Transfer No. 88809

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

Name of Applicant(s) Birds and BBs, LLC

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes N/A * Means the item is always required and must be included with the application.

- ☑ * Completed Application for Transfer of Water Right form, Part1.
- ☑ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☑ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☑ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☑ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☑ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☑ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☑ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☑ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).** ** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☑ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☑ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☑ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at https://idwr.idaho.gov/water-rights/transfers/resources/.
- ☐ ☑ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☑ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☐ ☑ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☑ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☑ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☑ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☑ #10 Other. Please describe: _____

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in thefuture:
See attachment 5a.

b. Who owns the property at the point(s)of diversion? Birds and BBs LLC
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
N/A

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: N/A

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?
If yes, ☐ complete Attachment WSB.

e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
See Attachment 5e.

f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
N/A

g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes	No	
☐	☑	undergone a period of five or more consecutive years of non-use,
☐	☑	currently leased to the Water Supply Bank,
☐	☑	currently used in a mitigation plan limiting the use of water under the right, or

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.**

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

Attachment 5:

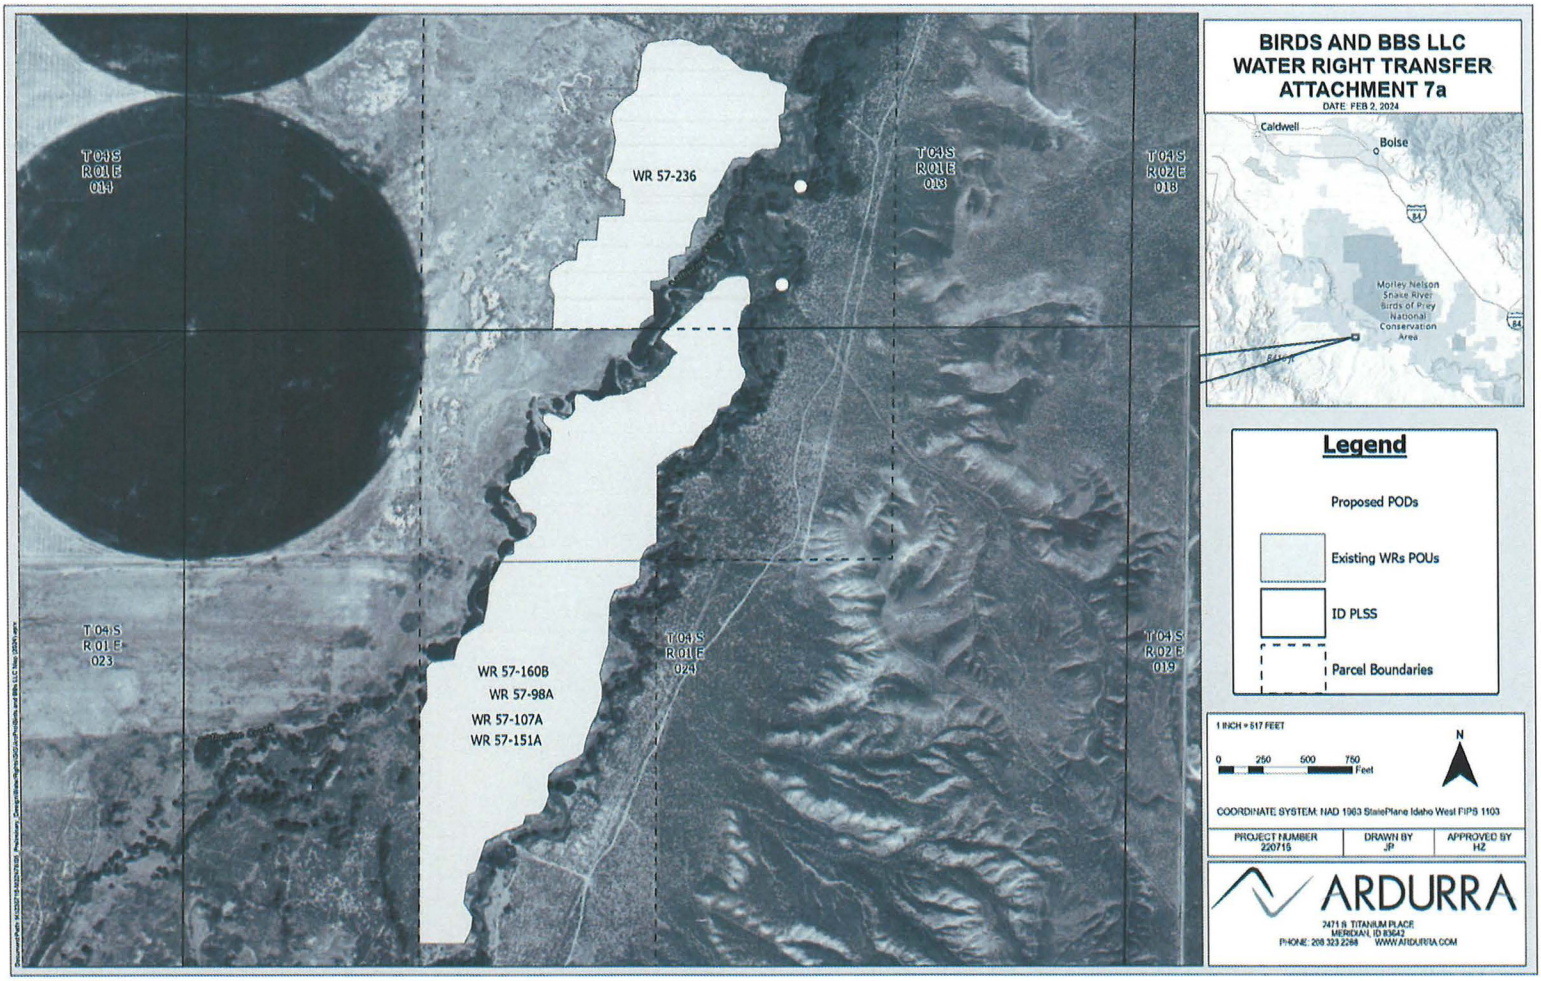

The proposed diversion system will be made up of two separate diversion structures. One structure will be placed in Catherine Creek and the other will be in Castle Creek. These will convert flooded irrigation into more efficient sprinkler irrigation. They will be made from stacked ECO blocks with a culvert placed in the center. This structure will impound water in each respective creek to allow for the proper operation of submerged pumps. This water will be pumped at the allotted diversion rates to sprinkler irrigators. The water will be land applied to the agricultural plots located within the POUs.

88809

Attachment 5e:

The proposed diversion structures will be converting flood irrigation to sprinkler irrigation through the use of submerged pumps. This will result in a more efficient use of the water rights and more effective irrigation of the agricultural land.

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the OWYHEE AVALANCHE on 7/3/2024 and 7/10/2024. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Lynne Evans
Administrative Assistant

RE: Transfer No. 88809

Dear Interested Party:

The Department of Water Resources (IDWR) is seeking written comment and/or recommendations regarding the above referenced water right application. You can find more information about the application at: https://research.idwr.idaho.gov/apps/waterrights/wrajsearch/wradjsearch.aspx.

IDWR can finish reviewing an unprotested application as soon as the protest period has passed. Therefore, your prompt response to this request is appreciated. If you wish to formally protest the approval of this application, you may do so after the notice is published by filing a written protest along with a $25.00 filing fee within 10 days of the final publication.

Please contact this office if you have any questions regarding the application.

Sincerely,

Lynne Evans
Administrative Assistant I

Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. You can find a copy of the application at: https://research.idwr.idaho.gov/apps/waterrights/wrajsearch/wradjsearch.aspx. Please review the application, then complete the enclosed recommendation form and return it to this office by July 22, 2024.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has passed. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation by July 22, 2024, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Please contact this office if you have any questions regarding the application.

To whom it may concern: We have used all the water rights designated to be used on this property. We used the present water rights at the diversion point (which has a pump station) and a pump in the creek to deliver water to crops and pasture. As you are aware in the summer there is little or NO water in the creeks. Again, all of the water rights used on the farm/ranch at Highway 78 Oreana Idaho, includes 57-236, 57-106A, 565-98A, 57-107A, 57-151A and 57-160B water rights.

Enclosed you will find three years of water rights, used and documented thru pictures with a date on the pictures.. The first two years (2022-2023) we watered pasture using both hand line and wheel lines and 2024 we added 80 acres of oats and are watering pasture. Cattle (livestock) and the pasture grasses have been using the water for years(50 years).

This all started when, I requested to move some of my water rights to new location on the ranch and now I was presented with a problem. I should not lose my water rights. One of other problems, is it takes time planning the use of water efficiently, since I am a good steward, I shouldn't have to defend the water, I purchased.

It is unfair, that I have been working hard to spray invasive plants and to irrigate the property, along with Improving wildlife/ agriculture/ livestock habitat projects and then the State of Idaho Water Resources takes my water. With out water my investment in this farm diminished.

Idaho's agriculture is so rapidly losing farmland to subdivisions. Idaho needs a safe and substantial food supply for its citizens. So please don't take my water rights and please give me advice.

Sincerely Bruce Kniefel

I'm trying to be simplistic and giving you information that validates the use of the water rights on that property.

The water has been used on the properties last three years and the pictures are proof. so there should be no forfeiture of water rights and the water should be able to be moved to a position that I could use it rather than pipe it all the way down to another section of my property . If I'm doing something wrong, please advise. Bruce.

Mr. Kniefel,

At this juncture we are looking for a response to the attached letter. This written response could outline specific type of defense to forfeiture you are using and also what water rights are associated with that defense. Once you

have submitted your official response we will evaluate that response and possibly ask for more information. I hope this helps.

RE: Application for Transfer No. 8809

Dear Birds & BBs LLC:

The Idaho Department of Water Resources (IDWR) is currently reviewing the above referenced application for transfer to change a water right. Additional information is needed to evaluate and process your application.

After preliminary review of the application, some concerns have been identified regarding validity of Water Right numbers 57-236, 57-106A, 56-98A, 57-107A, 57-151A, and 57-160B involved with the transfer. Evaluation of aerial photography and remote sensing data at the place of use shows little evidence of irrigation. Please explain or provide evidence of how these rights have been used for irrigation at the place of use. You may also provide a valid defense against forfeiture, defenses against forfeiture are outlined in Idaho Statutes Title 42 Chapter 2 section 42-223 (which can be found at: https://legislature.idaho.gov/statutesrules/idstat/Title42/T42CH2/SECT42-223/).

Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to delay processing. Your written response including the requested information, or a request for more time to seek the information, must be received within the next thirty (30) days.

Without a timely reply, IDWR will issue a preliminary order to reject the application. The application fee will not be refunded for a rejected application. A rejected application may be re-filed when adequate information can be provided.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-605-4632 if you have any questions. Thank you for your attention to this matter.

Sincerely,

Marcelina M. Williams
