Subject: RE: Draft Approval Documents - Shively 75-13989

James,

Thank you for drafting the conditions for approval of the water rights application and the license pertaining to 75-13989 (Shively). We have reviewed those conditions and find them satisfactory provided that the Shivelys move forward this fall (Fall 2020) with constructing a separate spring box and a separate water line from the spring to their home. You indicated in your email that you will conduct a final field review of the system before issuing the license. At that time, if all appears in order, we will formally withdraw our protest to the application.

If you have any questions or concerns please let us know. We appreciate your efforts to bring this matter to a final resolution.

That would be fine. Please provide comments about the proposed conditions by September 18th.

Thank you James.

We will take a close look at these and coordinate within the Forest Service. We should be able to provide you some feedback within a couple of weeks if that works for you.

Subject: Draft Approval Documents

Dear Parties:

During our conference yesterday, I agreed to prepare draft approval documents for you to consider. Attached are two draft approvals. The first is an approval of the Application to Amend Permit 75-13989. The second page of the draft approval includes the conditions of approval. Condition 1 is intended to accomplish the separation we discussed at the conference. The Shively right will be diverted from a different spring than the one used to supply the USFS right.

The second document is a draft license. As you can see, the license incorporates the same conditions as those listed in the amendment approval.

Please let me know if you have any concerns with the proposed conditions or have suggestions to improve the language. As we discussed yesterday, before I issue a final license, I want to conduct a follow-up field examination, confirming the installation of the new spring box and the location of the two springs. Please let me know when the box is in place and we will schedule a site visit.
