Claim Application for Water Right 13-626

Claim Section

5. The irrigation system fed by this water right is a gravity flow sprinkler irrigation system. The Point of Diversion (POD) is a rock and earthen diversion with no permanent structure. The subject water flows from the POD in an open ditch for approximately 3,000 feet to an L-shaped concrete flume. This ditch also carries water from water rights 13-7923 and 13-627. The flume entrance is 29 inches wide and 24 inches deep. At the lower end of the flume is a head gate to an eight inch underground mainline pipe. On the side of the flume is a 24 inch by 24 inch exit. Water not going into the mainline pipe exits the flume into an open ditch which flows back to Mill's Creek. The flume exit can be blocked by placing various heights of 24 inch long boards across the flume exit. A removable metal screen box is positioned immediately in front of the eight-inch pipe entrance. The mainline pipe runs for approximately 2,450 feet along the southern edge of the Place of Use (POU). There are multiple three-inch risers in the mainline spaced evenly along the POU to provide connections for hand-line sprinklers. Claimant Shaw Land & Livestock Co., LLC does not know when the system was constructed or upgraded, but the Claimant has been using the irrigation system continuously since Claimant purchased the property circa 1978.
