Subject: Request for refund of fees

Good Afternoon-

On April 10, 2023, our office received a group of water right transfer applications for several farms in the Eastern Magic Valley area. We processed and advertised two of the transfers, and, at that point, the representative contacted our office and asked that all processing of the applications cease. On June 17 of this year, we received *Withdrawal of Application for Transfer of Water Right* forms for all the applications, and requests for refunds of the fees. We cannot refund the fees for the two applications that were advertised, but can for the others. The two that were advertised were: Transfer #87808 (right 36-16554), \$500.00 fee, and Transfer #87825 (rights 36-7193 and 36-2123), \$500.00 fee.

The total fee paid was \$6240.00 and the non-refundable portion was \$1000.00, so a refund of \$5240.00 is due to Brockway Engineering, PLLC of Twin Falls. They paid the fees with check #17397 and the IDWR receipt was S039735. Their address is:

MEMORANDUM

Date: August 8, 2023
To: Transfer #87808 – Rodney Jentzsch file
From: Jim Bitzenburg
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes to change the place of use (POU) and points of diversion (POD) of a 12.0 acre, 0.24 cfs portion of irrigation ground water right 36-16554. The current POU is located approximately 5.6 to 7.5 miles north and 3.8 to 6.1 miles west of Minidoka. The proposed POU is located adjacent to the current POU. The PODs will be changing from five wells located within the current POU to six existing wells located within the proposed POU.

This is a companion transfer to transfer 87825, which will move a 12.0 acre portion of two rights from the adjacent farm back to this farm.

The transfer is in Water District 130 so Watermaster comments were solicited. The Watermaster did not oppose the transfer. The transfer is situated within the Eastern Snake River Plain Aquifer Ground Water Management Area and was advertised and subject to public protest. No protests were filed.

This transfer involves a change in points of diversion from non-adjacent ESPA model grid cells so ESPA modeling is required. The ESPA model analysis included with the application modeled the effects of both transfers occurring together and showed minor impacts with no mitigation required for the proposed changes. In reviewing the application, IDWR ran the model with the transfers occurring together, and with the transfers occurring separately, and both methods showed minimal impacts requiring no mitigation.

- **Authority to File:**

The Department's database indicates that water right 36-16554 is owned by the applicant, Rodney Jentzsch. The application was signed by Darek Jentzsch, who was appointed personal representative for the estate of Rodney Jentzsch. The Acceptance of Appointment document is included in the application.

- **Water Right Validity:**

The water right was licensed in 1993 and aerial imagery would appear to support recent use.

- **Injury to Other Water Rights:**

None anticipated or foreseen.

- **Enlargement of Use:**

None anticipated.

- **Local Public Interest:**

No issues anticipated. The transfer was advertised and no protests were filed.

- **Beneficial Use/Conservation of Water Resources:**

Proposed use is recognized as a beneficial use of water.

- **Effect on the Economy of the Local Area:**
None Anticipated
- **Effect of the Agricultural Base of the Area:**
None Anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
