4. If the water rights and/or adjudication claims were split, how did the division occur?
- ☐ The water rights or claims were divided as specifically identified in a deed, contract, or other conveyance document.
- ☐ The water rights or claims were divided proportionately based on the portion of their place(s) of use acquired by the new owner.
5. Date you acquired the water rights and/or claims listed above: 7-13-22
6. Do you own the land identified as the water right place of use? Yes ☒ No ☐
- o If no, attach evidence that written notice of the change of water right ownership has been delivered to the landowner of record.
7. This form must be signed and submitted with the following **REQUIRED** items:

- ☒ A copy of the conveyance document – warranty deed, quitclaim deed, court decree, contract of sale, etc. The conveyance document must include a legal description of the property or description of the water right(s) if no land is conveyed.
- ☐ Plat map, survey map or aerial photograph which clearly shows the place of use and point of diversion for each water right and/or claim listed above (if necessary to clarify division of water rights or complex property descriptions).
- ☐ Filing fee (see instructions for further explanation):
- o \$25 per undivided water right.
- o \$100 per split water right.
- o No fee is required for pending adjudication claims.
- ☐ If water right(s) are leased to the Water Supply Bank AND there are multiple owners, a Lessor Designation form is required.
- ☐ If water right(s) are leased to the Water Supply Bank, the individual owner or designated lessor must complete, sign and submit an IRS Form W-9.

Shared Well and Water Line Agreement

This Shared Well and Water Line Agreement (this "Agreement") is made and entered into the 01 day of February, 2023, by and between **Chris Pattison**, and **Carol Furtado**, the Grantor, whose address is 128 Paddock Drive, Clark Fork, Idaho 83811, and Jeffrey L. McClintock, Trustee of the **McClintock Family Trust**, the Grantee, whose address is 450 Road 32, Clark Fork, Idaho 83811

Recitals

A. The Grantor owns certain real property in Bonner County, Idaho, which is more particularly described as follows:

A lot in Section 3, Township 54 North, Range 3 East, Boise Meridian, Bonner County, Idaho, more specifically described as follows:

Lot 4 Hidden Springs Subdivision in Book 18 of Plats, Page 3, recorded in Bonner County, Idaho as instrument #998568.

The above-described property owned by Grantor is hereinafter referred to as the "Grantor Property."

B. The Grantee owns real property in Bonner County, Idaho, adjacent to the Grantor Property, which is more particularly described as follows:

Three lots in Section 3, Township 54 North, Range 3 East, Boise Meridian, Bonner County, Idaho, more specifically described as follows:

**Lot 1, 2, and 3 Hidden Springs Subdivision in Book 18 of Plats, Page 3,
recorded in Bonner County, Idaho.**

The above-described property owned by the Grantee is hereinafter referred to as the "Grantee Property."

C. The Grantee desires to share a well that will be located on Grantor's property and the Grantor desires to allow the Grantee, its successors and assigns a share of the Well and allow a waterline to access the Grantee's property.

D. The above-described parties therefore wish to formalize a Shared Well and Water Line Agreement, which will govern the specific terms and conditions with respect to the equal sharing of the water and water rights originating on the Grantor's property.

E. It is the intent of this Agreement that a water supply from a Well and waterline distributing the water that service the uses of both the Grantor's property and Grantee's property.

F. The Grantor has agreed to provide to Grantee an easement for repair and maintenance of the waterline and well as described in **Exhibit A** attached hereto and incorporated by reference. This Well provides water for the properties.

Stated Purpose of the Shared Well and Water Line Agreement

The stated purpose of this Shared Well and Water Line Agreement is twofold:

1. To establish an easement through the Grantor's property, thereby providing the Grantee legal access to the shared well source and the waterline to distribute water to the Grantee's property, and
2. To set forth the rights, duties and responsibilities required of each party and their successors and assigns in interest relative to the use, maintenance, replacement, and repair of the well and water line.

Therefore, the parties hereto wish to formalize and memorialize their understanding respecting the terms, conditions, liabilities, and responsibilities with respect to the well and waterline, causing the following terms to be binding upon the parties hereto and appurtenant to and run with the properties described herein. Furthermore, this agreement shall be recorded in the official records of the Bonner County Recorder's office.

