The water rights rented under this agreement are appurtenant to irrigation of 129 acres.
17. Pursuant to Section 42-234(4), Idaho Code, to ensure that other water rights are not injured by the operations of the recharge projects authorized under this rental, the Director has authority to approve, disapprove, or require alterations in the methods employed to achieve ground water recharge.
18. Pursuant to Section 42-234(3),Idaho Code, the Director may reduce the amount of water that may be diverted for recharge purposes under this rental, even though there is sufficient water to supply the entire amount authorized for this rental.
19. Consistent with Section 42-234(5),Idaho Code, seepage from canals and associated ponds incidental to or coincident with delivery of irrigation water shall not be considered ground water recharge under this rental. Canal seepage will be considered to be ground water recharge only when the canals are not conveying water for irrigation or other beneficial uses.
20. Use of water under this agreement may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, the water rights being rented are within State Water District No. 01.
21. This rental does not grant any right-of-way or easement across the land of another.

APPLICATION TO RENT WATER FROM THE BOARD'S WATER SUPPLY BANK

Applicant Name: Teton Island Feeder Canal Company

Is this application being submitted with a lease application as a lease/rental package? **Yes** ☑ **No** ☐
If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

MINIMUM REQUIREMENT CHECKLIST

Check All Items as Either Attached (Yes) or Not Applicable (N/A)

		Yes	
		☑	Completed *Application to Rent Water from the Board's Water Supply Bank*
		☑	Confirmation that this form has been printed single sided, per requirement of the Water Supply Bank
Attachment	**N/A**	**Yes**	
2		☑	A map showing the proposed point(s) of diversion, place(s) of use, and water diversion and distribution systems proposed to be used with your rental request
3A	☑	☐	Detailed information on a proposed use of rental water
3F	☑	☐	Authorization from the owner/operator of the rental point(s) of diversion
3H	☑	☐	Water modeling to account for the impacts of the rental request
3J	☑	☐	Documents justifying a rate of flow greater than 0.02 cfs/acre
3K	☐	☑	Authorization from the owner/operator of the property at the proposed rental place(s) of use
4B	☑	☐	Explanation of how the rental water will sufficiently accomplish your rental purposes
4C	☑	☐	Explanation of consumptive use amounts for water rights experiencing a change in nature of use

Application to Rent Water (Continued)

1. CONTACT INFORMATION

A. Applicant Teton Island Feeder Canal Company

Mailing Address 386 North 2400 East (Street) St. Anthony (City) Idaho (State) 83445 (Zip Code)

Email Address aaron.fmid@myidahomail.com Phone Number 208-624-3381

B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☑ No ☐

If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.

Representative Aaron Dalling Professional Title 208-624-3381

Organization FMID Relationship to Applicant

Mailing Address PO BOX 15 St. Anthony, Idaho 83445

Email Address aaron.fmid@myidahomail.com Phone Number 208-624-3381

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

We propose to rent our own natural flow water associated with acres that are not currently being irrigated back from the Water Supply Bank and recharge the water into the aquifer.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
63.6 CFS	3517 AF	CFS	AF	AC

* ***Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.***

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
5/1/2023	10/31/2025	☑ 1	☑ 2	☑ 3	☐ 4	☐ 5	☑ Process application as soon as possible	☐ Return application to applicant

* ***The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.***

** ***Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.***

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):
The water will be diverted at the Teton Island Feeder Canal diversion and will be delivered to Sunset Lake, the Palmer Ponds, Madison County Pit and the Cornelison Pond (See attachment 2)

E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
TIFCC Headgate	North Fork Teton River	None

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☑
If yes, include documented consent as **Attachment 3F**.

G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☑
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

H. Has water modeling been provided with your rental request? Yes ☐ N/A ☑
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

☐ Irrigation _____ (number of acres) Duration: Subject to IDWR standard seasons of use

☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)

☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)

☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)

☑ Other: Aquifer Recharge from: 04/01 (mm/dd) to: 10/31 (mm/dd)

J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☑ Yes ☐ No ☐
If yes, justify the rate of flow and attach any supporting documents as **Attachment 3J**. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

K. Do you own the land at the proposed rental place of use (POU)? Yes ☐ No ☑
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it **Attachment 3K**.

