Subject: Transfer 89215

Christinia:

The transfer application 89215 states that the measuring device will be the fish screen, pending approval from IDFG. IDFG does not approve the use of our fish screens in this manner. The fish screen is held under a IDFG easement, and we do not wish to have any private measuring device attached to our structure. If anyone has any questions, please don't hesitate to contact I or Paddy Murphy of the Fish Screen program.

Sincerely,

Jeff Richards