Agreement

Now, Therefore, for the reasons set forth in the recitals above and for other good and valuable consideration, the receipt and sufficiency of which is hereby

acknowledged, the parties hereto agree as follows:

1. Existing and Future Water System.

The Grantor and the Grantee shall be entitled to the water available from the Well and shall be considered owned by the parties to this agreement equally. Each party shall independently own their pipe, electrical system, and any pump that services their own property. The purpose for the Well will be to provide water for use of the Grantor's property and of the Grantee's property. Each party shall have the right and privilege of using the Well to satisfy the uses for each property described above.

2. Costs of the Water System.

From the date of the execution of this Agreement, until its termination, it is intended that the parties shall divide evenly the cost of Installation, repairs or replacement of the Well, from its groundwater source through the entire casing of the Well and the well pump. Except as provided below for power costs, the parties shall split evenly all costs of installation, operation, repairs, maintenance, and replacement of the Well and well pump; provided, however, that each party shall bear the expense of repairing, replacing and/or maintaining the waterlines to their respective properties place of use.

3. Management of Water System.

Any unresolved issues pertaining to the use, management and operation of the Well shall be decided and determined by the parties or their successors and assigns in the ownership of their respective properties, provided that this Agreement shall be construed liberally to ensure use of the Well and Well Pump by both parties and their successors or assigns. Without the written consent of both the Grantor and the Grantee, the Well may not be modified from its present location and design as further described in paragraph 5 below. The parties acknowledge and agree that upon the sale, transfer, or assignment of any or any part of the water rights granted herein, that these provisions shall be binding on all successors, heirs, or assigns.

4. Power Costs of Water System.

The parties are responsible for one-half of the electrical cost to run the electrical and pump system of the Well. If the Grantee decides to install its own pump and electrical system in the Well, then the parties will be responsible for their own electrical and pump system that services their respective property. If the parties, their successors or assigns decide to install water meters documenting the use of water for their respective properties, metered water use may be used to determine each party's respective share of electric costs.

5. Waterlines and Easements.

In addition to any other rights granted herein, the parties hereby grant to each other the right of ingress and egress and the right to service, repair, and maintain the Well, Well Pump and associated waterlines so that adequate use of the Well may be facilitated. Such easements shall be perpetual and continue so long as the Well is in use by either party, their successors or assigns. The use of such easement shall be consistent with the operation, servicing, repair, and/or maintenance of the respective systems and with as little damage to the property of the respective property owners as is reasonable under their existing circumstances. The specific easement granted above is more particularly described as follows: See **Exhibit A** attached and incorporated by reference.

6. Temporary Easement.

To accommodate any future necessary repairs or agreed upon improvements to the existing Well and Water Lines a temporary easement shall be granted to the respective parties, as follows: If it becomes necessary to move equipment and materials across the Grantor's property and onto the Grantee's property to enable necessary repairs or agreed upon improvements to the existing Well and waterlines. Except for emergency repairs to maintain the operation of the Well, the establishment of this temporary easement will be agreed to by respective parties in writing 30 days in advance of the initiation of any repairs, improvements, or installations (the approval of which shall not be unreasonably withheld).

7. Appurtenances.

The duties, obligations, the covenants and conditions respective to the operation, management, repairs, replacement and/or maintenance of the Well and associated equipment shall be an appurtenance to and run with the parties' respective properties. These covenants shall be perpetual in character and shall run forever with the land unless changed by the then current landowners. If the Well runs dry or stops producing sufficient water, then the current owners may elect to terminate this Well agreement and the parties would be responsible for providing water to their own properties from another source.

8. Discontinued Use.

Should the Grantor elect to discontinue usage of the Well, such discontinuance shall not affect the rights of the Grantee as to continued usage of the Well, or the continuing duties of the Grantor to allow and cooperate with such usage. Nothing herein shall compel either owner to use the Well and either party may declare in writing, filed in the property records of Bonner County, that they are abandoning all or some of their rights under this Agreement, and by doing so may avoid future liability and future costs; provided, however, that such abandonment

shall not release the property or the owner from any of the easements referenced to herein or any other non-monetary burden imposed hereby that is necessary for the other owner to fully utilize the Well. Abandonment shall not reduce any party's liabilities incurred or accrued prior to such abandonment.

9. Attorney's Fees.

If, and in the event an action is brought to enforce any of the terms and/or covenants of this Agreement, the prevailing party shall be entitled to recover from the other party all costs and expenses including, but not limited to, reasonable attorney's fees, which the prevailing party may incur in such enforcement, or in pursuance of any remedy allowed by law, whether such is incurred by the filing of suit or otherwise.

