James,

Borah Peak Farms, LLC, through their lessee, Pancheri Inc., would like to reconfigure the irrigated acres within their PPU starting in the 2024 irrigation season. This pertains to the water right numbers as described in the following condition:

Water rights 33-17A, 33-18A, 33-19A, 33-20A, 33-21A, 33-22A, 33-31D, 33-31H, 33-90D, 33-91D, 33-2103, 33-2107, 33-10073, 33-10074, 33-10984, 33-10985 and 33-7183 are limited to the irrigation of a specific 1,473 acres within the within the 1,754 acre place of use authorized by this right in a single irrigation season. The specific 1,473 acres to be irrigated by the right holder are shown in the electronic shape file associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 1,473 acres to be irrigated within the 1,754 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.

Mainly, they propose to dry up corners under hand lines and irrigate different acres under a pivot. Attached is a map and a shapefile of the proposed irrigated acres. Irrigated acres total 1,473, which is the combined acre limit of this group of rights.

Please let us know if there are any concerns with this change in the irrigated acres. And please confirm receipt of this email.

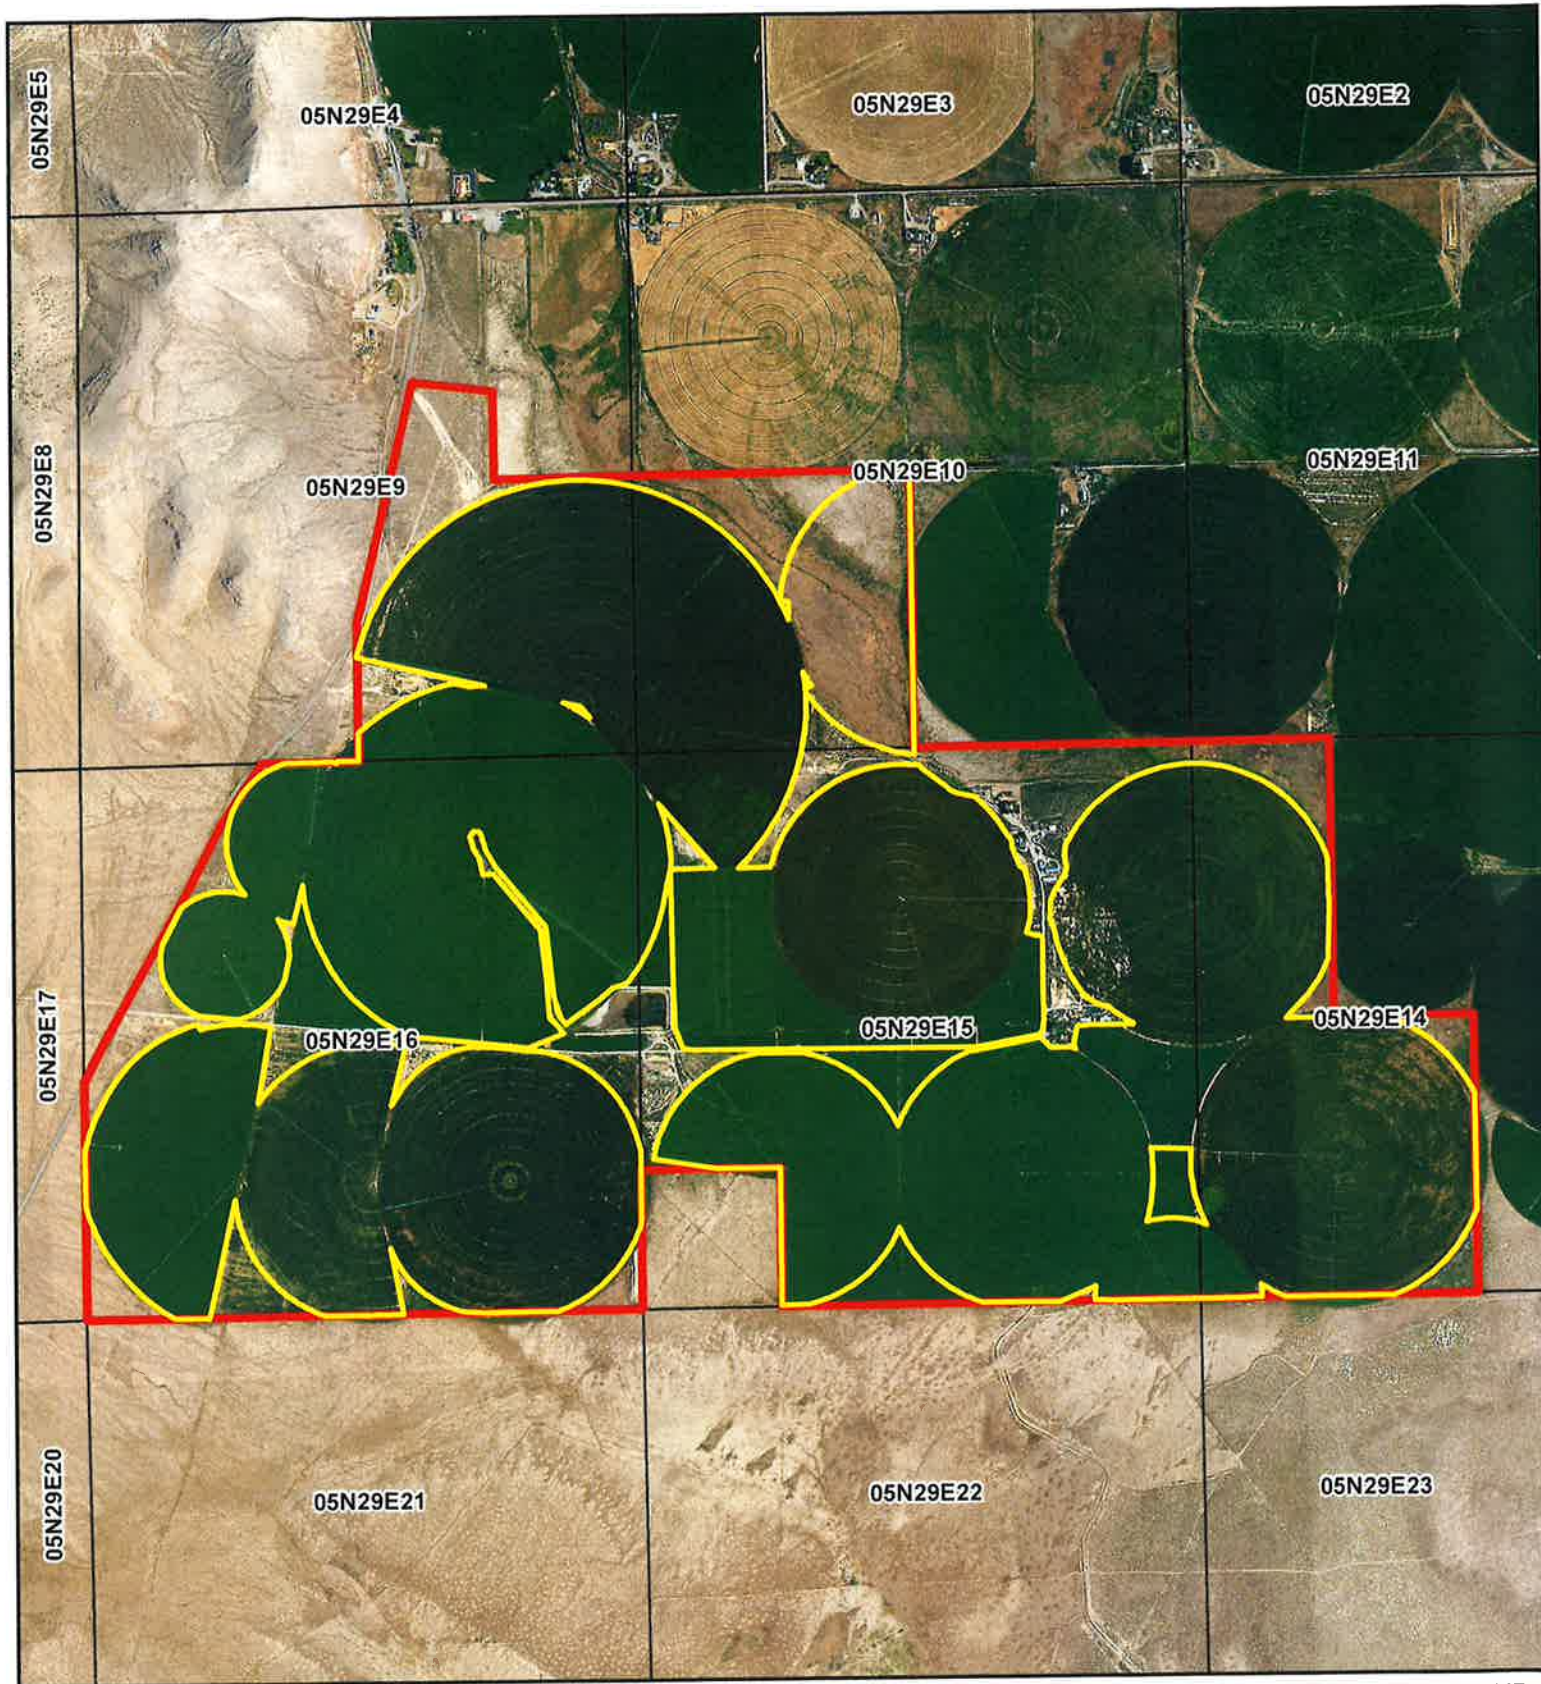

Thank you,

Kristin Moore
