We disagree with the one acre that was allotted to the irrigation claim.

In some of the earlier water rights claims filed it showed a claim of 18 acres which 5 of the acres was on the other side of Highway 57 and unknown if any irrigation had ever taken place on it.

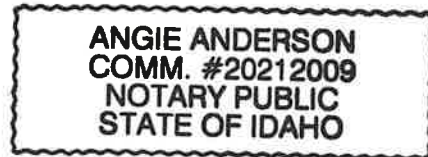

The other 13 acres has been irrigated that we can prove through eye witnesses back to at least 1958 when Denny Rainey lived at Kokanee Park as he attested to in his prior affidavit. Denny can also attest to the fact that the entire lower 13 acres of Kokanee Park was being irrigated by the two men that lived in the two small cabins along the creek. They irrigated even in the treed areas to keep fire danger down as there were many little travel trailers, and they were trying to grow grass in those areas. We currently are irrigating about 4 acres of lawn and would be happy if it was a total of 4 acres that was originally listed in some of the previous filings.

I Denny Rainey personally in 1958 and after that witnessed all of Kokanee Park being irrigated by the two men that lived in the small cabins along the creek and worked for the owner.

They even were watering in the trees of the North end and all along the main road that entered the Park.

Sincerely,

Denny Rainey

I Brian McInerney agree with Denny Rainey that all of Kokanee Park was being irrigated in the late 1950's and all the way until today. As we had a cabin just down the river and my dad use to send me down to Kokanee in the boat to get milk and a newspaper for him regularly from the little store in the middle of Kokanee Park. I also used to fish off the banks of the main river and along Lamb Creek. In those days I saw the irrigation of the whole park taking place. I currently live in Kokanee in the North end where there use to be little travel trailers scatted throughout the trees.

Sincerely

Brian McInerney
