4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes ☑ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. **If no,** continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request**. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

						CFS	**AF**	**AC**

****Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.***

Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes ☐ No ☑

Dear Applicant:

The Department of Water Resources acknowledges receipt of your applications to rent water from the Water Supply Bank. **I have enclosed six (6) different Water Supply Bank Rental Agreements for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreements and compliance with the conditions of approval authorize diversion and use of water as provided in the agreements.

Water right numbers in **bold** are assessed the administrative fee only. Fees in **bold** are amounts due. Partial payments were received under receipt C117891 for cancelled Rental Agreements 408 and 753.

A total rental fee of $20,279.10 **per year** was calculated based on the current rental rate of $23.00 per acre-foot times a diversion volume of 631.7 acre-feet, plus an administrative fee only rate of $2.30 per acre-foot times a diversion volume of 2,500 acre-feet, for a total of 3,131.7 acre-feet.

A payment of $8,921.70 under receipt C117891 was received on March 6, 2024, for Rental Agreement IDs 408 and 753. Both rentals were cancelled prior to the beginning of the irrigation season and the rental fees received were requested to be applied to the new rental applications upon approval. The remaining due for the proposed rental agreements listed above for 2024 is **$11,357.40**.

Please send a check in the amount of $11,357.40 for 2024 made payable to the Idaho Department of Water Resources, **together with the signed rental agreements**, **within 14 days** so I can complete processing.

For the $11,357.40 remaining due for 2024, $6,938.64 of the rental fee will be paid to the lessor(s) and $4,418.76 will be retained by the Department to offset administrative costs for **2024.**

Please note the annual rental fee for 2025 is due by December 31, 2024, for the proposed rental agreements listed above, except rental agreement 866 which is a one-year rental. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

---

PURPOSE/NARRATIVE: Application to rent specific ground water rights listed above for the irrigation of 228.5 acres across three pivots in the Eastern Snake Plain Aquifer during 2024 only received on January 8, 2024. Renter has private agreements with lessor and will only be assessed Administrative Fees for this rental of the above listed water rights.

AUTHORITY TO FILE: Application to rent from Farmland Reserve, Inc., was signed by Scott Baird, who is listed as a VP for the company in the 2022 Annual Report filing with the Idaho Secretary of State, and with Greg Sullivan of Brockway Engineering, PLLC., as their representative for the water transactions. Parcels under rental Place of Use (POU) are also in the name of Farmland Reserve, Inc, according to county tax lot data. No concerns with authority to file.

WATER RIGHT VALIDITY: Requested water rights are leased to the bank for five years from 2020 through 2024 and have had consecutive 5-year lease terms since 2013. Rental agreements 408 and 410 were secured for a portion each of these rights for the five years, 2020-2024, but agreement 408 was cancelled by the renter at the end of 2023 when they transferred different rights to that rental POU. The renter requested the same number of acres and water rights from cancelled agreement 408 for this new rental. No concerns with validity.

INJURY TO OTHER WATER RIGHTS: Leased water rights are outside the Trust Area boundary, while the rental PODs are inside the Trust Water boundary. ESPA modeling analysis was provided as part of this rental application. The ETRAN modeling analysis performed during this review confirmed that no mitigation is required and no injury to other water rights are expected from this rental. See 'ESPA Calculations' at end of review memo.

ENLARGEMENT OF USE: Rental POU will be on three different pivots, and all from the same two diversion wells. Existing water rights 35-7632A, 35-14442, 35-14443, 35-14820 currently only provide 90 acres of irrigation on the south pivot. This rental is proposed to complete the south pivot, fully cover the center pivot, and cover approximately 60 percent of the north pivot, for a total of 228.5 acres of irrigation under this rental. Existing water rights from rental POD have standard conditions not to exceed 0.02 cfs per acre and 4 acre-feet per acre.

The water rights requested for rental have been leased into the bank and rented from the bank every year since 2013. During the 2013 and 2016 bank reviews for the lease and rental of these rights, it was noted by the reviewers that while the water rights were established within the Aberdeen Springfield Canal Co service area, and that shares were held by the owners when the rights were established as evident on the original permits and field exams for licensing, that the ground water rights had been used as primary rights historically leading up to the time they were accepted into the bank and then rented. The first lease application in 2013 also noted that shares from Aberdeen Springfield Canal Co., would be re-established and begin to be used on

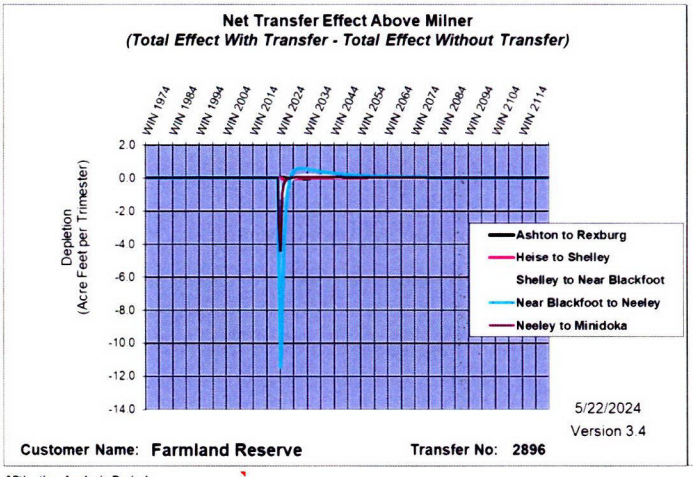

the leased lands while the ground water rights were in the bank. No limiting conditions have been imposed to restrict any of the rentals of these rights to also be used with canal shares, and therefore these leased rights have been used as primary ground water rights through rentals since 2013. No enlargement through the rental of these leased rights at the rental POD is expected.

Good afternoon, Greg,

Since you represent both Northern Ag and Farmland Reserve, would you mind confirming that Northern Ag is not expecting an owner payment of the above listed rights for their rental in 2024 (previously Agreement 408) from Farmland Reserve?

Thank you,
Mary

Re: Rental Agreement 408 and New Rental of 228.5

Dear Ms. Condon:

Farmland Reserve Inc desires to withdraw the rental agreement 408 in which they entered into. Permanent water rights have been transferred to the 228.5 acres identified in rental agreement 408. A new rental application is attached to this letter that will utilize the 228.5 acres at a different POD and new irrigation place of use for the year 2024.

ESPA model analysis for the 2024 irrigation seasons have been run and the calculated river reach impacts do not require mitigation.

Sincerely,

Greg Sullivan, M.S., Engineer
