NOTICE OF PROTEST

Department of Water Resources
Eastern Region

This form may be used to file a protest under Sections 42-203A, 42-203C, 42-211, 42-222 or 42-240, Idaho Code. The Department will also accept a timely protest completed in a different format if it contains the same information requested on this form. Each protestant must provide a separate \$25 filing fee for each application protested. The Department's Rules of Procedure (IDAPA 37.01.01) require the protestant to **send a copy of the protest to the applicant.**

1. Matter protested. Application for ☐ Permit ☐ Amendment of Permit ☒ Transfer ☐ Exchange
No. 75-13715 - 87242 in the name of Sadie Barrett

2. Protestant's Name: David Craig

Address: PO Box 789, Salmon, Idaho 83467

Telephone: 503-789-8034 Email: david@questaff.com

3. Protestant's Representative: _____

Address: _____

Telephone: _____ Email: _____

4. Basis of protest. Clearly state your objections to approval of the application and identify the applicable review criteria. See Instructions for Filing a Notice of Protest for the relevant review criteria.
Please see attached letter and exhibits

(Additional pages may be attached to describe the basis of your protest.)

Identify any review criteria that are not a basis for your protest:

5. ☒ Check here if Protestant and Representative will accept service of documents by email at the email address(es) listed under Item #2 and #3 above.

I acknowledge that if I, or my designated representative, fail to appear at any regularly scheduled conference or hearing in the matter, of which I have been properly notified, the Department may issue a notice of proposed default against me in this matter for failure to appear. **I also verify that I have served a copy of this protest upon the applicant.**

Dear Department,

This letter is in protest of application by Sadie Barrett to change both point of diversion and point of use for water right 75-13715.

The applicant has requested a change in their point of diversion for water right 75-13715. In 1967 the owners of Lake Creek Golf Course subdivided numerous lots in and around the golf course. They developed a spring and installed piping with the intention of providing domestic water to all of the lots created in the subdivision. (see newspaper article included as exhibit B). Several lots were sold and 4 homes and a golf course building were actually built (Barrett, Aksland, Leyba, and Kittrell). In 2000, the golf course property owner and several residents including Barrett applied and established their water rights with the Department through adjudication. All of those water rights were recorded with a point of diversion located at the end of the 4" pipe that was installed by the previous developers. Ms. Barrett claims the point of diversion in her water right is wrong due to clerical error. I disagree. In 2000, Ms. Barrett and the other homeowners who went through adjudication had no permission to access the spring site. Since they had no legal access to the spring site, it is likely that their point of diversion could not be listed as the spring site and was rightfully recorded as being at the end of the subdivision pipeline. In 2006, the residents of Lake Creek Subdivision who were connected to the spring were granted an easement to the spring site by Royslance (see exhibit A). Royslance presumably granted this easement in good faith as they intended to construct a new residence and also utilize the water system for domestic purposes which they did in 2012. The easement granted specifies rights to the spring site but does not address the piping system, which still crosses private property without easement. In light of the fact that Barrett has protested an application by the current owner of the spring site to correct their point of diversion, it seems prudent that Barrett's request not be granted without approval of the owner of the spring site. If the Department decides to adjust the point of diversion for Barrett, the same adjustment should be made for all users of the system.

Ms. Barrett has also applied to have her Point of Use expanded. This clearly should be denied by the Department. Whether or not an application will result in an enlargement in use under an existing right is one of the Department's published criteria. Water right 75-13715 was obtained through adjudication and given a priority date of May 1, 1968. That water right by rule is only applicable to the property as it existed in 1968. I have attached a copy of the original subdivision map with the original Barrett property highlighted in yellow (exhibit C). I have also attached an enlargement form BLM Aerial photo #4-28-409 from 9/15/1974 showing that the property across from the original road location was clearly part of the golf course (Exhibit E). In 2002, the subdivision was amended and the roadway right of way was vacated and a new right of way dedicated. (see exhibit D) Ms. Barrett acquired additional property at this time. Ms Barrett has installed a lawn and garden on the newly acquired property and irrigates it regularly.

SCANNED
DEC 29 2022

During the summer of 2022, the collector for the spring that serves our neighborhood failed due to tree roots, and we experienced a substantial shortage of water. Ms. Barrett refused to stop irrigating her lawn and garden even when other residents were without water to their home, which she claimed was her right. While we repaired our collector and once again have plenty of water, the experience illustrates the importance of priority dates. Ms. Barrett is not entitled to a 1968 priority date to irrigate property that was acquired in 2002. If she wishes to continue to irrigate the newly acquired property, she should apply for a new water right. Because Ms. Barrett continued to irrigate under the false pretext that she had a right to per her priority date, it is clear that expanding her point of use could negatively impact "Local Public Interest".

