Scott Hayes Water Right Transfers Narrative

These two Applications for Transfer (The Applications) are a coordinated effort between the water right owner (Scott Hayes), Custer Soil and Water Conservation District (CSWCD), and Idaho Water Resource Board's (IWRB) Water Transactions Program with a goal of improving flow in the Pahsimeroi River below diversion P-12. After completion of the water right tasks, a 2-cfs combined portion of two Pahsimeroi River water rights will be left undiverted at P-12, improving river flow and aquatic habitat. The "Conservation Transfer" application changes rights 73-78, 73-116, and a portion of 63-10028. The "Pivots Transfer" application changes 73-79 and the remaining portion of 63-10028.

CONSERVATION TRANSFER **THIS APPLICATION**

One Application changes the place of use of three water rights. Water rights 73-78 and 73-116, with sources Patterson Creek and Pahsimeroi River, are diverted at P-12. These rights are currently associated with 97.2 acres irrigated by center-pivots that cover 266 total acres. The place of use of these rights will change to lands currently not irrigated, where approximately 2 cfs / 55.5 acres will subsequently be enrolled in IWRB's Water Supply Bank (WSB) to be left dry, and 1.5 cfs / 41.7 acres will be irrigated.

A 0.84 cfs / 70-acre portion of groundwater right 73-10028 overlaps water rights 73-78 and 73-116. The supplemental portion of this groundwater right has a duty of 0.012 cfs per acre. A 41.7-acre portion of this right will remain with the land to be irrigated while a $70 - 41.7 = 28.3$ -acre portion will be enrolled in the WSB. See the Overlap Analysis spreadsheet accompanying The Application.

Transfer Application Fee = \$820 based on 4.34 cfs

PIVOTS TRANSFER

Water right 73-79, diverted from Lawson Creek, authorizes irrigation of 160 acres within a 282-acre place of use. The place of use will be re-defined to identify the 266-acres irrigated by center pivots. A 206 map will be provided to specify the 160 acres planned for irrigation under this right.

A 1.67 cfs / 140-acre portion of groundwater right 73-10028 overlaps water right 73-79. The place of use will be re-defined to identify the 266 acres irrigated by center pivots. A 206 map will be provided to specify the 140 acres planned for irrigation.

A 0.14 cfs / 7-acre portion of groundwater right 73-10028 does not overlap other rights. The place of use will be re-defined to identify the 266 acres irrigated by center pivots. A 206 map will be provided to specify the 7 acres planned for irrigation.

The Application will result in $266 - 160 - 7 = 99$ acres of land currently irrigated with the pivot systems without water right coverage. An Application for Permit will be submitted to appropriate groundwater as a primary supply for 99 acres and a supplemental supply for 20 acres.

Transfer Application Fee = \$900 based on 5.01 cfs

Explanation

Rights 73-78 & 73-116 describe a specific 97.2-acre place of use

Right 73-79 describes a 160-acre annual limit within a larger 282-acre place of use. A 59-acre portion of the 282-acre place of use overlaps 73-78 & 73-116 place of use, yielding 223 acres without overlap of 73-78 & 73-116. The 223 non-overlapping portion is greater than the 160-acre limit. A transfer moving 73-78 & 73-116 off of overlapping places of use will not cause enlargement of either set of rights.

Right 73-10028 describes 140 acres overlapping 73-79, 70 acres overlapping 73-78 & 73-116, and 7 non-overlapping acres.
