

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Transfer No. 87581

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

AMENDED

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

RECEIVEDName of Applicant(s) Blake Murray

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer. SEP 01 2023

Yes N/A * Means the item is always required and must be included with the application.

- Department of Water Resources
Eastern Region
- ☒ * Completed Application for Transfer of Water Right form, Part 1.
 - ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
 - ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
 - ☒ ☐ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
 - ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
 - ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☒ ☐ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at <https://idwr.idaho.gov/water-rights/transfers/resources/>.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

AMENDED

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1

Name of Applicant(s) Blake Murray Phone (425) 381-3939
Mailing address 6164 Old Orchard Lane, Holladay, UT 84121 Email blakemur@gmail.com

- ☐ If applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign or act on behalf of the applicant. Label it **Attachment #1**.
- ☒ Attach water right ownership documentation if Department records do not show the transfer applicant as the current water right owner. Label it **Attachment #2a**.
- ☐ If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). Label it **Attachment #2b**.
- ☐ Attach documentation of authority to make the proposed change if the applicant is not the water right owner. Label it **Attachment #3**.

Provide contact information below if a consultant, attorney, or any other person is representing the applicant in this transfer process.

☐ No Representative

Name of Representative Katie Salsbury Phone (208) 354-3690
Mailing address PO Box 1115, Driggs, ID 83422 Email katie@intermountainaquatics.com

- ☒ Send all correspondence for this application to the representative and not to the applicant.
OR
- ☐ Send original correspondence to the applicant and copies to the representative.
- ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant.
OR
- ☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant and label it **Attachment #4**.

I hereby assert that no one will be injured by the proposed changes and that the proposed changes do not constitute an enlargement in use of the original right(s). The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

A. PURPOSE OF TRANSFER

- ☐ Change point of diversion
☒ Change nature of use
 ☐ Add diversion point(s)
☒ Change period of use
 ☒ Change place of use
☐ Other _____
- Is this a transfer for changes pursuant to Idaho Code §42-221.O.8?
If yes, ☐ attach an explanation and any supporting documentation labeled as **Part 1A.2**.
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.3**.
Two wetlands will be constructed for Wildlife Storage - necessitating a change of use for both. Both wetlands are located primarily within the Irrigation POU for the existing water right, however the south wetland is a slight change of place of use. No physical change of the point of diversions are proposed.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

AMENDED

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

This can be easily accommodated by incorporation a flume at the POD and lock at the headgate.

No physical changes to existing points of diversion are proposed.

- b. Who owns the property at the point(s) of diversion? Landowner (Blake Murray); Robert F Spetzler Family Trust

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
Historical diversion for this water right.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: N/A

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

16.8 acres of irrigated land will be removed from Irrigation and reverted to dry pasture. 2.3 acres not currently within the water right POU will be converted to Wildlife Storage. Irrigated areas converted to Wildlife Storage will create wetland to benefit wildlife and make the landscape more resilient to fire and climate change. Land now irrigated under the footprint of wetlands will no longer be irrigated.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

No other water rights will be affected by this project.

A stockwater right is also owned under 20-4089 but will not be changed.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|--------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☐ | ☒ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe:

Narrative to Support: **REVISED 8/10/2023**

Application for Transfer of a Portion of Water Right 22-4089

Applicant:

Blake Murray

Property Information:

Township 4N, Range 45E

Sections 20 and 21

Teton County, Idaho

Parcels RPO4N45E210600, RPO4N45E200010

Two shallow wetland features are proposed on land protected by a conservation easement owned by Blake Murray northwest of Victor, Idaho for the purpose of maintaining waterbird habitat and creating recreation opportunities. The features are in an existing flood irrigated hay field and the design intent is to construct two low-profile dikes to retain surface flows to grow wetland vegetation and create mudflats for foraging waterbirds. The property has water rights for stock-water and irrigation, with the irrigation water right 22-4089 for diversion of water from two Unnamed Streams and Elliot Creek for the irrigation of 340 acres. The proposed wetlands have a total surface area of 33.6 acres (19.6 acres for north wetland and 14.0 acres for south wetland). Of the 33.6 acres of land area within the proposed wetlands, 31.3 acres are also within the existing place of use (flood irrigation). The wetlands are designed to be relatively shallow to meet habitat goals, with a storage volume of 62.8 acre-feet (AF) total.

Application for Transfer of Water Right 22-4089 – Evaporation Losses

A portion of water right 22-4089 is proposed to transfer from irrigation to storage in the wetlands to cover evaporation losses during the period of use. The existing water right has a priority date of 4/5/1902 and a period of use from June 15 – September 30. Despite seasonal availability of the water right (shown in Table 1 – data from Water District 1 data for the last 30 years) the conservative calculation of evaporation across the full period of use was used in period IDWR's Pond Loss Calculation spreadsheet (Figure 1).

