ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 11-7592 with the following:

Conditions of Approval

1. Rights 11-7219 and 11-7592 when combined shall not exceed a total diversion rate of 30 cfs for power use.
2. Rights 11-290, 11-7219, and 11-7592 when combined shall not exceed a total diversion rate of 70 cfs.
3. When diverting and using water in connection with this right, the right holder shall maintain an instantaneous minimum bypass flow of 5.0 cfs past the point of diversion for water right 11-7219 on Georgetown Creek. The bypass flow shall be measured at the crested weir located within the SWNE, Section 4, T11S, R44E, B.M., approximately 150 to 200 feet downstream from the point of diversion, or at a point as close as possible to the location of the crested weir if the weir is removed or damaged, or at the location of the replacement measuring device if the crested weir is replaced. Deviations from the measurement location shall be approved in advance in writing by the Department. In determining whether to authorize an alternative measurement location, the Department will consult the USDI Bureau of Land Management and/or the Idaho Department of Fish and Game as the Department deems necessary.
4. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 11.
5. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
6. Use of water under this right shall be non-consumptive.
7. The diversion and use of water for hydropower purposes under this license is subject to review by the Director on or after March 1, 2021. Upon appropriate findings relative to the interest of the public, the Director may cancel all or any part of the use authorized herein and may revise, delete or add conditions under which the right may be exercised.
8. This right does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.
9. The rights for the use of water acquired under this right shall be junior and subordinate to all other rights for the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this right and shall not give rise to any claim against any future rights for the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
10. This right is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this right. Failure to comply with these provisions is cause for immediate cancellation of this right.

State of Idaho
Department of Water Resources
Application for Amendment
(For Licensing Purposes)
Water Right No. 11-7592

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.

Signed this 8th day of November, 2024.
