Sharla,

May 7, 2015 Forest Service personnel met with Rob and Lisa Shively at their property to discuss the water right situation and the FS protest to 75-13989. Agreement was made that the Shivelys would work toward developing a separate water source and pipeline for their use, totally independent of the FS system within the next 14 months. There is another spring with an abandoned headbox located about 50 feet upvalley of the FS headbox on private property outside of the FS easement. The Shivelys would tap into this spring source and run a separate line down to their cabin. It is unlikely that their use of the adjacent headbox would affect the availability of water at the FS headbox. They are still connected to the FS water line and will continue to use water. We will continue to work with them toward resolution of other associated water right matters such as figuring out the best way to deal with the aging FS pipe within the FS easement that is currently under the deck of their cabin.

I don't know how this will work for the Department. If it is acceptable I'll champion the effort and do everything I can to have the situation resolved within the timeframe posed above.

Thank you for working with us on this. If you have any questions about it please let me know.

Steve

Perfect. No problem. The ball is in your court and I will wait to hear from you.

Thank you.

Sharla,

Thank you for this information. I'm in Ogden all week. Hopefully I can assemble what has happened over the last several years and caucus with my folks early next week and get back with you mid-week about what the next step might be. It's been quite a while that it might first be best for the FS to initiate communication with Rob Shively to see if we can work something out. If it's OK I will get back with you the middle of next week.

Steve

Steve, I spoke to Janice Shively and she referred me to her son. She is elderly and her son takes care of everything now. His name is Rob Shively, cell #208-390-6517. I called Rob and we talked about this for quite a while. He said that nothing has been basically done. He said that the forest service went to the creek and cut the pipe by the creek, then they re-connected it. But in the mean time they drilled a well to take care of the forest service building and grounds around the building. He said the forest service is not using the pipeline, nor the water from the creek. He said that he received a letter from the forest service people back in 1999 that said that they were not using the pipeline or the water.

So in the long run, nothing has been done. So can you have your guy check into this, see if they are even using the pipeline and let me know where we go from here.

Thanks.

Sharla
