1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.

10. This rental agreement does not authorize the construction of a well.
11. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 140.
12. Prior to December 31 of each year, the Board may review this rental agreement to determine whether it is consistent with the management plan that may be approved for the Eastern Snake Plain Aquifer Ground Water Management Area ("ESPA GWMA Plan") pursuant to Idaho Code § 42-233b. D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):
Existing wells, mainlines and delivery system.

E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
See Exhibit A	Ground Water	45-2468, 45-7336, 45-7449, 45-7471, et al.

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☑
If yes, include documented consent as **Attachment 3F**.

G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☑ No ☐
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

H. Has water modeling been provided with your rental request? Yes ☑ N/A ☐
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

☑ Irrigation 148.2 (number of acres) Duration: Subject to IDWR standard seasons of use

☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes ☑ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. **If no,** continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request**. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
36-4179	Industrial	4.27				2.22	592	148.2
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	2.22	592	148.2
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

No unconventional duty expected.

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes ☑ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

An amount of 0.015 cfs/acre will be rented from 36-4179 because 36-4179 is a fully consumptive water right.

WATER RIGHT NO(S). 36-4179 AGREEMENT 718

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

MEMORANDUM FOR AGREEMENT # 718

To: Water Right(s) 36-4179

From: Mackenzie Kienholz

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

---

PURPOSE/NARRATIVE: Rental application #2493 was submitted by Greg Sullivan (Brockway Engineering) on behalf of Wickel Land Company, LLP and was received by the Department on 11/10/2022. The application requests to rent 148.2 acres of industrial right 36-4179 which has a priority date of 8/9/1959.

The lease PODs are located in the ESPA GWMA, WD 130, and the Magic Valley GWD. The rental is located within the ESPA GWMA and WD 140. The review memo from previous rental agreement #606, which served the same purpose as this rental, noted that while other water rights were identified as possible options to satisfy the rental, MVGWD preferred that 36-4179 be used.

AUTHORITY TO FILE: The rental application was signed by Jesse Wickel who is listed on the IDSOS annual filing for Wickel Land Company, LLP as the secretary and a partner. All parcels at the proposed rental POU are owned by Wickel Land LLP. Five PODs were listed for the rental. All five are located on parcels owned by Wickel Land Company LLP and only divert right owned by Wickel Land Company LLP. No concerns with authority to file.

WATER RIGHT VALIDITY: A full review of water right validity was completed at the beginning of the current lease period (2022-2026). Right 36-4179 was decreed on 1/15/1998. Documentation provided in previous lease reviews noted that the right was used until 2004. From 2005-2021 under various contracts and now from 2022-2026 the right has been and is currently leased to the Water Supply Bank. No concerns with water right validity.

INJURY TO OTHER WATER RIGHTS: Both the lease POD and four of the five rental PODs are in the Pacific Northwest basin-fill aquifers & unconsolidated sand and gravel aquifers. The fifth rental POD is located on the border of the aforementioned aquifers and igneous and metamorphic-rock aquifers and Snake River Plain basaltic-rock aquifers. Considering the percent error of boundary lines with GIS applications as well as the fact that all lease and rental PODs are within the ESPA GWMA, this one rental POD is not a cause for concern.

Modeling was required for this rental and was completed using ETRAN V3.4. Three of the rental PODs are within the same model grid cell and are relatively central to the two PODs which are in different grid cells, so the row and column values for the shared central grid cell were used for the "To Well". The consumptive use value at the rental location is 3 af/acre annually. As previously mentioned, a greater volume is being rented than will be authorized for use, so data entry was completed as shown below. Modeling found that no mitigation would be required for this rental.

ENLARGEMENT OF USE: Water right 36-4179 is an Industrial right and is considered fully consumptive. The rental PODs are overlapped by rights 45-2329B, 45-2468, 45-7336, 45-13773, 45-7449, 45-7471, 45-14453, 45-14454, 45-14466, 45-14467, 45-14468, 45-14473, and 45-14474 which are all owned by the applicant. The rental POU is only overlapped by 45-7449 which is a stockwater right and Burley Irrigation District rights. In order to prevent enlargement, the amounts authorized for use under the rental agreement will be reduced as shown below from the total volume rented to account for the duty of water of other rights overlapping the rental. The acreage allowed was calculated using the headgate requirement at the rental location (4 acre-feet/acre annually).

	Rate (CFS)	Volume (AF)	Acres	CFS / acre	AF / acre
Rental Amounts	2.22	895	(223.8)	-	-
Authorized for Use	2.22	593	148.2	0.015	4.00

Through this rental, the change in nature of use from industrial to irrigation will also change the season of use. The industrial season of use is 1/1 to 12/31 while the irrigation season of use at the rental location is 3/15 to 11/15. A total of 895 af will be rented, with 593 af being authorized for irrigation use. If the leased right had been used industrially at the original POU, the 895 af would have been used for 12 months giving an average monthly volume of 74.58 af/mo. Through the rental, up to 593 af can be used for 8 months giving an average monthly volume of 74.13 af/mo.

The leased right shares a combined limit with rights 36-8154, 36-2648A, 36-4180, and 36-2729, but this was considered during the lease review, and it was assumed that the other rights were being fully used. The amount of 36-4179 leased reflects the difference between the combined limit and sum of other water rights.

No concerns with enlargement of use.
