

## MEMORANDUM

**Date:** August 30, 2024  
**To:** Transfer 89293  
**From:** Christian Stewart  
**Re:** Review & Evaluation of Sufficiency of Information

This transfer proposes to modify the place of use for water rights 13-227, 13-314 and 13-2161. The change will accommodate the installation of a center pivot.

Authority to File: Applicants, Randy and Jill Wanner, are the owners of record for water rights 13-2161, 13-314, and 13-227. Randy and Jill Wanner own a portion of the current and proposed place of use. The remaining portion is owned by Parker and Alexis Haviland. Parker and Alexis Haviland sent a letter consenting to the transfer and Randy and Jill Wanner signed the transfer application.

Water Right Validity: Water rights 13-2161, 13-314, and 13-227 were decreed on 5/21/1981. All three water rights were involved in Transfer 84243, which was approved on 10/20/2020. Since 2020, aerial imagery shows irrigation and cultivation on the place of use.

Injury to Other Water Rights: No injury issues identified. Points of diversion will not change. Watermaster for Water District 13A was notified of the application and did not provide comment.

Enlargement of Use: The new portion of the proposed place of use appears to be cultivated dryland agriculture in satellite imagery during 2021 and 2023. The new portion of the proposed place of use does not have any appurtenant water rights or Cub River Irrigation Co. shares. There are no active claims or recommendations on the current or proposed place of use. The authorized acreage for the water rights will not increase. No enlargement issues identified.

Local Public Interest / Beneficial Use: No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