L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:
None

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes ☑ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. **If no,** continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request**. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	**Nature of Use**	**Diversion Rate (CFS)**	**Volume (AF)**	**Acres (AC)**		**Diversion Rate (CFS)**	**Volume (AF)**	**Acres (AC)**
22-288	Irrigation	.46	76.1	7.2		.34		
22-571	Irrigation	.48	79.9	7.6		.36		
22-589	Irrigation	3.63	601.8	57.2		2.6		
22-12694	Irrigation	1.73	286.6	27.2		1.3		
22-12695	Irrigation	11.03	1830.1	174		8.2		
22-12696	Irrigation	35.01	5811.9	552.5		26		
22-12697	Irrigation	33.47	5556.0	528.2		24.8		
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					**TOTAL**	63.6		
						CFS	**AF**	**AC**

****Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.***

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes ☑ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

It is proposed the nature of use for the water associated with this lease be changed from irrigation to aquifer recharge for the 3 year term of the lease

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☑ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☐ No ☑
If yes, describe:

C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☑
If yes, describe the date and location of the NOV.

D. Additional Information

DECLARATION

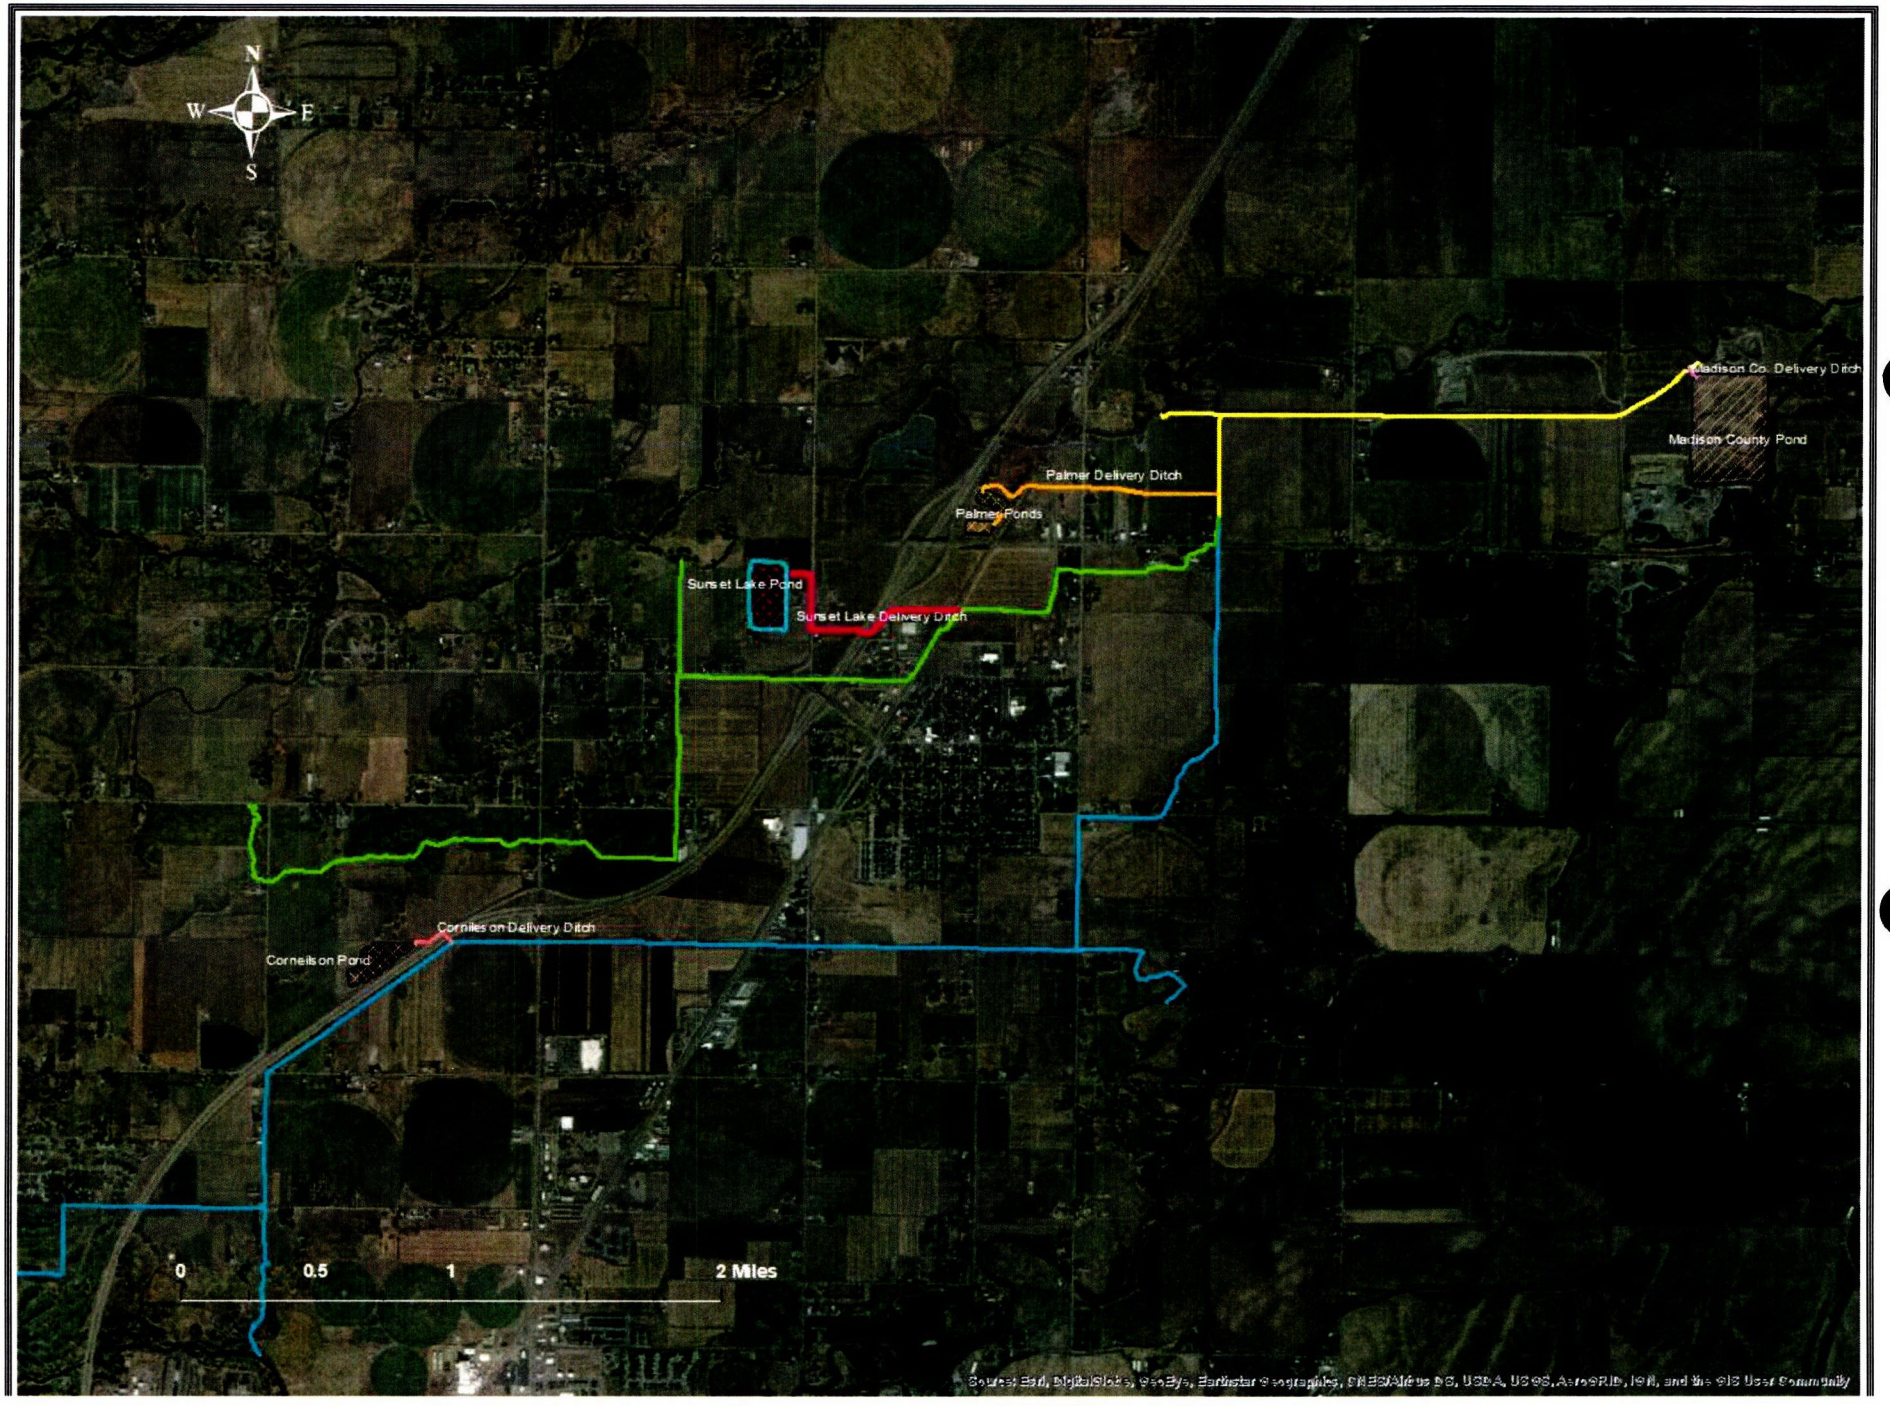

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

AGREEMENT 765

Dear Renter:

Please find enclosed a receipt in the amount of **$1,038.68** and a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of 451.6 acre-feet of water for recharge of 400 acre-feet during 2023. Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Since you are both the lessor and the renter of the right(s), **you are only obligated to pay the 10% administrative fee or $1,038.68** for 2023.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

---

PURPOSE/NARRATIVE: Rental application #2640 was submitted by Aaron Dalling (Freemont-Madison Irrigation District) on behalf of Teton Island Feeder Canal Company (TIFCC) and was received by the Department on 4/3/2023. The applicant proposes to rent their own irrigation rights from the Water Supply Bank for aquifer recharge. Portions of the rights requested are currently being used for the same purpose under rental agreement #489 (2021-2025). This rental will be for the remaining portions of the rights. Rental agreement #489 allows delivery for portions of the same water rights to Sunset Lake and Cornelison Pond for recharge. The POD will not be changing.

