12. Remarks:

Priority Date Explanation:

This is the date that is given with the decree. The habitat benefits from the water and will help promote the habitat by diverting from where the stream enters my property. Currently the stream naturally diverts itself and from May to June which provides growth for the grass and trees in the area. I would like to be able to divert from this point when the water declines so that it continues to provide necessary water to support the vegetative growth.
