Claim Application for Water Right 13-7923

Claim Section

5. The irrigation system fed by this water is a gravity flow sprinkler irrigation system. The subject water flows from an unnamed spring for approximately 2,080 feet directly into an open irrigation ditch at the Point of Diversion, which also carries water from water rights 13-626 and 13-627. The ditch flows for approximately 1,445 feet to an L-shaped concrete flume. The flume entrance is 29 inches wide and 24 inches deep. At the lower end of the flume is a head gate to an eight inch underground mainline pipe. On the side of the flume is a 24 inch by 24 inch flume exit. Water not going into the mainline pipe exit's the flume into an open ditch which flows back to Mill's Creek. The flume exit can be blocked by placing various heights of 24 inch long boards across the flume exit. A removable metal screen box is positioned immediately in front of the eight inch pipe entrance. The mainline pipe runs for approximately 2,450 feet along the southern edge of the Place of Use (POU) for water rights 13-626 and 13-627. The POU for this right is irrigated by water flowing from the end of the mainline to the POU. Claimant Shaw Land & Livestock Co., LLC does not know when the system was constructed or upgraded, but the Claimant has been using the irrigation system continuously since it purchased the property circa 1978.