No land use permissions were included with the application. This rental originally requested to utilize TIFCC delivery systems to divert water to four total recharge sites: Sunset Lake, the Palmer Ponds, Madison County Pit, and the Cornelison Pond. Updated permission documentation was requested from the representative by review staff. The representative later stated that he was only able to contact one land owner for permission, Sunset Lake Farms, LLC, and they would like to move forward with only the recharge sites they currently have permission for. Permission was granted from the Corneilson's for rental agreement #489 and is assumed to authorize the recharge activity under this rental as well. Therefore, this rental will only include Sunset Lake and Corneilson Pond recharge sites in its POU.

Edit 9/1/2023 MK: On 8/29/2023 Water Rights Supervisor Phill Hummer received an email from Aaron Dalling requesting that the amount rented be reduced to 400 acre-feet. Review staff contacted Mr. Dalling to clarify the amount, and he confirmed that they would like to rent 451.6 af for the use of 400 af. The rental amounts were adjusted accordingly.

AUTHORITY TO FILE: The application was signed by both Rodney and Aaron Dalling. While neither the organizational structure nor managing members are posted for TIFCC, previous review documents for Water Supply Bank applications as well as transfers note that Rodney Dalling is President of TIFCC. The diversion infrastructure that will be used for this rental is the same infrastructure that has historically delivered the water rights and it is in control of the applicant.

