Part 1A.3 – Transfer Narrative

Applicant has recently received Canyon County approval to develop a 190.72-acre site into a 21-lot residential subdivision. The site consists of two irrigation rights, 63-32851 and 63-31214, that authorize irrigation of 107 acres at a combined diversion rate of 2.14 cfs from a ground water well located within proposed Lot 8, Block 1. Applicant proposes to divide the irrigation water rights into twenty separate water rights for each of the 20 residential lots as shown in Table 1. Note, Lot 13, Block 1 is road area and not included. The amount of water right(s) assigned to the lots vary, with flatter lots receiving larger allocations and steeper lots receiving smaller allocations.

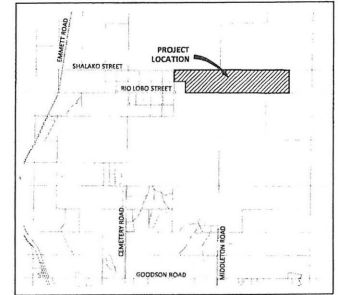

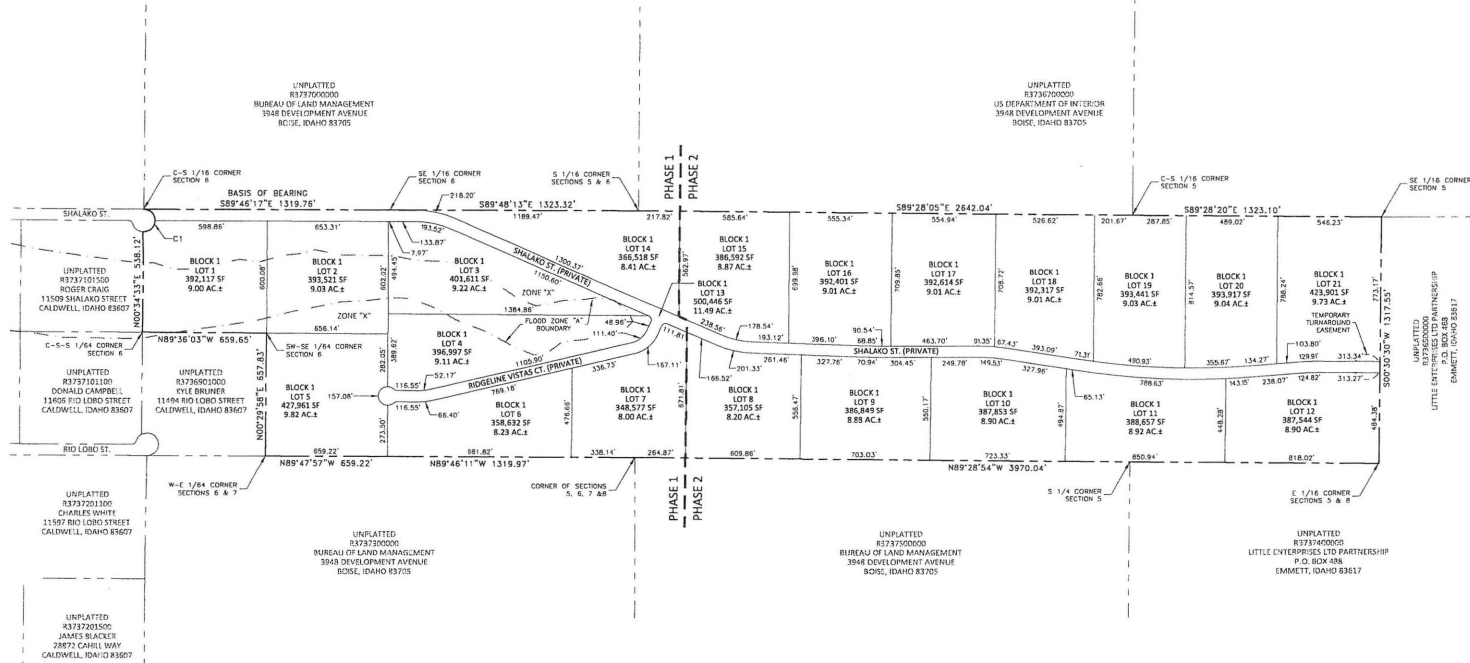

Table 1. Proposed Irrigation Water Right Allocation

Block	Lot	Water Right Acres			Rate (cfs)	Volume (afa)
		Total	63-31214	63-32851

1	21	1	1		0.02	4.10
Total		107	65	42	2.14	439.16

Because each lot will have a separate irrigation system, a total of 19 transfer applications are being submitted, with each application proposing a new water right and point of diversion for the subject lot. A transfer application is not included for Lot 8, Block 1. A replacement well will be constructed to supply irrigation to Lot 8, Block 1 using the remainder of 63-31214. The existing well on Lot 8, Block 1 will be retained as the POD for fire protection permit 63-35264. Upon approval of the transfer applications, each lot will have an appurtenant water right that shall be conveyed by the applicant with the sale of the lot.
