NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

IDWR/Preston

1. Name of Claimant(s)

CASSIE DANFORS TRUST
PO BOX 333
PRESTON ID 83263

Phone: (801) 598-0513

2. Date of Priority: 4/15/1950

3. Source:
UNNAMED STREAM

Trib. to:
MINK CREEK

4. Point of Diversion:

Township	Range	Section	¼ of ¼ of ¼	Lot	County	Type
14S	40E	24	NE NW		FRANKLIN	

5. Description of diverting works:

The spring water naturally drains down the hill and is captured by the pond for distribution through the enclosed pipe system. Historical flood irrigation was replaced with sprinkler irrigation and the use continues today. The pond is used not only for this water right but also to aid in the distribution of our share water. The source is unnamed stream because we do not capture the water until after the spring has developed into a stream.

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION	4/01	10/31	0.62		

7. Total Quantity Appropriated is:

0.62 C.F.S. and/or A.F.A.

8. Non-irrigation uses:

9. Place of use:

IRRIGATION within FRANKLIN County

Township	Range	Section	¼	of	¼	Lot	Acres
14S	40E	13	SW		SW		16
14S	40E	13	SE		SW		0.3
14S	40E	14	NE		SE		0.8
14S	40E	14	SE		SE		9
14S	40E	23	NE		NE		0.9
14S	40E	24	NE		NW		4.5
14S	40E	24	NW		NW		11

Total Acres = 42.5

10. Do you own the property listed above as place of use? Yes

If your answer is no, describe in remarks below the authority you have to claim this water right.

11. Other Water Rights Used:

Consolidated shares also irrigate the described lands and more within the hollow.

12. Remarks:

Priority Date Explanation:

Historically, the water was used to irrigate the lands described in the statutory claim. Throughout time, the system was still used and developed in different ways. In the more recent past, the water was able to irrigate the upper fields. However, due to pressure issues the water is no longer supplying those fields and they are instead used by Consolidated Irrigation water. Now, the water use is more like it was originally in the 1950's supplying the land through sprinkler irrigation. The pond was developed to aid in the distribution of the water but is not a storage pond. See attached affidavit from the previous property owners that describes this history.

Today, this water right is for 31 acres. The map supplied is larger than 31 acres because at the pond, the water is intermingled with Consolidated shares that are also used to irrigate the fields in this hollow in addition to the land described in the map.

13. Basis of Claim: Statutory Claim

14. Signature(s)

(a.) By signing below, I/We acknowledge that I/We have received, read and understand the form entitled "How you will receive notice in the BEAR River Basin Adjudication." (b.) I/We do

_____ do not _____ wish to receive and pay a small annual fee for monthly copies of the docket sheet.

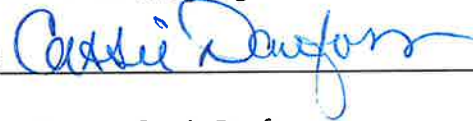

Number of attachments: _____

TO WHOM IT MAY CONCERN,

Pertaining to water right 13-4275 Bryce K. or Carlene T. Egley

06/28/1983 Filed

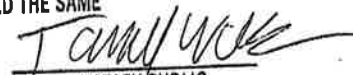

Priority Date 04/15/1950

Water has been used from the Cottonwood Hollow Spring to water acres in Cottonwood Hollow since the 1950's. Originally it was diverted from the creek and flood irrigation was used. In 1982 Bryce Egley built a pond to store and divert water into a mainline which fed two openers and this water was used to irrigate the upper 40 acres in Cottonwood. In 2019 we installed a center pivot to water the upper 40 acres using Consolidated water that had better pressure and extended the pond mainline down the hollow to use that water lower so it would have better pressure. It can now be used on any of the lower 5 risers for irrigating the lower acres and we use consolidated water in the pivot to water the upper acres. We have never metered that water but my best guess is that we have used approximately 50 acre feet of water per season from the pond for irrigation. That pond will easily fill back up 5 or 6 times per season with excess water running down the hollow.