The land at the proposed recharge sites which are the rental places of use are not owned by the applicant. The land ownership for each site is as follows:

Sunset Lake Pond:	Sunset Lake Farms, LLC
Corneilson Pond:	Keith and Karen Corneilson

Permission to use both sites was included with the rental application for agreement #489 in 2021. The permission letter from the Corneilson's in 2021 simply authorizes TIFCC to perform recharge at the site without any other stipulations. As this rental will conclude at the same time as agreement #489, it is assumed that this permission is sufficient for this rental application as well. A new permission letter dated May 16, 2023 was received signed by Sherri and Jeff

Parkinson who are listed as authorized members of Sunset Lake Farms, LLC on the most recent IDSOS filing (6/10/2022). No concerns with authority to file.

WATER RIGHT VALIDITY: All seven rights proposed to be rented were decreed in 2010. Refer to Memorandum for Application #1951 which was completed for the associated lease, and which did not find any concerns with validity of the water right portions leased to the Bank. Review of sentinel imagery in 2022 suggests the lessor is complying with lease contract #1364.

INJURY TO OTHER WATER RIGHTS: Similar rentals have occurred since 2019 with no injury concerns. The POD will not be changing. The rights will be diverted using the same TIFCC canal infrastructure through which they are normally diverted, and the recharge sites have historically received water through this infrastructure. No concerns with injury to other water rights.

ENLARGEMENT OF USE: This rental proposes to change the nature of use for the water rights from irrigation to aquifer recharge as has been done through previous rentals for the applicant. This change is approvable granted that the consumptive use and total volume diverted under the rental are not increased from historical values for the leased portions. Lease Contract #1364 (2021-2025) leased 4416 total acre-feet to the Bank. Rental Agreement #489 (2021-2025) is renting 903.2 total acre-feet back for the use of 800 af of recharge. At the time of this lease-rental, IDWR's Hydrology section completed an analysis of the overall and consumptive volumes associated with irrigated acres within TIFCC's service area titled "Determining Irrigation Water Volume Diversions Associated with Lease Contract #1364". This report found that these acres related to a consumptive use value of 2.2 afa/ac and an overall diversion proportion of 3.1 afa/ac. The amounts under Lease Contract #1364, Rental Agreement #489, and this Rental Application #2640 are as follows to account for these values:

Lease Contract #1364

	Rate	Acres	Volume
Leased	79.92	1261.7	4416.0
Rentable for Recharge	79.92	N/A	3911.3

Rental Agreement #489

	Rate	Acres	Volume
Total Rented	16.35	258.1	903.2
Useable for Recharge	16.35	N/A	800.0

Rental Application #2640

	Rate	Acres	Volume
Total Rented	8.17	129	451.6
Useable for Recharge	8.17	N/A	400.0

An evaluation of Sunset Lake and Cornelison Pond was completed in 2019 and found that for the use of the ponds as recharge, there would be a maximum of 64.1 af/year of evaporative losses (the consumptive portion). It is assumed that the losses from these ponds will fall well below the difference between the total rented volume (when considering both rental agreements) and the amounts authorized for recharge (Δ = 401.5 af), and thus the evaporative loss of the ponds is not cause for enlargement concerns.

This rental agreement will include a condition which authorizes delivery for recharge six out of seven days per week as has been done with previous rentals. The historic delivery to the ponds for irrigation is approximately one day per week during the irrigation season, so this use will be allowed to continue without enlargement.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental POD is subject to Water District #01. A request for comments was sent to the WD #01 watermaster and the Eastern Regional Office on 6/1/2023.

Hi Aaron,

It must be a Friday. As soon as I hit send, I noticed that the acres and fee were incorrect on the proposed agreement. Please see the corrected document attached here.

Thank you,
Mackenzie

Aaron,

Please see the attached, updated rental agreement proposal for Teton Island Feeder Canal Co for 2023-2025. I will be out of office next week, but please contact Phill and/or Mary with any questions about the new proposal.

