RE: Point of Diversion

I received a call on 9/29/2023 from claimant, Vivian De Armas, regarding her water rights. Ms. De Armas wanted to ensure that the filing of an Application for Permit by her HOA for their shared well system would not negatively affect her water right claim. She detailed her use of the shared well and the 4 homes currently using it, including hers. Another home will soon be built and connected also. I explained the processes with her, and that that new permit would not likely affect her water right, but that there may be a combined use limit imposed on them as they represent the same water uses from the same source. The shared well is the only water source she uses for domestic purposes, and she described its location to be on the Budworth property, parcel no. RP027740000030A. The parcel number listed at section no. 4 on her claim form was written in error due to confusion, and is actually where her place of use is, and not where the well is. She also confirmed that her home was completed and connected to well in 2021.
