13. Remarks (Include an explanation of the priority date selected):

Priority is per Terrell Decree, which defines priority dates and quantities, but also describes subordination of "Meadow" rights to "Agricultural" rights. Peg Leg was decreed "Agricultural" rights and asserts its claim to the subordination of the "meadow" rights. A copy of the excerpts of the decree are attached with highlights of relevant language that must be included in the BRBA decree. Additional details regarding elements of the claim are described more fully in the attached narrative.

Narrative to Accompany BRBA Water Right Claim to Provide Additional Information

Claim based on WR#: 11-902, 11-903, 11-904

Claimant: Peg Leg Irrigation Company, Inc.

1. Name. The decreed name is the Peg Leg Island Irrigation Co., however the claimant now uses the name Peg Leg Irrigation Company, Inc., which is the registered entity with the Secretary of State since 1941.

4. Point of Diversion. The point identified in this claim is the accurate location of the historical diversion, which is consistent with the IDWR record and verified through aerial photography. This is a shared point of diversion with the Black Otter Irrigation Co. and is generally referred to as the Black Otter diversion.

9. Place of Use. The Claim map on Page 3 of the claim form illustrates the service area boundary claimed for Peg Leg. The service area boundary was drawn based upon review of the irrigated lands, and extended to the property boundaries of the patrons (as represented by the parcel layer obtained from Bear Lake County) to include all lands that could be irrigated from Peg Leg. The service area boundary encompasses 1,214 acres, as described in the claim.

Some lands, specifically the W1/2NW1/4 of Section 7, T14S R45E, are included within the service area as water is deliverable to this location from Peg Leg Ditch and historically received water. The shares were sold off some years ago and the current owner has just obtained some shares since 2021 to begin irrigating again.

Total irrigated acres were reviewed in detail with the individual patrons, mapped, and confirmed by the canal president, representing active irrigated acres as of 2021. Some patrons own shares for properties that have lost access to their delivery ditches. However, the historical irrigated lands are included in the total acreage since the patrons are current shareholders with valid shares in good standing. Connection to Peg Leg may be restored to allow patrons to continue beneficially using their shares.

An overview map and detailed maps are included in Attachment 2 to show the GIS polygons generated by the acre review. The service area boundary was drawn according to the parcel layer from the county, but irrigated acres were estimated based on field boundaries, which do not always correlate to the represented property boundaries. The Place of Use List attached to the claim summarizes the irrigated acres per quarter-quarter. A shapefile can be provided to IDWR of the place of use boundary and irrigated acres.

The analysis indicated approximately 808 acres of irrigation. However, the full decreed acreage **866.5 acres** is claimed because recommendation of anything less would constitute a partial forfeiture of the Peg Leg rights, and per Idaho Code 42-223:

(7) No portion of a water right held by an irrigation district, a Carey Act operating company, or any other company, corporation, association or entity which holds water rights for distribution to its landowners, shareholders or members shall be lost or forfeited due to nonuse by such landowners, shareholders or members, unless the nonuse is subject to the control of such entity.

It is acknowledged that within the near future, likely Peg Leg may not need the ability to irrigate a full 866.5 acres. However, it is expected that the Bear River Basin Adjudication decree will endure beyond a

period of time when future needs, practices and conditions can be foreseen. Even more important than preserving the original decreed acreage is to avoid any reduction in diversion rate based on a notion of loss of acres. Historical use has equilibrated to what can be supported with the decreed diversion rates, and a reduction in diversion rate would change the Adjudication from a *confirmation* of rights to a *reallocation*.

12. Other water rights. Peg Leg owns decreed rights 11-902, 11-903, and 11-904 that are used in combination for the irrigation of the 866.5 acres within the service area. In addition, claimant is filing a stockwater claim for the same place of use delivered through Peg Leg.

Known overlaps: Other non-Peg Leg water rights that overlap may include Kent La Roco, which delivers to the Keetch property in T13S R44E S35 and T14S R44E S2. Peg Leg water is injected into the Kent La Roco and both rights are diverted into a holding pond to irrigate the Keetch property.

Other private domestic ground water rights may overlap the service area boundary, and Peg Leg makes no assertion that they are used in combination with Peg Leg water rights, unless specifically stated by the other claimants.

The following canal systems are adjacent to, but do not overlap with Peg Leg:

- Black Otter Irrigation Co.,
- Dingle Irrigation Co., and
- Ream Crockett Irrigation Co.

Patrons may own shares in one or more of these companies, but the canals do not irrigate the same lands.

- 11 1952 IT IS FURTHER ORDERED, ADJUDGED AND DECREED That there shall be allowed to pass by the Wardboro Dam in Bear River five cubic feet per second of water at all times for the use of the West Fork Irrigation Company for culinary and domestic purposes; and it is further understood and agreed that said West Fork Irrigation Company is to have a riparian right, inferior to the irrigation rights herein decreed, for forty cubic feet per second of water to be run through the canal at all times during the year except when needed for irrigation purposes.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED, That all of the above described lands are arid in character and require irrigation for their proper cultivation and for the profitable raising of crops thereon, and that the duty of water shall be fixed and determined at one and one-half (1½) miners inches per acre of water from April 15th to July 1st of each year, and at one (1)