Best,

Mackenzie Kienholz

Hello Aaron,

I would like to clarify a couple things on your request below. Are you requesting to rent a total of 400 acre-feet or to use 400 acre-feet? Renting 400 acre-feet would be equivalent to an allowed use of about 354 acre-feet, allowed diversion rate of about 7.2 cfs, and a cost of $920.00. In order to use 400 acre-feet for recharge, you would need to rent about 452 acre-feet. This would equate to an allowed diversion rate of about 8.2 cfs and cost of $1,038.71. Please note that we cannot reduce only one component of a water right (ie the volume) without also reducing the other components (ie the diversion rate). If you would like to reduce the volume as described in one of the options above, the rate will also be proportionately reduced.

Please let me know how you would like to move forward with this request, or feel free to call or email me with any questions.

Thank you,

Hi Phill,

Sorry I'm slow getting back to you on this. It was hard getting the board together during grain harvest. Based on it being late in the year and a few other factors can we reduce the amount of the lease to 400-acre feet and pay the fee based on that amount?

Thanks,

Aaron

Subject: RE: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Mackenzie,

I think we are both on the same page. The problem appears to occur on Tuesday in your example. What may be happening is that Fremont-Madison is delivering the 79.92 cfs to the recharge pond on Tuesday but they aren't decreasing their total diversion from the Teton River at the head of the canal on that day. Therefore, the difference between the 200 cfs and 79.92 cfs continues to be used for irrigation on Tuesday when they are putting 79.92 cfs into the recharge pond and using the remaining 120.08 cfs for irrigation.

Perhaps this is ok. I just wanted to make sure everyone understood that unless the diversion from the Teton River at the head of the canal is reduced by 120.08 cfs on the day they are recharging the 79.92 cfs, the 120.08 cfs will continue to be delivered to the irrigation water rights while the 79.92 cfs is being used for recharge. The current computer accounting program doesn't easily accommodate a reduction to a canal's water rights for only one day of a week throughout the entire irrigation season. It only readily allows continuous reduction for all days of the week beginning on a designated calendar date.

Tony

Subject: RE: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Tony,

I am just not sure how to move forward with this one. On one hand we don't want to approve a rental that isn't able to be properly administered, but on the other hand there is already an active agreement for the same purpose from the same water rights (albeit different amounts), so it doesn't seem justified to deny this one while the other is active. Would there be a way to administer these rentals for 2023 and 2024 while working to adapt the WD 01 accounting software as necessary before any future rentals?

Correct me if I have misunderstood, but currently the full amount of the *unleased* portions of these rights is being delivered, as well as 16.35 cfs of the *leased/rented* portion. Because the recharge (*leased/rented*) amounts can only be used when the irrigation portions (*unleased*) are not being used, this means that there should never be more delivered/used than the equivalent of the *unleased* portions. Instead of delivering the *unleased* irrigation amount, the 16.35 cfs rental amount, and the 63.57 cfs rental amount, could just the irrigation amount be delivered? This would mean that on days they do recharge that more water would be delivered than is used, but at least it wouldn't be an additional amount to what is already authorized under their unleased portions. Please see the hypothetical below.

Hypothetical:
(values for total amounts/unleased amounts are not accurate, they were simply chosen for demonstration purposes)

Total amounts under water rights: 279.92 cfs
Leased (recharge): 79.92 cfs

Unleased (irrigation): 200 cfs
Rental 1: 16.35 cfs
Rental 2: 63.57 cfs

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Amount Delivered	200 cfs	200 cfs	200 cfs	200 cfs	200 cfs	200 cfs	200 cfs
Amount Used	200 cfs	200 cfs	79.92 cfs	200 cfs	200 cfs	200 cfs	200 cfs
Purpose	Irrigation	Irrigation	Recharge	Irrigation	Irrigation	Irrigation	Irrigation

Please let me know your thoughts on this.

Thank you,
Mackenzie

Mackenzie,

The total 16.35 cfs has been delivered to the canal headgate each day of the irrigation season when the rights are in priority without regard to whether or not the rights are being used for recharge purposes.

