Subject: Applications for Transfer 82434, 84488 and 84490 (LCSC Enterprises)

Rob,

When you get a chance, could you provide an update on these contested cases. We conducted a status conference for Applications for Transfer 84488 and 84490 in January 2022. During the conference, you said that LCSC was planning on filing offsetting transfer applications to address the mitigation requirements associated with Applications 84488 and 84490. According to my notes, the offsetting applications were to be filed in late-January. As far as I know, the offsetting transfer applications have not yet been filed.

In May 2018, LCSC filed Application for Transfer 82434, proposing to move water right 35-7274 to the property between American Falls and Lake Walcott. My notes from an April 2020 status conference for Application 82434 say that Jason Helms would file an amended application shifting the proposed place of use farther to the east. The amended application has never been filed.

James