Thank You,

David Craig

EASEMENT

An easement is hereby granted to the owners of the homes on the Lake Creek Spring Domestic Water System for full and unrestricted access to Lake Creek spring, tank, and water system located on Lot 13, Block 8, Lake Creek Addition #1 in Lemhi County, Salmon, Idaho. Such easement is for the sole purpose of servicing and maintaining said spring, tank, water system, and fence. This easement includes an area 100 feet in radius from the point of diversion, which area should be fenced and fence maintained by the above indicated water association. This easement includes full and complete access to and from and on the present road for said purpose.

CONSTRUCTION IS UNDERWAY on a club house for the Salmon River Golf Course. The building will contain a pro shop, locker room, showers and storage room. The pro shop is scheduled to be completed in time for use in connection with the golf course. Future plans call for a second floor for the club house to provide cafe, convention and bar facilities.

July Opening Goal Set

Golf Course Job Pushed

The Salmon River Golf Course and Club House being developed 12 miles south of Salmon at the mouth of Lake Creek is scheduled to be placed into use this summer.

Rick Miles, owner-manager of Miles Realty which is undertaking the venture, said this week that "we will have a playable golf course and limited club house facilities in operation by July 1 barring adverse weather conditions."

Greens and tees for the nine hole, par 34, golf course are being planted this week and workmen are constructing the golf course pro shop.

Miles said the golf course will be operated under the name of Salmon River Golf, Inc., and owned mainly by Miles Realty.

Power lines are currently being run in to serve the pro shop, homesites and a 50 horse-power pump which will serve the golf course water system.

Golf Pro Hired

The golf pro taking over the management of the course and club house is Bruce Blahnik who has been the golf pro at Hamilton Golf Club at Hamilton, Mont. the past three years.

Miles said "We are proud to have Mr. Blahnik become associated with us here and feel we are very fortunate to acquire his services."

Assisting him will be Don Wetherington who currently is employed teaching school in the Salmon School District and has been working part time in the construction of the golf course.

The land from just under the crest of the hill at Williams Lake on down Lake Creek to the Salmon River was purchased from the M. M. Meltons three years ago by Rick and Eva Miles and now is being opened and developed solely under the auspices of Miles Realty.

The golf course water system and the domestic water system were installed last summer but additional work was curtailed at that time, Miles said, because of the tight money situation.

"Financing still is a tremendous problem," he added.

Today the reality firm has sold 28 lots in the development as year-around home sites.

Miles said the golf course is designed to be a "challenging small course and yet a few-tee can play it safe for a respectable score. The course is approximately 2,900 yards long. The fees, annual dues, etc. will be worked out."

(Continued on Page 7)

Beef Import Meet Slated

Lemhi County cattlemen have scheduled a meeting for Saturday at 8 p.m. at the Court House to discuss the problem of foreign beef imports.

Merle Hoffman, president of the Lemhi County Cattle and Horse Growers Assn., said that all interested persons, ranchers as well as other local groups, should attend.

The local association has informed the Idaho Cattlemen's Assn. that it will support that group in any way possible in its efforts to reduce beef imports and to encourage the federal government to have domestic beef used for lunch programs and any other projects where the government is the purchaser of beef.

Hoffman said that support is needed for efforts by Gov. Don Samuelson to meet with Secretary of Agriculture Orville Freeman on the import problem.

Session Slated On Parks Plans

Tony Horn, extension horticulturist and chairman for Idaho of the Keep America Beautiful Committee, will meet with representatives of service organizations and other interested persons Thursday, May 11, at 10 a.m. at City Hall.

Plans for beautification of the Cavanaugh Park and Island Park will be viewed.

Ellsworth Gains Idaho Young Republican Job

Idaho Young Republicans met in Boise Friday and Saturday elected Ron Ellsworth, Lemhi, as state treasurer for a two-year term.

Lee Barron of Corral was elected president of the Idaho Young Republican League.

Ellsworth said that this year's convention was marked for the first time by harmony, without a split between liberal and conservative factions as in the past.

The Idaho Young Republican state executive board has scheduled a meeting in Salmon July 22 to initiate new programs.

Attending the convention were Mr. and Mrs. Ron Ellsworth, Mr. and Mrs. Gary Ellsworth and Mr. and Mrs. Mike Overacker. Gary Ellsworth and Overacker were delegates from the Lemhi County Young Republicans.

The county organization has scheduled a meeting Monday at 8 p.m. at City Hall in Salmon to hear reports on the convention.

While at the Boise sessions, Gary Ellsworth served on the resolutions committee with Overacker.

Ron Ellsworth said that the state organization appears to be stronger today with more unity of purpose and a determination to work for Republican aims in the coming months ahead.

There is much more interest in the Young Republicans at the county level than there has been.