10. Hold Harmless.

Each of the owners shall hold the other owner hereto harmless for or on account of any damage or injury to property or any person caused by the negligent act or neglect of himself, his servants, employees and/or agents in relationship to or arising out of the use of the Well and/or waterlines and/or easements thereto.

11. Termination.

This Agreement may be terminated, discontinued, or amended in writing at any time by the parties or by their successors in ownership of the land.

12. Default.

This Agreement is made upon the express condition that time and punctuality of performance of conditions are of the essence and a material part of this Agreement, and in the event of failure to comply with the terms and conditions hereof, the non-defaulting party shall have all remedies as may be provided by law. In addition, in the event either property owner shall fail to pay those charges for repairs, maintenance, power or other expenses hereunder promptly when due, the paying party may (upon 30 days written notice) shut off the water to the defaulting party until such amounts are paid. In such event, the defaulting party also agrees to pay the cost of a shut off valve and the labor costs accrued in shutting the water off, in addition to any sums owed for repairs, prior to the restoration of water to the defaulting party.

13. Heirs Personal Representatives and Assigns.

All covenants and agreements herein contained shall extend to and be obligatory upon the heirs, personal representatives, successors and assigns of the respective parties hereto.

14. Designation of Agent.

Each party to this agreement hereby designates the other as agents of the parties to contract for and oversee the repairs and maintenance authorized under this agreement. Each party shall be personally liable for any and all debts contracted by him or her for repairs and maintenance of any of the water works that services solely the property of the contracting party. No party to this Agreement shall have the authority to contract for repairs or maintenance more than \$500.00 without the express, prior written consent of the other parties except in emergency situations or circumstances where a party is unreachable by any reasonable means because of a temporary absence and regular maintenance is required to keep the Well operating. Any party contracting for non-emergency repairs more than \$500.00 shall be solely responsible for all costs incurred more than the \$500.00 limit herein established.

15. Miscellaneous.

(a) The paragraph captions in this Agreement are for convenience only and shall not in anywise limit or be deemed to construe or interpret the terms and provisions hereof.

(b) Whenever the singular number is used in this Agreement and when required by the context, the same shall include the plural, and the masculine gender shall include the feminine and neuter genders and the word persons shall include corporation, firm, partnership, or other form of associates.

(c) This Agreement shall be construed and enforced in accordance with the laws of the State of Idaho.

(d) Any notice or report required under this Agreement shall be sent to the parties at the addresses respectively indicated in this Agreement, unless such addresses change by written notice to each person or entity concerned, in which event the new address given shall be used for the sending of such notice or report. Any required notice shall be made by regular mail, properly addressed and postage prepaid.

(e) This agreement shall constitute the entire agreement between the parties and any prior understanding or representation of any kind preceding the date of this agreement shall not be binding upon either party except to the extent incorporated in this Agreement.

(f) Any modification of this Agreement or additional obligation assumed by any party in connection with this Agreement shall be binding only if evidenced in writing signed by each party or an authorized representative of each party and recorded in the Bonner County Recorder's Office.

(g) The failure of any party to this agreement to insist upon the performance of any of the terms and conditions of this Agreement, or the waiver of any breach of any of the terms and conditions of this Agreement, shall not be construed as thereafter waiving any such terms and conditions, but the same shall continue and remain in full force and effect as if no such forbearance or waiver had occurred.

(h) This Agreement shall be recorded at the Bonner County Recorder's office and shall be deemed to be the shared water agreement of the parties. The recitals, representations and provisions of this Agreement shall be deemed contractual in nature and shall survive the execution of this Agreement.

In Witness Whereof, the parties hereto have executed this Agreement the day and year first set forth above.

Re: Change in Ownership for Water Right No(s): 96-9753 & 96-9754

Dear Water Right Holder(s):

The Department of Water Resources (Department) acknowledges the receipt of correspondence changing ownership of the above referenced water right(s) to you. The Department has modified its records and has enclosed a computer-generated report for you.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing a Notice of Change in Water Right Ownership, the Department does not review the history of water use to determine if the right has been forfeited or deliberately abandoned through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Idaho Code §§ 42-222 and 42-223.

Please note, water right owners are required to report any change of water right ownership and any change of mailing address to the Department within 120 days of the change. Reporting forms are available from any office of the Department, or from the Department's website.

If you have any questions concerning the enclosed information, please contact me at (208) 762-2813.

Sincerely,

Natalie Steading
Tech Records Specialist 1
