Prepared by: Greg Cooksey, Senior Water Resource Agent, IDWR Northern Region

Water Right #: 97-8930

I decided that rather than amending claim 97-8930 to an earlier priority date and then recommending it without the surface water component, I would assist the claimant in amending 97-8930 to be the irrigation component of the claim since they had already paid the claim fees for this claim with 6.1 acres of irrigation.

I will prepare a new and separate claim for the claimants for domestic use of their well only with the priority date the claimant expressed their intent to use (1997). This will only require the claimant to pay the \$25.00 de minimis fee instead of paying \$57.00 a second time.

New claim number for domestic use of well is 97-9782