Fish Group Seeks Talks With Corps

The Salmon Chamber of Commerce's Fish Committee is continuing its efforts to have a representative of the Corps of Engineers from Walla Walla visit here to discuss problems related to maintaining the salmon and steelhead runs.

Berton M. MacLean, chairman of the committee, said that the Corps of Engineers is planning to build a dam at the mouth of the Salmon River. The dam would be 100 feet high and 100 feet wide. It would be built on the site of the old dam which was destroyed by a flood in 1934.

MacLean said that the Corps of Engineers is planning to build the dam in order to control the flow of the river and to prevent flooding. He said that the dam would also be used for power generation.

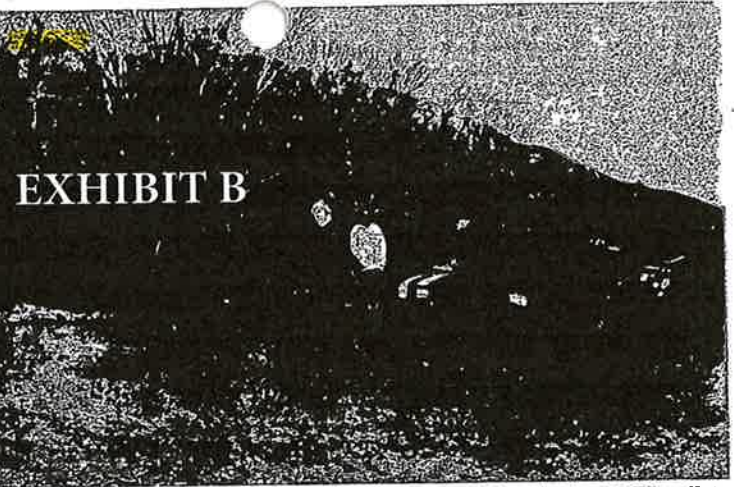

The committee is seeking talks with the Corps of Engineers to discuss the problems of maintaining the salmon and steelhead runs in the face of the proposed dam.

Junior Angus Club Planned

A meeting has been called for Wednesday at 8 p.m. at the Clyde Nelson ranch to organize a Junior Angus Heifer Club. The group would be the first in Idaho.

Douglas A. Wood, Nampa, president of the American Angus Assn. field representative, and Dean R. Rust, national director of junior activities, are scheduled to attend the meeting.

The club is open to boys and girls ages nine through 21. Any interested persons are invited to attend the organizational meeting.

MR. AND MRS. RICK MILES prepare green on the Salmon River Golf Course for planting. A nine-hole, 34 par course is being created at the Miles Realty Co. 12 miles south of Salmon across the Salmon River from U. S. Highway 93 at Lake Creek. Miles, who heads Miles Realty Co., hopes to have the course ready for play by July 1.

THE RECORDER-HERALD

Official Newspaper of Lemhi County and the City of Salmon

ESTABLISHED 1886 SALMON, LEMHI COUNTY, IDAHO, THURSDAY, MAY 4, 1967 NUMBER 48 PRICE 15c

School Trustee Vote Scheduled

School trustees in Salmon tentative said May 1 will go to the polls at the Pioneer Elementary School Saturday from 2 to 3 p.m. to elect a trustee for a three-year term.

The issue includes the area of Salmon and within a mile of the city limits. The term of Great Haven, who was appointed to the board, expires.

Patrons are urged to turn out and vote.

New Snow Brightens Area Water Picture

New snow has brightened the water outlook for Lemhi County but the moisture and cool temperatures have delayed spring planting and growth of grass needed for livestock grazing.

Snow surveys taken during the week indicate depths at Meadow Lake is now 30 inches with 30 inches of water compared to 29 inches of snow with 20 inches of water April 1. A year ago that snowing station was bare.

The Soil Conservation Service reported Greenhorn Creek has 48 inches of snow now with 13 inches of water compared to 31 inches with 8 inches of water on April 1. A year ago that snowing station was bare.

Lost Trail Ski Area the past week had 100 inches of snow and Moose Creek had 54 inches with 20 inches of water.

Fish Study Resumes on Marsh Creek

Idaho Fish and Game Department personnel are tackling ice and snow in the high mountains that form the headwaters to the Middle Fork of the Salmon, and Dall Scott Blackfoot, who operates the weir traveled to Marsh Creek on snowmobiles over six feet of snow on April 13.

Since then the area has had another foot of snow and temperatures have dropped as low as one above zero.

Scott and his wife, Dixie, are living in an 8 by 18 foot trailer which was placed at the weir site last fall. They make the 20-mile one-way trip to Stanley once a week to purchase supplies.

Reingold and Scott spent three days digging the weir out of the ice and snow and after getting it in operation temperatures dropped and everything froze solid again with water flowing over the traps. With warmer weather the same day the weir finally became functional.

