

MEMORANDUM

Date: May 15, 2024
To: Transfer 88871
From: Ryan Tracy
Re: Review & Evaluation of Sufficiency of Information

The purpose of this transfer is to change the existing point of diversion and add a new point of diversion for water right 22-2293. The current point of diversion is described to the 10-acre tract (NWSWSE). This transfer seeks to describe the current point of diversion to the 40-acre tract (SWSE). The physical location of the current point of diversion is not changing. The applicant is proposing to drill one new well located in Lot 7 (SWSW), Section 6, 07N, 42E.

Authority to File:

The applicant is the current water right holder of record. Fremont County tax lot data shows the applicant as the owner of the proposed point of diversions. The applicant has authority to make the change.

Water Right Validity:

The right included in this transfer was decreed in the SRBA in 2008. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

The current and proposed point(s) of diversion are within WD 100. These diversions are within adjacent ESPA model grid cells. No ESPA analysis required. Other rights will not be injured by the proposed change. The quantity authorized to be diverted will not change as a result of this transfer. The water master was notified and did not oppose the transfer. The transfer was advertised without protest.

Enlargement of Use:

The proposed change does not appear to result in enlargement because neither rate nor volume nor irrigated acreage will increase as a result of this transfer.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
