Subject: RE: City of Hailey POU

Lori,

Thank you for sending the new service area boundary shape. I was able to get all the city's municipal rights updated to this shape this morning. As we discussed yesterday, Transfer # 88534, which added all the city's existing municipal wells plus the new well to be drilled as authorized points of diversion to all the city's existing municipal groundwater rights, was approved earlier this week. The service area boundary has been updated this morning so this transfer approval and associated documents should be in next week's mail.

Transfer # 88292 which took irrigation groundwater water right 37-22019 and changed it to municipal use from the system of wells described by Transfer #88534 is currently on hold. The application has been processed and advertised with no protests received. However, as we discussed, the city has leased water right 37-22019 to the Water Supply Bank through 12/31/2025 (see lease contract # 1273). This right is involved with numerous active rental agreements through the Water Supply Bank. IDWR has placed the final processing (approval) of Transfer #88292 on hold until right 37-22019 is released from the Water Supply Bank.

Hopefully, this provides some documentation where we are with the City of Hailey transfers. I will place a copy of this e-mail in the transfer files for future reference in case someone else picks this up in the future.

Corey
