4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.12	17.5	5
						CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

The proposed rental water will supplement our well which has a low flow - not enough to water our lawn & camp ground

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

MEMORANDUM FOR AGREEMENT # 724

To: Water Right No(s). 29-11177, 29-11178
From: Skyler Cheever – Water Resource Agent
Date: 2/7/2023
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2576 was sent in by Dean Morris and received on January 27th, 2023. The application proposes to rent contract 1217 from the water supply bank for the irrigation of 3 acres from 2023-2024. The applicant needs water because a well on the property is not providing enough water to fulfill the desired beneficial use. The applicant originally proposed 5 acres of irrigation. However, after phone conversation and email correspondence on February 3rd, 2023, it was found only 3 acres were needed. The point of diversion is within the Snake River Moratorium and Non-Trust Water Area. This is the first time this individual has rented from the water supply bank.

AUTHORITY TO FILE:

Dean Morris signed the application. Mr. Morris has the authority to file this application because he is the current owner of the property in which rental water will be applied. Mr. Morris also has access to the point of diversion on Goodenough Creek as it runs through his property.

INJURY TO OTHER WATER RIGHTS:

The point of diversion is moving less than one mile away from the lease point of diversion. It is unlikely the movement of 3.00 acres of irrigation would injure other water users in between the lease and rental points of diversion. Water is not moving outside of any GWMA or CGWMA's the lease point of diversion was within.

ENLARGEMENT OF USE:

There is a well that currently serves the property. To prevent enlargement, surface water use under this proposal and use under the existing well will be limited to the irrigation to 3 acres. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within Basin 29 and Water District 29H. The Watermaster and Eastern Regional Manager were contacted for comment on February 8th, 2023. Comment was received from the Watermaster on February 8th, 2023, there was no concern with this proposal.

Mr. Morris,

Please see the below image and confirm whether these are the acres you are requesting or if adjustments need to be made.

Thank you,

Subject: Information Needed - Water Supply Bank Rental Application #2576, D Morris

Hello Mr. Morris,

I am completing an initial intake for your Water Supply Bank Rental Application #2576. It looks like the last piece of information I need for now is a more detailed map indicating where the requested 5.0 acres of irrigation will occur. I am attaching an image of your property below. Please either use this or another tool to mark which 5.0 acres you are requesting water for. Once this is complete, I will note that your application is ready for a full review by an agent.

RE: Application to Rent Water from the Board's Water Supply Bank

Mr. Morris,

It was a pleasure to speak with you today. Here is the form that I promised to send.

I have enclosed two rental application forms; two copies in case you want to retain a personal copy of the filing or in case you make a mistake.

Based on our phone conversations today, I have listed the water rights that you were already familiar with on the forms. This morning I also confirmed that portions of the two rights are leased to the bank until December 31, 2024 and that more than sufficient quantities are available for you to rent and use to irrigate a few acres.

You will need to submit the completed form and its attachments, before IDWR can begin to process your request. We have received a high number of Water Supply Bank lease and rental requests this year so it has been a challenge to process them all quickly.

I may not be the person who will be assigned to process your rental application but feel free to contact this office (IDWR's State Office) at 208-287-4800 if you have questions about the form or the process steps.

Sincerely,

A handwritten signature in black ink that reads "Michele Edl".
