When we bought the property in 2014, there was a 99 year lease that was expiring. We informed the neighbors and they dug a well. That spring in regards to flowing off the property has not been doing that for approximately seven years now.

Spring one is the spring we're using for our home and garden. Spring two was connected to the house, but basically stopped flowing.

Joe.

Hello, I am reviewing your water right claim and have a question about the springs. Do you use them both? The statutory claim map that we have on file appears to show spring 1 (shown below) flowing off the property. Are the spring locations shown below correct?
