My response to this protest is quite clear. My property is over a mile down stream from the protester's diversion. For years he has been taking most of the water to irrigate his property leaving me with maybe a trickle even though my 1904 rights probably trump his. I should get approximately 16,000 gallons per day. He just wants my water. Also, the ditch which was available to deliver my water, if there ever was any left, was modified by a new land owner and effectively eliminated any chance for me to get water without flooding his property. I have no other choice than to pump water from the Salmon River diversion that I requested. I am leaving the state in two weeks for about six months. I can do a conference call to get this resolved. Most any time should be fine.
Thank you.
