Water rights 11-2012 and 11-4070 together constitute a series of in-stream impoundments for stock water and irrigation of a 5 acre area. IDFG recommends consolidating into a single water right, but would not object if they remain listed separately. To maintain the seniority of the priority date we are electing to file them separately.

The nature and location of water use has not changed, but the application contains corrections to all legal descriptions to accurately reflect the physical location of the water right(s).