Table 1: Average Days Available to use Water Right #22-4089

WR #	April	May	June	July	August	September	October	Total Avg Days
22-4089	15	28	25	13	4	4	25	115

Evaporation was calculated to be 33.9 acre-ft annual (AFA) from the 33.6 acres of new wetland area. Also summarized in calculation #1.

Calculation #1: $(307.75 \text{ mm/yr} / 304.8) \times 33.6 \text{ ac} = 33.9 \text{ AFA}$

Figure 1: Evaporation Loss Calculation – from IDWR Pond Loss Spreadsheet

Evaporation Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the annual evaporation losses from a pond.

FILE NUMBER 22-4089

REVIEWER Eric August

User Input

Calculated value

Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:

P = Precipitation

ET = Evapotranspiration

P_d = Precipitation deficit

P_d = ET - P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at <X:/Spatial/Climate/ETIdahostations.shp>.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + c) the first subheading "Mean" values.
7. Click the "Paste values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: **Driggs (NWS -- USC00102676)**

Month	mm/day ¹	Days per month	mm/Month
Jan	-0.58	0	0.00
Feb	-0.06	0	0.00
March	0.48	0	0.00
April	1.27	0	0.00
May	1.70	0	0.00
June	3.19	15	47.85
July	3.30	31	102.30
August	3.10	31	96.10
September	2.05	30	61.50
October	0.71	0	0.00
November	-0.29	0	0.00
December	-0.76	0	0.00

Total mm/year = **307.75**

[[mm/yr] ÷ (convert to feet)] X (Surface area of pond, in acres) = Evaporation Loss in Acre Feet

(**307.75** ÷ **304.8**) X **33.60** = **33.9 AFA**

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 103137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

This value is based on the precipitation deficit of Open Water – Shallow Systems, from ET Idaho 2017 (<http://www.kimberly.uidaho.edu/ETIdaho/>), with removal of negative values (see Figure 2).

The land cover at the location of the wetlands is best described as “Grass Hay.” Using that existing land use type and the Driggs weather station, ET Idaho 2017 shows a net irrigation requirement of 612 mm/year, or 2.01 ft/year. Using calculation #2, 16.9 acres of existing irrigation land will be needed to provide the necessary volume of 33.9 AFA to account for evaporation losses.

$$\text{Calculation \#2: } 33.9 \text{ AFA} / 2.01 \text{ ft/yr} = 16.9 \text{ acres per year}$$

Application for Transfer of Water Right 22-4089 – Annual Fill

Based on hydrologic conditions at the proposed wetland sites, an annual fill is expected each year. Therefore, this water right transfer will account for using irrigation water to fill the wetlands each year. The annual fill of the wetlands will require 62.8 AF.

The full 62.8 AF volume will be balanced by transfer of 62.8 AF from a portion of water right 22-4089. The area required for non-use is calculated with the same equation as #2 above and based on the historical consumptive use of “Grass Hay.” ET Idaho 2017, shows a net irrigation requirement of 612 mm/yr, or 2.01 ft/yr. To balance the volume needed for annual fill, calculation #3 shows that it would require transfer of 31.2 acres of irrigation water rights.

$$\text{Calculation \#3: } 62.8 \text{ AF} / 2.01 \text{ ft/yr} = 31.2 \text{ acres}$$

Summary

There are two shallow wetlands proposed that total 33.6 acres. They are mostly contained within an area of current irrigation, for areas outside of irrigation, a change in place of use is also sought as explained in the transfer application.

The wetlands' annual fill of 62.8 AF is proposed to be transferred from water right 22-4089 by removing 31.2 acres of irrigation area. Supply to maintain levels in the wetlands and mitigate evaporation will be provided through an additional transferred portion of water right 22-4089 by removing an extra 16.9 acres. In total, this transfer application proposes to retire 48.1 acres from irrigation. Of the 33.6 acres of land area within the proposed wetlands, 31.3 acres are also within the existing place of use (irrigation). These 31.3 acres will be retired from irrigation, with an additional 16.8-acre section of land north and west of the wetland footprint also retired from irrigation.

CAUTION: This email originated outside the State of Idaho network. Verify links and attachments BEFORE you click or open, even if you recognize and/or trust the sender. Contact your agency service desk with any concerns.

The attached Application for Transfer is a revised submittal for 87581. Hard copies have been sent my mail.

The following revisions were made to the applications after an Informal Settlement Conference held on June 6, 2023:

- Application for Permit 22-14534 is voluntary withdrawn.
- Application for Transfer 87581 has been revised to add an annual fill of the wetlands (62.8 AF per year).
- Application for Transfer 87581 has been revised to limit the period of use to match the existing water right for evaporation loss calculations.
- Application for Transfer 87581 has been revised by changing the existing land use from "Grass Pasture – low management" to "Grass Hay" and describing the proposed land use as "wetlands" instead of "ponds" based on the proposed depths.

Please let us know of any questions.

Thank you, Eric
