James,

I initially forgot that 34-2424B was excluded as well. When I sent my map to you, I forgot to remove that water right pou from the permissible place of use. I have corrected my shapefile to reflect that.

I have also attached the shapefile for the ground water acres. Let me know if you need anything else.

Thanks.

SUPPORT DATA

IN FILE # 34-170

Cefalo, James

From: Cefalo, James
Sent: Friday, June 7, 2024 10:38 AM
To: luke@minicassialaw.com
Subject: RE: Elaine Sorensen 2024 Irrigated Acres

Luke,

As I updated the map shapes, I discovered some errors.

First, ground water right 34-2424B is not part of the permissible place of use. In Transfer 84270, water right 34-2424B continued to have a separate place of use in the NE1/4 of Section 5, T04N, R26E. I have corrected the map shape for water right 34-2424B to reflect the place of use description for the right.

Second, Transfer 84270 created two shapefile requirements. The water user is required to identify the 1,721-acre shape to be irrigated by all the combined water rights (excluding 34-2424B). The water user is also required to identify the 1,584.5-acre shape to be irrigated by the ground water rights in the permissible place of use. When you sent the updated shape earlier in the year, I inadvertently copied that shape to all the water rights. I may have wiped out the 1,584.5-acre shape for the ground water rights. When you get a moment, can you send me the 1584.5-acre shape for the ground water rights.

James

James,

We have made a couple of small changes to the shapefile and spreadsheet which I sent you below. Adam will continue to irrigate a couple of corners with surface water as long as it is in priority. I have added that ground to the map, shapefile, and spreadsheet and attached new versions of those three files for you. If you have any questions, do not hesitate to contact me.

Thanks.

James,

You will recall that back in 2020 I filed an Application for Transfer for Elaine Sorensen creating a permissible place of use for several of her water rights. That application was approved in 2021. The approved transfer allows the Sorensens to irrigate 1,721 acres within a 2,478-acre permissible place of

use. One of the conditions of the approval was that the Sorensens must submit a new land list and GIS shapefile whenever they plan to change their irrigated acres. Attached is a new land list, map, and shapefile for the acres that the Sorensens plan to irrigate in 2024. They have added a small pivot on the north end of the ppu in section 27 of 4N, 25E. They will dry up several corners in sections 34 and 35 to allow for the new pivot. If you have any questions or need any additional information, do not hesitate to contact me.

Thanks.
