4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	1.17	244.0	61.0
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Since you have a private agreement with the water right owner, you are only obligated to pay the 10% administrative fee or \$488.00 for 2022.

Please note, the above rental agreement concludes at the end of **2022**. Once the rental agreement concludes, any diversion or use of water under this rental will no longer be authorized. If you wish to rent water in the future and have not already done so, you can download and complete an Application to Rent Water Rights from the Water Supply Bank by visiting the Department's website at <http://idwr.idaho.gov>.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 43-2489, AGREEMENT 665**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$488.00** was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 244 acre-feet for 2022. Since you have a private agreement with the water right owner, **you are only obligated to pay the 10% administrative fee or \$488.00.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$488.00 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Amanda Johnson-Veibell

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Rental Application #2359 was received by the Department on April 25th, 2022. It was submitted as part of a lease/rental package with Lease Application #2358 from Eagle Creek Northwest LLC and another Rental Application #2360 from ADT Farms LLC, all of which were completed by Greg Sullivan of Brockway Engineering PLLC on behalf of the applicants. ADT Farms and ADTD Farms have been renting this right from Eagle Creek Northwest since 2019. Signed agreements were included with the lease application stating that there are private agreements in place for both rentals, so only an administrative fee should be collected.

This rental is located in Water Districts #43A – Lower Raft River and #143 – Raft River Basin as well as the Raft River Ground Water District and Raft River Critical Ground Water Management Area.

AUTHORITY TO FILE: : The application was signed by Todd Gerratt, who is listed as the registered agent for ADT Farms LLC on the IDSOS Business Search website. The parcel at the rental POU is owned by ADT Farms LLC. Todd Gerratt is the registered agent for both ADT Farms LLC and ADTD Farms LLC, so permission is assumed for use of the land. All the PODs except for two located in 11S 27E 13 are on land owned by ADT Farms LLC or ADTD Farms LLC. The two that aren't are on land owned by Midland Dairy LLC; the majority of rights diverted through these are owned by ADT Farms or ADTD Farms. No concerns with authority to file.

WATER RIGHT VALIDITY: Right 43-2489 was decreed May 4th, 2004. The right had an approved transfer (with an amendment) in 2009 to change the POU and add at least one POD. A second transfer in 2014 changed the POU and an updated 206 map submitted at the request of IDWR staff in 2016 showed the addition of the half pivot previously proposed for lease. Imagery suggests that irrigation has occurred since decree in 2004 without a period of 5 years of non-use resulting in forfeiture.

The proposed lease acres were reviewed using sentinel data from 3/24/2022 to 8/13/2022, and it was determined that the acres have been idled in 2022.

Review of 2021 imagery from March to August 2021 suggests that the leased acres for the previous lease (Lease Contract #1421) in 2021 for the same water right and applicants may have received water application in April, 2021. However, May through the rest of the calendar year showed no application of water on the proposed acres. The application for 2021 was received in August, 2021 and put into effect in October, 2021

As the lease application for 2022 is only for one year, and the acres appear to have been idled in 2022 up to the date of the review, it was recommended by the reviewer that the lease be allowed for 2022. Idleness of acres should continue to be closely analyzed for future leases, especially if a period longer than one year is proposed.

No concerns with validity of the water right and portion offered to the bank.

INJURY TO OTHER WATER RIGHTS: The points of diversion for both the lease and rental are located within the Raft River Critical Groundwater Management Area. As of the time of this review, review staff has no knowledge of any policy regarding the Raft River CGWMA that would prevent or restrict the movement of water or water use proposed in this rental application.

ENLARGEMENT OF USE: The right being rented (43-2489) has combined limits with other rights, however 43-2489 is additive to the total limit and can thus be removed from the suite without any anticipated enlargement. See associated lease review memo for more detail.

Rights 43-2328, 43-2369, 43-2427, 43-2492, 43-2544, 43-4207, 43-4229, 43-2338B, 43-11132B, 43-12986, 43-12987, 43-12989, 43-12990, 43-13034, 43-13068, 43-13620, 43-13621, 43-13622, 43-13623, 43-13624, 43-13625, 43-13626, 43-13627, 43-13628, 43-13629, 43-13630, 43-13631, 43-13632, 43-13633, 43-13671, 43-13672, 43-13673, 43-13674, 43-13675, 43-13676, and 43-13689 overlap the rental POU and are owned by the applicant. These rights have a combined limit of 47.17 cfs, 3,000.7 acres, and 10,527.2 af. This combined limit corresponds to 0.0157 cfs/acre and 3.51 af/acre.

Six other rights owned by Ida Gold Farms overlap the rental POU. 43-2366A, 43-2375A, and 43-2555A have a combined limit of 7.39 cfs, 467 acres, and 1868 af (0.0158 cfs/acre and 4.0 af/acre). 43-2366B, 43-2375B, and 43-2555B include stock water and commercial uses combined to 3.1 cfs and 590 af.

To ensure the rented water is not distributed disproportionately to the water rights already located at the rental POU, the rental amounts were reduced to match the duty of the water right suite owned by the applicant at the rental POU. This reduced rental amounts from 1.17 cfs, 61.0 acres, and 244.0 af to 0.96 cfs, 61.0 acres, and 214 af (0.0157 cfs/acre and 3.51 af/acre after rounding).

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District #43A and #143. A request for comments was sent to watermasters and the Southern Regional Office on 10/6/2022.

RE: APPLICATION 2359 & 2360 TO RENT WATER FROM THE WATER SUPPLY BANK

Dear Applicant:

The Idaho Department of Water Resources (Department) acknowledges receipt of your application(s) to rent water from the Idaho Water Resource Board's Water Supply Bank (Bank) for the irrigation of 61 acres and 64 acres. Filing a Bank rental application does not automatically result in approval.

Before a rental application can be approved, the rental request must be reviewed, a rental agreement must be prepared, the agreement must be approved by the applicant and the Department, and the rental fee must be paid. To maximize the number of rental applications processed while managing competing priorities, the Department begins accepting rental applications on November 1 for use in the next calendar year, and it processes as many applications as it can before the start of the irrigation season in March or April. Once the irrigation season begins, Department staff members are reassigned to address field work and other duties. Consequently, few rental applications are processed after May 1.

Because your application was received near the beginning of the irrigation season, which is now underway, the Department may not be able to process your application prior to the latest possible start date on your application. Your application will remain in the order it was received for review, unless you request it be returned, or the irrigation season ends prior to finalization of a review.

In future years, we encourage you to file your rental applications as soon as possible after November 1 to improve the chances that they will be processed.

Water Supply Bank Processing for application status may be found on the Department's website at <https://idwr.idaho.gov/iwrb/programs/water-supply-bank/reports/>

If you have questions regarding this matter, please contact me at 287-4936.

Sincerely,

Mary Condon
Water Supply Bank Coordinator
