Jake,

A year ago, we met to review the Shaw Capital water rights on Willow Creek. I helped you prepare transfer applications to update some of the water rights. One month ago, you filed three transfer applications. Two of the applications are close to being finalized. We are just waiting on comments from the watermasters. The other application proposes to split water rights 25-61B and 25-138A, which are currently in the name of Wallace and Leona Reed. You own 86 acres of the combined 110 acres described on those rights. Jesse Weeks owns the other 24 acres. As I started to prepare that application for public notice, I discovered an error in the application. In multiple places the acres being updated are transposed. Instead of describing your portion as 86 acres, the application lists 68 acres. In addition, the split rates were calculated based on 68 acres rather than 86 acres. Your portion of the combined water rights should be 86 acres (2.53 cfs) rather than 68 acres (2.00 cfs). I apologize for the errors.

The attached application corrects the errors. If the amended application accurately describes the changes you would like to make to water rights 25-61B and 25-138A, please sign the attached application and email me a copy of the signature page (page 2). Because the amended transfer application increases the amount of water moved to your pump station, the filing fee is higher. The filing fee for a transfer application moving 2.53 cfs is \$660 rather than the \$580 associated with the 2.00 cfs transfer. When you get a chance, please drop off a check for the additional filing fee (\$80).

You are also proposing to update the ownership records for your portion of water rights 25-61B and 25-138A. The ownership records will be updated immediately after the transfer approval.

Jake,

Attached are the applications we discussed when you were in the office a couple of weeks ago.

Transfer App 1 proposes to change the place of use and point of diversion for water rights 25-136A and 25-137A. The map shows the proposed point of diversion and place of use in pink. I was able to find the deeds to address the ownership questions with the Longfellow and Parkinson properties.

Transfer App 2 proposes to change the point of diversion and place of use for an 86-acre portion of water rights 25-61B and 25-138A. The point of diversion would be the W Reed pump at the north end of your property. The remaining portion of the rights (24 acres) would remain on the Weeks property and would continue to be diverted from the pumps near the Weeks property.

Transfer App 3 proposed to rearrange the place of use for ground water right 25-7563. The proposed place of use covers the two wiper pivots, but also extends onto some of the farmed acres east of the pivots.

Please review the draft applications and the responses to all the questions. Make any revisions you feel are appropriate. If the applications accurately describe the changes you would like to make to the water rights, please sign the applications and drop them off at our office. The filing fees are based on the amount of water being moved. The filing fee for Transfer App 1 would be \$250 (\$200 for the transfer app, \$50 for the ownership changes). The filing fee for Transfer App 2 would be \$630 (\$580 for the transfer app, \$50 for the ownership changes). The filing fee for Transfer App 3 would be \$525 (\$500 for the transfer app, \$25 for the ownership change). Total filing fees are \$1405. This can be paid in a single check or by card when you drop off the applications.

Feel free to call me if you have any questions.
