Jill,

We spoke sometime ago about wanting to make sure there was documentation in the file on Kevin Larsen's claim regarding where the stream actually began in case of future development. I have attached this letter outlining that. I hope this works. Please let me know if you need anything further from me.

Re: Kevin Larsen – Adjudication Claim 13-7428(2957)

Dear Ms. Woodhouse:

Attached is the supplemental information you requested on the Larsen Water Right claim. Mr. Larsen filed this claim as his father, who originally filed the claim, has passed away and Mr. Larsen has inherited the property bordering the reservoir. We are submitting this letter to outline exactly how the reservoir comes to being. The water right shows the place of use, as recreation storage, at the SE1/4NE1/4 Sec. 19 Twp 15S Rge 40E, B.M. The point of diversion is an unnamed stream located within the same description as the place of use. The unnamed stream, however, comes into being in the adjoining quarter located at the NE1/4NE1/4 Sec. 19 Twp 15S Rge 40E, B.M. Because the possibility of future development threatens the existence of the stream, which is a seasonal stream, we wanted to be clear of where the stream begins. I have attached a map of the water right where we have outlined in red, the stream, which forms seasonally in the spring each year.

Please let me know if you need any further information.

Sincerely,

Ethan Rawlings

A handwritten signature in blue ink, appearing to read "Kevin Larsen", is written over a horizontal line.

Kevin Larsen

Water Right

13-7428

RECREATION STORAGE

The map depicts the place of use for the water use listed above and point(s) of diversion of this right as currently derived from interpretations of the paper records and is used solely for illustrative purposes. Discrepancies between the computer representation and the permanent document file will be resolved in favor of the actual water right documents in the water right file.