Reingold noted that since the weir was only placed into operation in July last year, the department hopes to gain a full year's use this year.

At the weir, fish moving both downstream or upstream, are trapped. Some of the salmon and steelhead moving out will be marked as part of studies conducted by the Idaho Fish and Game Department under a U.S. Bureau of Commercial Fisheries financed program.

Similar studies also are being conducted on the East Fork of the Salmon, the Pahsimeroi and the main Salmon River near Salmon.

Marked fish can be checked at Ice Harbor, The Dalles and Bonneville dams to obtain data on migration, timing and behavior.

"We are trying to get a general life history and production record on these salmon and steelhead," said Reingold.

All salmon and steelhead arriving this spring will be counted as well as the young fish moving downstream on their way to the ocean.

"We should be able to get a real good production study and determine what kind of survival these fish have in the wild in a high mountain meadow situation like Marsh Creek," the official said.

The first adult steelhead of this spring's Marsh Creek run showed up at 6 p.m. April 26 at the weir.

From July until November last year, an estimated 40,000 chub and 1,000 steelhead passed through the weir on their way downstream.

Scott, who serves as weir tender, handles the marking of the fish, measuring them and noting the sex.

The weir is located 10 miles up Marsh Creek from the Middle Fork. Its operation is expected to continue into November again this year.

Reingold said it is hoped the weir operation can be continued for another three years or so to provide information on a full life cycle of both salmon and steelhead.

Reingold said the main objective of the study program is to "provide us information to know more about the species of fish we are working with; to know why fish in one spot survive while fish in another."

Inquest Set In Accident

An inquest into the double fatal auto accident which claimed the lives of two Salmon young men has been scheduled for Friday at 10 a.m. in the Lemhi County Court House.

Charles F. Davis, 21, and Michael D. Dillon, 18, died in the single car mishap the early morning of April 22, 20 miles south of Salmon on U.S. Highway 93.

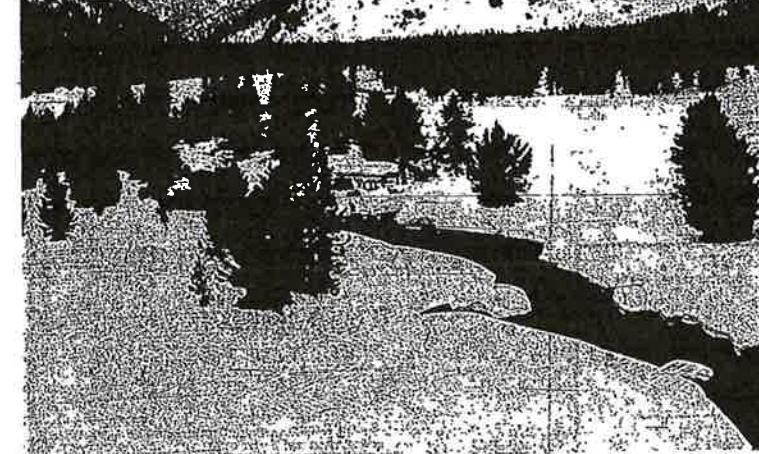

Two other persons injured in the accident, John Lemmy, 22, Salmon, and Donna Cresto, 21, Challis, have been released from Steele Memorial Hospital, Lacey on Sunday and Miss Cresto on Monday.

All four were riding in a 1963 sedan which went out of control on a sharp curve and crashed into overhanging rock along the highway.

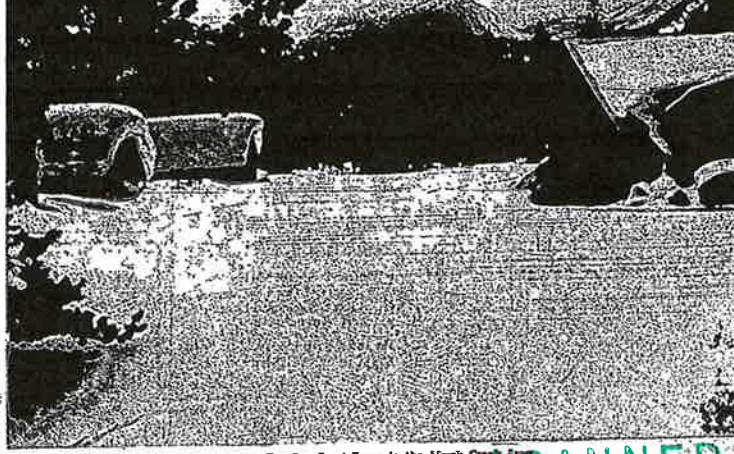

Reingold said that the purpose of the study program is to "provide us information to know more about the species of fish we are working with; to know why fish in one spot survive while fish in another."

Reingold said that the purpose of the study program is to "provide us information to know more about the species of fish we are working with; to know why fish in one spot survive while fish in another."