Subject: RE: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Mackenzie,

Here's the problem the Watermaster faces with the methodology you are suggesting for the delivery of Teton River natural flow to recharge diversions/ponds within the Teton Island Feeder distribution system without distributing any of

the 63.57 cfs for irrigation purposes. [redacted]current computerized water right accoun[redacted] program supplied to the Watermaster by IDWR currently only allows for two possibilities:

1) The Watermaster can assume all 63.57 cfs is being diverted for recharge each day of the week at the Teton Island Feeder headgate when the total diversion at the headgate exceeds 63.37 cfs; Or,
2) The Watermaster can assume zero cfs is being diverted by the Teton Island Feeder for recharge each day of the week, and not deliver any of the 63.57 cfs to the Teton Island Feeder Canal headgate.

Neither choice is a good one because both choices result in an inaccurate delivery of Teton River natural flow. The only way to accommodate an accurate delivery of the recharge water and the delivery to other Teton River natural-flow water rights during the irrigation season is to have the IDWR Hydrology Section modify the computerized water right accounting program to allow the Watermaster to enter a value into the computer program each day during the irrigation season representing how much water is being delivered to the recharge ponds (as reported by Teton Island Feeder or Fremont-Madison) using the 63.37 cfs of water rights……and not deliver any 63.37 cfs (or portion thereof) of natural flow to the Teton Island Feeder headgate when all the 63.37 cfs is not being diverted into the ponds.

The only other alternative using the existing water right accounting program is to create a new RTS file and enter new line-items into the RTS file each day the Teton Island Feeder Canal diverts water into the recharge ponds……which is an unacceptable alternative because it creates a great deal of work for WD1 Staff and would create a huge (overly burdensome) RTS file in the accounting by the end of the irrigation season.

To accommodate the methodology you suggest, in addition to IDWR programming this "special computation" into the existing water right accounting program, either the Teton Island Feeder or Fremont-Madison would need to notify the Watermaster each day (in real time) of the precise amount of the 63.37 cfs being diverted into the recharge ponds so that the Teton River natural flow can be properly apportioned for delivery to all Teton River diversions.

Please discuss this with Matt Anders and Fremont-Madison to see if a new "special computation" can be coded into the existing water right accounting program and the recharge diversion reported each day for accurate delivery of natural flow during the irrigation season to the Teton Island Feeder Canal. Absent any alterations to the computerized water right accounting program, WD1 will be assuming the 63.57 cfs is being used for either recharge or irrigation each day the 63.57 cfs rights are in-priority and the Teton Island Feeder Canal is diverting at least 63.57 cfs.

Tony

Subject: RE: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Tony,

The specific 63.57 cfs authorized under this rental should only be used for recharge purposes. Water can still be diverted to the ponds for irrigation purposes during times when recharge water is not being delivered to the ponds, under water use authorizations separate from rental agreement 2640, and it is anticipated that this will happen one day per week. Any water diverted to the ponds for irrigation should not come from this 63.57 cfs, and any such irrigation deliveries to the ponds should be discounted from recharge measurements. In short, the second scenario you mentioned would be correct.

Thank you,

Mackenzie

Subject: RE: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Mackenzie,

One thing that always confuses me about these applications is whether WD1 assumes the 63.57 cfs is to be delivered to the canal headgate each and every day Teton Island Feeder is diverting water….in other words…..Teton Island Feeder can use the 63.57 cfs for either irrigation or recharge, as they decide. Or….are the 63.57 cfs of water rights exclusively available to be used only for recharge purposes on only the days and amounts documented by Teton Island Feeder or Fremont-Madison….in other words…..the 63.57 can't be used for irrigation purposes when the rights are not being used for recharge. Can you tell me which statement is correct?

Subject: Comments Request - WSB Rental 2640 Teton Island Feeder Canal Co

Good morning,

Please see the attached review documents for Water Supply Bank Rental Application #2640 in the name of Teton Island Feeder Canal Co for groundwater recharge. Rental Agreement #489 is currently active and rents a portion of the applicant's own water rights for recharge. This rental is for the same purpose for the remaining portions of the leased rights. Kindly respond with any questions or comments within 10 days.
