Hi Mr. Runyan,

I am currently reviewing your application for permit 63-35621. The system is described as diverting groundwater for domestic use at 13843 Red Tide Ln, Caldwell, ID. The well identified in the application is tag number D0039156. I have attached the Well Drillers Report to this email.

In Basin 63 applications for permit are required to have a Water Bearing Zone reported before they are submitted for advertising and processed.

Based on the attached well drillers report a water bearing zone of 133 to 140 ft seems like a reasonable due to the casing depth and confining layers identified in the report.

If you agree with this assessment, please respond to this email confirming the water bearing zone you wish reported for the application for permit. If you believe that the water bearing zone is different from this assessment, please state the water bearing zone you wish reported for the application for permit. Thank you for your time and attention in this matter.