miners inch per acre from July 1st to September 30th of each year for the lands designated as meadow lands, and for the lands designated as agricultural lands, it is agreed that the duty shall be one miners inch per acre through the irrigation season, except that it is ^{adjudged & decreed} stipulated that 500 acres of agricultural lands under the canal of the Dingle Irrigation Company and 400 acres of agricultural lands under the Preston-Montpelier Irrigation Company's Canal, and 400 acres of land under the Ream-Crockett Ditch have a gravelly sub-soil and require one and one-fourth (1 $\frac{1}{4}$) miners inches per acre for their proper irrigation, which amount is to be decreed to said lands; it being further decreed that if within five years it is determined that said gravelly land does not need 1 $\frac{1}{4}$ miners inches per acre the same shall be reduced which in no event shall it be reduced ^{so as} to give it less than one (1) miners inch per acre to such land, the Court retaining jurisdiction of this cause for said purpose.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED, That the lands herein classified as meadow lands or rights are understood to mean those lands along Bear River producing what is commonly called "wild hay" or "natural meadow grass", which lands must be flooded in order to produce crops, the water running over said lands and back into Bear River, which said meadow lands shall be subject to rights hereinafter specified in this decree.

The agricultural lands or rights as herein classified are intended to mean those lands which have been cultivated and irrigated for the production of crops. The acreage of said agricultural lands are hereby decreed and designated as follows: Preston-Montpelier Irrigation Company, 2200 acres; Dingle Irrigation Company, 1721 acres; Peg Leg Irrigation Company, 865.5 acres; Ream-Crockett Irrigation Company, 861 acres; Kent-LaRocco Ditch, 385 acres; It being adjudged and decreed that this is the number of acres designated as agricultural lands under this decree.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED, That if at any time between the 17th day of June and the 4th day of July of any year there shall not be sufficient water in Bear River to supply the above designated agricultural lands consisting of 6012.25 acres, then and in that event, there shall be taken from the lands or rights herein designated as meadow rights pro rata a sufficient amount of water so that ^{said} 6012.25 acres of agricultural land shall receive 75 per cent of the full amount of water herein decreed to said agricultural lands, and if after July 4th of any year there is not sufficient water in Bear River to supply said 6012.25 acres with the full amount of their decreed water right, then, and in that event, there shall be taken from the said meadow lands or rights a sufficient amount of water

to supply said 6012.25 acres of said agricultural lands to the full extent of their decreed rights.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED; That the Court shall retain jurisdiction, and jurisdiction is hereby reserved for a period of five years from the date hereof for the purpose of correcting said decree if it shall be made to appear to the court that there are errors in the description or amounts of land to which water has been decreed under this decree

IT IS FURTHER ORDERED, ADJUDGED AND DECREED , That each party pay his own costs herein.

Dated this 7th day of March, 1924.

Re: Bear River Basin Adjudication Claims – Peg Leg Irrigation Company Inc.

Dear Ms. Marion Beck,

This letter accompanies a check for four Adjudication claims for the Peg Leg Irrigation Company, which were transmitted electronically, along with GIS shapefiles to aid in review of the claims. Also attached are worksheets summarizing the fee calculations for a total fee of \$1,567.

In addition to responses to be provided to the claimant, please copy Rocky Mountain Environmental Associates, Inc. (RMEA) at kristin.rmea@gmail.com with a copy of the receipt and copies of the first pages of each claim, showing the numbers assigned by IDWR.

The claims filed are listed in the attached summary table.

Please contact our office with any questions regarding these applications.

Thank you,

FILING FEES

Each claim submitted must include the filing fee. The filing fee for domestic and/or stockwater use claims diverting less than 13,000 gallons of water per day is \$25.00. However, if you are filing more than four (4) claims in which the only purpose of use listed is stockwater, only the first four (4) claims require the \$25.00 filing fee. All additional stockwater claims are fee exempt once the \$100.00 in filing fees has been paid for the first four (4) stockwater only claims filed after July 1, 2017.

The flat fee for filing all other claims filed is \$50.00 per claim. An additional variable filing fee based upon acreage, power generating nameplate capacity, cubic feet per second (cfs) amount, or an equivalent volume of storage water is required for claims for water uses other than domestic and/or stockwater uses diverting less than 13,000 gallons of water per day. Use Table 3 to calculate the variable fee. Add the calculated variable fee to the \$50.00 flat fee to determine the total fee for the claim. The exceptions are fire protection or ground water recharge which have a \$50.00 flat fee, and no variable fee.

Examples for a single claim to a water right with single source and same priority date:

Single family domestic and stockwater use, less than 13,000 gallons per day in total \$25.00
100 acres irrigation, domestic and stockwater as above \$150.00
Fish propagation, 47 cfs \$92.00
Multiple family domestic, 1.6 cfs, irrigation or yards and gardens, 14 acres \$224.00

TABLE 3. VARIABLE FEE SCHEDULE

Irrigation	\$1.00 per acre	Each acre is charged only once.
Power generation	\$3.50 per kilowatt of capacity	Manufacturer's nameplate rating, or \$250,000.00, whichever is less
Aquaculture	\$10.00 per cfs	
Domestic, stockwater use in excess of 13,000 gallons per day	\$100.00 per cfs	
Municipal, industrial, commercial, mining, heating, cooling	\$100.00 per cfs	
Public instream flow, public lake level maintenance, wildlife	\$100.00 per cfs	
Exceptions	No variable fee is charged for fire protection or ground water recharge
